demand They can be persuaded to add a price tag to what they think is necessary for their work but that was about as far as they would go until recently The growing emphasis on human rights over the past few decades the greater emphasis on quality of life and the public's heightened expectations about their health led in many industrialized countries to a greater demand for health services This combined with improved possibilities of diagnosis and treatment at higher cost led to a significant increase in financial demands which made governments and health care systems uneasy and ready to accept any solution that would stop the spiral of seemingly endless cost augmentation     *The Future of Mental Health Services*
