Pearce, Yong Han Ahn, Hanmi Global Co, Ltd, 2013-07-03 Construction is one of the biggest industries in the world providing necessary facilities for human prosperity ranging from the homes in which we live to the highways we drive the power plants that provide energy for our daily activities and the very infrastructure on which human society is built The construction sector including the building sector has among the largest potential of any industry to contribute to the reduction of greenhouse gas emissions This ambitious and comprehensive textbook covers the concept of embedding sustainability across all construction activities It is aimed at students taking courses in construction management and the built environment Written in a lively and engaging style the book sets out the practical requirements of making the transition to a sustainable construction industry by 2020 Case studies are included throughout making the book both a core reference and a practical guide      **Fundamentals of Planning Cities for Healthy Living** Avi Friedman, Alexandra Pollock, 2022-09-06 The obesity crisis has affected many nations It is also one of the factors listed as contributing cause to the COVID 19 fatalities The common tendency is to blame people s dietary choices and sedentary habits Yet it can also be argued that social inequity and poor urban planning practices have largely contributed to a lack of active lifestyles Low density suburban sprawl long commutes food deserts and diminishing green areas are some aspects that have led to reduced physical activity among residents of all ages The proposed book illustrates the decline of community planning for healthy living and outlines measures that can be reintroduced to foster active lifestyles Each chapter stands for another subject that merits intervention and illustrates strategic approaches Its uniqueness lies in its comprehensiveness It covers the key principles of residential planning and offers principles of neighborhood design along with sustainable strategies as well as their applications The text is not limited to a theoretical aspect but offers contemporary well designed and illustrated examples of communities and firsthand information about them that was obtained through site visits and interviews with their designers      *The Green Workplace* Leigh Stringer, 2025-09-23 As 21st century companies realize they ll need to be green to compete sustainable ideas are spreading like wildfire throughout all fields of modern business In *The Green Workplace* Leigh Stringer an expert on sustainable workplace design and strategy shows companies on the cusp of radically transforming their practices how to bring together diverse teams and establish new organizational governance for creative problem solving in greening their workplace Her hands on green strategies are based on concrete and cost effective changes such as working from home ways to cut commuting costs video conferencing to cut down on travel increasing access to natural light to save energy and more Stringer explains how managers can implement these changes smoothly and efficiently In solving key problems she shows companies how a green business reduces costs increases productivity improves recruiting and retention and increases shareholder value in addition to benefiting the environment      **An Integrated Framework for Assessing the Value of Community-Based Prevention** Institute of Medicine, Board on Population Health and Public

Health Practice, Committee on Valuing Community-Based, Non-Clinical Prevention Policies and Wellness Strategies, 2012-12-29 During the past century the major causes of morbidity and mortality in the United States have shifted from those related to communicable diseases to those due to chronic diseases Just as the major causes of morbidity and mortality have changed so too has the understanding of health and what makes people healthy or ill Research has documented the importance of the social determinants of health for example socioeconomic status and education that affect health directly as well as through their impact on other health determinants such as risk factors Targeting interventions toward the conditions associated with today's challenges to living a healthy life requires an increased emphasis on the factors that affect the current cause of morbidity and mortality factors such as the social determinants of health Many community based prevention interventions target such conditions Community based prevention interventions offer three distinct strengths First because the intervention is implemented population wide it is inclusive and not dependent on access to a health care system Second by directing strategies at an entire population an intervention can reach individuals at all levels of risk And finally some lifestyle and behavioral risk factors are shaped by conditions not under an individual's control For example encouraging an individual to eat healthy food when none is accessible undermines the potential for successful behavioral change Community based prevention interventions can be designed to affect environmental and social conditions that are out of the reach of clinical services Four foundations the California Endowment the de Beaumont Foundation the W K Kellogg Foundation and the Robert Wood Johnson Foundation asked the Institute of Medicine to convene an expert committee to develop a framework for assessing the value of community based non clinical prevention policies and wellness strategies especially those targeting the prevention of long term chronic diseases The charge to the committee was to define community based non clinical prevention policy and wellness strategies define the value for community based non clinical prevention policies and wellness strategies and analyze current frameworks used to assess the value of community based non clinical prevention policies and wellness strategies including the methodologies and measures used and the short and long term impacts of such prevention policy and wellness strategies on health care spending and public health An Integrated Framework for Assessing the Value of Community Based Prevention summarizes the committee's findings Technology Roadmapping for Manufactured Housing, 2003 **The Power of Existing Buildings** Robert Sroufe, Craig Stevenson, Beth Eckenrode, 2019-11-12 Your building has the potential to change the world Existing buildings consume approximately 40 percent of the energy and emit nearly half of the carbon dioxide in the US each year In recognition of the significant contribution of buildings to climate change the idea of building green has become increasingly popular But is it enough If an energy efficient building is new construction it may take 10 to 80 years to overcome the climate change impacts of the building process New buildings are sexy but few realize the value in existing buildings and how easy it is to get to zero energy or low energy consumption through deep energy retrofits Existing buildings can and should be retrofit to reduce

environmental impacts that contribute to climate change while improving human health and productivity for building occupants In *The Power of Existing Buildings* academic sustainability expert Robert Sroufe and construction and building experts Craig Stevenson and Beth Eckenrode explain how to realize the potential of existing buildings and make them perform like new This step by step guide will help readers to understand where to start a project develop financial models and realize costs savings assemble an expert team and align goals with numerous sustainability programs *The Power of Existing Buildings* will challenge you to rethink spaces where people work and play while determining how existing buildings can save the world The insights and practical experience of Sroufe Stevenson and Eckenrode along with the project case study examples provide new insights on investing in existing buildings for building owners engineers occupants architects and real estate and construction professionals *The Power of Existing Buildings* helps decision makers move beyond incremental changes to holistic results oriented solutions
