Fat Lives Irmgard Tischner, 2013 Ever caught somebody or yourself checking out the content of a fat person's supermarket trolley Ever wondered what lies behind this behaviour or what it might be like to be at the receiving end of this judging gaze Within the context of the current obesity debate this book investigates the embodied experience of being large from a critical psychological perspective Using poststructuralist and feminist theories the author explores the discourses available to and used by self designated fat individuals as well as the societal power relationships that are produced by these Using the issues of body size and fat as an illustration the book describes the benefits of exploring psychological and social matters from a poststructuralist perspective and the dangers inherent in taking reductionist approaches to public health and other social issues As such this book should

be of particular interest to anyone working within the disciplines of psychology sociology and health studies as well as those involved in the study of health gender issues and appearance

The Body in Question Alan Petersen, 2007-01-24 Why is there currently such strong academic and popular interest in the body in contemporary societies What factors shape our conceptions of the body its naturalness health and normality What is the mind body dualism and why should it matter This book examines these and other body questions from a critical socio cultural perspective In particular it shows how conceptions of the body are affected by processes of individualization medicalization and commodification Chapters discuss the impact of new biomedical technologies on the notion of the natural body efforts to reshape and perfect the body the role of the media in framing body issues processes of body classification the impact of consumerism on concepts of health healing and self care and the implications of theoretical and practical efforts to integrate mind and body This book will be an invaluable source for those seeking to understand the social cultural and political significance of the body in contemporary society

Autonomy & Paternalism Thomas Nys, Yvonne Denier, Toon Vandeveld, 2007 In recent years the triumph of autonomy has made paternalist interventions increasingly problematic The value of a patient's right to self determination and the practice of informed consent are considered supremely important in present day health care ethics In general the idea of doctor knows best has become more and more suspicious This has left us with a situation in which paternalist medicine seems difficult to reconcile with respect for patient autonomy This book offers a thorough reflection on the relationship between autonomy and paternalism and argues that from both theoretical and practical angles the tension between these concepts is not as acute as it might seem In long term care psychiatry and care for the severely handicapped the principle of respect for autonomy is particularly ill suited This however does not mean that such respect is totally irrelevant but that it should take a different shape Good care in those cases requires us to transcend the sharp dichotomy between autonomy and paternalism In *Autonomy and Paternalism Reflections on the Theory and Practice of Health Care* various acclaimed authors present their views on this interesting and extremely relevant debate

Social Security Law and Policy Terry Carney, 2006 This book explores the legal meaning of the radical new laws which have transformed the social security system in the last decade It analyses legislation and case law and lays out the legal principles and concepts which underpin the sweeping reforms culminating in the welfare reform package announced in the 2005 Budget It also explores the policy foundations of these reforms and key administrative changes such as the creation of a privatised job network and of Centrelink as a payment agency This book also explores the tension between traditional protective functions of social security and the contemporary focus on activation reciprocity and capacity building and the extent to which social changes have altered the form of Australian welfare It reviews the history and transformation of the welfare state the ideas about the nature of poverty and need and the policy choices to be made Detailed case studies are made of the law and policy affecting key groups such as the unemployed people with illness or disability and sole parents as well as the administration and review

rights of welfare recipients and the workings of income and means tests **A Good Death?** Simon Woods,2016-03-16 This interdisciplinary collection presents valuable discourse and reflection on the nature of a good death Bringing together a leading judge and other legal scholars philosophers social scientists practitioners and parents who present varying accounts of a good death the chapters draw from personal experience as well as policy practice and academic analysis Covering themes such as patients rights to determine their own good death considering their best interests when communication becomes difficult and the role and responsibilities of health professionals the book outlines how ethical healthcare might be achieved when dealing with assisted suicide by organizations and how end of life services in general might be improved It will be of interest to students and academics working the area of medical law and ethics as well as health professionals and policy makers *Disputing Doctors* Mulcahy,2003-08-01 What are patient experiences of making complaints against doctors and what do they seek to achieve How do doctors and managers respond to complaints and what do their responses reveal about the implicit tensions in the doctor patient relationship What is the significance of the increasing incidence of disputes for approaches to the delivery of medical care This book looks at the dynamics of doctor patient disputes Reflecting on fifteen years of empirical research in the NHS it considers the contexts in which these disputes arise the different ways in which the parties construct disputing narratives and moral identities in the course of making and defending their claims and the extent to which existing systems for resolving disputes are sensitive to their needs This publication is timely Since the 1970s there has been an increasing amount of concern about the rise in complaints and medical negligence claims made by patients and their relatives Based on research with patients relatives doctors and NHS managers the book analyses how they perceive these disputes and what they seek to achieve by holding each other to account *Disputing Doctors* is valuable reading for all students researchers and academics working in the fields of the sociology of health and illness socio legal studies law and medicine medical sociology nursing and health policy **Foucault, Sport and Exercise** Pirkko Markula-Denison,Richard Pringle,2007-01-24 Michel Foucault s work profoundly influences the way we think about society in particular how we understand social power the self and the body This book gives an innovative and entirely new analysis of his later works making it a one stop guide for students exploring how Foucauldian theory can inform our understanding of the body domination identity and freedom as experienced through sport and exercise Divided into three themed parts this book considers Foucault s ideas and key debates Foucault s theories to explore power relations the body identity and the construction of social practices in sport and exercise how individuals make sense of the social forces surrounding them considering physical activity fitness and sport practices as expressions of freedom and sites for social change Accessible and clear including useful case studies helping to bring the theory to real life Foucault Sport and Exercise considers cultures and experiences in sports exercise and fitness coaching and health promotion In addition to presenting established Foucauldian perspectives and debates this text also provides innovative discussion of how Foucault s later work can inform the study and

understanding of sport and the physically active body

Health Psychology Antonia C. Lyons, Kerry

Chamberlain, 2006-02-16 This textbook aims to provide students with a stimulating alternative to the textbooks currently available by placing the discipline within the context of the social world and encouraging them to question some of the assumptions and values underlying much current research A comprehensive survey of the discipline is provided framed within a lifespan approach and emphasising social cultural factors such as gender ethnicity and social economic status All major topics are covered including health behaviours health promotion coping strategies stress biomedical and biopsychosocial models of health and illness chronic illnesses psychoneuroimmunology disability pain and patient provider communication Each topic is situated within its social and cultural context and constantly linked back to real world experience Chapters include valuable features such as research updates learning objectives and recommended readings This book will be an invaluable resource for students of health psychology across a range of disciplines including psychology anthropology and health studies Death and Dying Glennys Howarth, 2007-01-16 Glennys Howarth provides a cutting edge comprehensive discussion of the key topics in death and dying and in so doing demonstrates that the study of mortality is germane to all areas of sociology The book is organized thematically utilizing empirical material from cross national and cross cultural perspectives It carefully addresses questions about social attitudes to mortality the social nature of death and dying and explanations for change and diversity and explores traditional and contemporary experiences of death Jacket

Rethinking Health Psychology Crossley, Michele, 2000-10-01 This introductory text presents a coherent overview of prevalent theories methods and applications within contemporary health psychology **Theory and Research in**

Promoting Public Health Sarah Earle, Cathy E Lloyd, Moyra Sidell, Sue Spurr, 2007-03-20 Theory and Research in Promoting Public Health is an important text that addresses these questions exploring the key concepts debates and issues involved in multi disciplinary public health The book considers the complex and diverse nature of public health and helps readers critically appraise the theories research and policies that inform multidisciplinary public health practice EBOOK: Death's Dominion: Ethics at the End of Life Simon Woods, 2006-12-16 I enjoyed reading this book very much It is very readable and well argued using real life cases and thought experiments as well The book provides the reader with a short history of and an overview of the most important issues in modern palliative care Various theoretical discussions are clearly set out such as the relationship between the hospice movement and modern palliative care between palliative care and health care in general between palliative sedation and euthanasia and the question whether euthanasia can be part of palliative care The author starts with exploring the existing debates and then develops his own arguments in a balanced and well structured way Medicine Health Care and Philosophy The text of this book is accessible the philosophical and ethical arguments are clearly articulated and relevant ethical principles are integrated into the critique of the issues making this a very useful book for nurses working in palliative as well as in general care Nursing Ethics It is crucially important for any student or researcher

who is seriously considering ethical and policy matters at the end of life to embrace and tackle intellectually the issues that Woods raises in this book I would happily recommend it

Journal of Medical Ethics What constitutes a good death Is it possible to arrange a good death Is killing compatible with caring This book looks at death and the issues and ethical dilemmas faced at the end of life It addresses the central issues in the field such as Withholding and withdrawing treatment Euthanasia and assisted suicide Terminal sedation The role of autonomy Palliative care Drawing on a philosophical framework the author explores end of life issues in order to reflect on the nature of the good death and how this may be achieved The book considers whether it is permissible or desirable to influence the quality of dying offering palliative sedation as a possible alternative to terminal sedation the argument is extended to examine why some forms of assisted dying can be shown to be compatible with the ideas of palliative care Consideration is also given to future developments such as life extension techniques and the ethical questions that that these techniques might raise As such the book follows in the ongoing philosophical tradition to critique and analyse current thought on the topic of death encouraging self reflection in the reader and offering suggestions for practice in end of life care

Death's Dominion is key reading for students and professionals involved in care of the dying as well as those with an interest in the philosophical issues surrounding end of life care

Unmasking the Masculine Alan R. Petersen, Professor Alan Petersen, PH., 1998-07-08 Postmodernism and poststructuralism have undermined the assumptions upon which established identities have been constructed such as the concept of stable bodies and stable selves Sex gender sexuality and race are no longer viewed as merely descriptive aspects of experience but also as constructions of identity Drawing on current debates in postmodern feminism feminist philosophy of science anti racist postcolonial studies and queer theory this book considers the way in which discourse fabricates the ideal male body sexual identity and sexual politics Alan Petersen explores the possibilities of developing new models of identity not so closely linked to the sex gender system and examines the prospects of creating a new or reconceptualized identity politics

Restoring Humane Values to Medicine John Miles Little, 2003 Does reading poetry make you a better clinician Can euthanasia be understood in terms of the meaning of a life What is the moral and existential significance of life threatening experiences Australian surgeon poet philosopher and humanist Miles Little addresses these and other fascinating questions in this collection of papers Miles Little is one of the most original and engaging voices in contemporary medical ethics and philosophy He ranges across the sciences and the humanities creating hybrid fields of inquiry ethnomics interrogating orthodoxies and engaging different fields of human knowledge and experience The papers in this collection were chosen by his readers who also engage here with Miles Little's work in a short commentary that follows each paper The range of the commentators reflects the breadth of Little's appeal and influence academics and clinicians philosophers and ethicists novelists public health practitioners and cancer survivors each reflects agrees or disagrees Like Little's work itself this Reader is an open and unfolding dialogue that includes many different perspectives Commentators include Murray Bail Robin

Downie Nancy Dubler Stan Goulston Jill Gordon Paul Komesaroff Steve Leeder Paul McNeill Gavin Mooney and Bernadette Tobin *Health and Citizenship* Frank Huisman,Harry Oosterhuis,2015-10-06 This collection of essays looks at issues of health and citizenship in Europe across two centuries Contributors examine the extent to which the state can interfere with the private lives of its citizens the role of individual responsibility and if any boundary occurs in terms of what the state can realistically provide Health Promotion Kevin Lucas,Barbara Lloyd,2005-08-31 In short Lloyd and Lucas approach is challenging in its emphasis on a positive and holistic orientation to health and always humane in its emphasis on quality of life and in the authors words the indivisibility of the individual from society Professor Keith Tones Health Promotion is a major focus of government policy and an expanding area of practice involving a range of public health professionals At the same time there is much debate about what is meant by health and the best strategies for improving developing and promoting it In light of these debates Health Promotion offers a major reappraisal of health promotion activity examining the evidence for what actually works and highlighting issues for improving efficacy The field of health promotion has traditionally drawn from diverse fields including health psychology epidemiology political science and educational theory The authors argue that the effect of this has often been an unhelpfully fragmented view of people and their health They propose an alternative more integrated view as means of better understanding people and for making public health strategies more effective Health Promotion Evidence and Experience makes thought provoking reading for all those involved in public health and those with an interest in finding new ways to improve health outcomes
