custodians of preventative medicine As we are comfortable with mammography pap smears measuring cholesterol levels and blood sugar levels could we see cardiac CT imaging as one of the tools available for widespread implementation in public policy For change to occur we need conversation followed by action The information offered throughout this book is accompanied by an invitation to be part of that conversation Criticism and controversy are healthy parts of vigorous conversation as too are vision passion and an enthusiasm for possibility If this book starts such conversation that opens doors to further evaluation and discussion and along the way improves medicine and saves lives then that is a good start
