Heart Of The New Thought 1902:

The Spirit of the New Thought Horatio Willis Dresser, 1917 **When You Were a Tadpole and I Was a Fish** Martin Gardner, 2009-10-13 Martin Gardner is indispensable Here's the perfect introduction to the range of his obsessions from Ann Coulter to The Wizard of Oz William Poundstone bestselling author of Are You Smart Enough to Work at Google Best known as the longtime writer of the Mathematical Games column for Scientific American which introduced generations of readers to the joys of recreational mathematics Martin Gardner has for decades pursued a parallel career as a devastatingly effective debunker of what he once famously dubbed fads and fallacies in the name of science It is mainly in this latter role that he is onstage in this collection of choice essays When You Were a Tadpole and I Was a Fish takes aim at a gallery of amusing targets ranging from Ann Coulter's qualifications as an evolutionary biologist to the logical fallacies of precognition and extrasensory perception from Santa Claus to The Wizard of Oz from mutilated chessboards to the little known one poem poet Langdon Smith the original author of this volume's title line The writings assembled here fall naturally into seven broad categories Science Bogus Science Mathematics Logic Literature Religion and Philosophy and Politics Under each heading Gardner displays an awesome level of erudition combined with a wicked sense of humor When you figure out the answer to one of Gardner's puzzles you know you've found something that is indisputably true anywhere anytime For a brief moment the universe makes perfect sense John Tierney The New York Times Smart witty essays on science and culture Carolyn Kellogg Los Angeles Times A more than worthwhile introduction to one of the most underappreciated polymaths of the last fifty years Christopher Vola The Brooklyn Rail **The Public Library Quarterly**, 1903 **The Kansas City Public Library Quarterly** Kansas City Public Library (Kansas City, Mo.), 1904 *Class List*, 1905 **Paths Between Head and Heart** Oliver C. Robinson, 2018-08-31 Paths Between Head and Heart provides an accessible but comprehensive account of how science and spirituality relate not as enemies but as partners in the quest for a truth that is greater than either one can understand alone While many books have been written on science and religion not many have looked at how spirituality and science exist as complementary parts of a larger whole and how they relate specifically to the transitional challenges that define our era **Each Mind a Kingdom** Beryl Satter, 1999-08-02 The New Thought Movement was an enormously popular late nineteenth century spiritual movement led largely by and for women Mary Baker Eddy's Christian Science is but one example of the fascinating range of these groups which advocated a belief in mind over matter and espoused women's spiritual ability to purify the world This work is the first to uncover the cultural implications of New Thought embedding it in the intellectual traditions of nineteenth century America and illuminating its connections with the self help and New Age enthusiasms of our own fin de siècle Beryl Satter examines New Thought in all its complexity presenting along the way a captivating cast of characters In lively and accessible prose she introduces the people the institutions the texts and the ideas that comprised the New Thought movement This fascinating social and intellectual history explores the complex relationships
