A Biographical Dictionary of Railway Engineers John Marshall,1978 *Rail, Steam, and Speed* Christopher McGowan,2004-11-10 From October 6 through 14 1829 in a small village just outside Liverpool England ten thousand spectators gathered to witness one of the most remarkable events of the Industrial Age a battle among locomotives that became known as the Rainhill Trials Five machines were entered in the competition the horse powered Cycloped attained a top speed of only five miles per hour while Perseverance which looked like a giant iron bottle standing upright atop four wagon wheels creaked along at a walking pace But the three way race between Robert Stephenson s Rocket Timothy Harworth s Sans Pareil and the crowd favorite John Braithwaite and John Ericson s Novelty astonished the gathered crowds The unfamiliar clank of machinery huge billows of steam and unprecedented speeds of thirty miles per hour thrilled the crowds during the trials carnival like atmosphere The Rocket won the competition though it had been claimed that the machine was not the superior locomotive Rail Steam and Speed explains why and offers an absorbing account of the trials people and science that gave birth to steam locomotion The purpose of the trials had been to find a locomotive that could maintain a speed of ten miles per hour for a round trip totaling thirty five miles the distance separating Liverpool and Manchester which were soon to be linked by the world s first passenger railway But what was achieved during those nine days became a benchmark of the Industrial Revolution Bringing the excitement of this great drama to life Christopher McGowan introduces us to such pioneers as George Stephenson who started as a colliery boy and finished as the father of the railways John Ericsson a Swedish Army officer who invented a new kind of locomotive in England but spent most of his life in the United States where he built the Monitor for the Union Navy and Richard Trevithick whose eleven year adventure

in South America included winning and losing several fortunes deserting Bolivar's army and escaping the jaws of a crocodile He encountered George Stephenson's son Robert in a Colombian hotel in one of the most bizarre meetings of the age But the real stars are the locomotives themselves McGowan shows how locomotives work and how they were developed from the gargantuan beam engines condensing low pressure steam inside enormous cylinders to the small high pressure driven engines of the maverick miner Trevithick He adapted the engines to power road carriages but atrocious roads led him to build an engine that could run on rails And so was born the world's first steam locomotive and modern transportation

Letters From a Railway Official Second Series Charles DeLano Hine, 2020-08-02 Reproduction of the original Letters From a Railway Official Second Series by Charles DeLano Hine *Neston Collieries, 1759-1855* Anthony Annakin-Smith, 2023-03-20 The extraordinary story of the two early collieries at Neston in west Cheshire has been largely overlooked by historians Yet for a time the main coal mine Ness Colliery was more successful than most of its contemporaries in nearby south west Lancashire and North Wales It was the first large industrial site in west Cheshire and introduced the area's earliest steam engine The Engineer, 1857 Liverpool Road Station, Manchester R. S. Fitzgerald, 1980

Building Knowledge, Constructing Histories Ine Wouters, Stephanie van de Voorde, Inge Bertels, Bernard Espion, Krista de Jonge, Denis Zastavni, 2018-09-05 Building Knowledge Constructing Histories brings together the papers presented at the Sixth International Congress on Construction History 6ICCH Brussels Belgium 9-13 July 2018 The contributions present the latest research in the field of construction history covering themes such as Building actors Building materials The process of building Structural theory and analysis Building services and techniques Socio cultural aspects Knowledge transfer The discipline of Construction History The papers cover various types of buildings and structures from ancient times to the 21st century from all over the world In addition thematic papers address specific themes and highlight new directions in construction history research fostering transnational and interdisciplinary collaboration Building Knowledge Constructing Histories is a must have for academics scientists building conservators architects historians engineers designers contractors and other professionals involved or interested in the field of construction history *Lives of the Engineers* Samuel Smiles, 1868 Prosopography Approaches and Applications K. organized chronologically inviting readers with an interest in engineering to follow the path by which these remarkable engineers utterly changed our lives **The Early History of Railway Tunnels** Hubert Pragnell, 2024-08-30 To the early railway traveller the prospect of travelling to places in hours rather than days hitherto was an inviting prospect however a journey was not without its fears as well as excitement To some the prospect of travelling through a tunnel without carriage lighting with smoke permeating the compartment and the confined noise was a horror of the new age What might happen if we broke down or crashed into another train in the darkness To others it was exciting with the light from the footplate flickering against the tunnel walls or spotting the occasional glimpses of light from a ventilation shaft To the directors of early railway companies planning a route was governed by expense and the most direct way Avoiding hills could add miles but tunnelling through them could involve vast expense as the Great Western Railway found at Box and the London and Birmingham at Kilsby Creating a cutting as an alternative was also costly not only in labour and time but also in compensation for landowners who opposed railways on visual and social grounds having seen their land divided by canals Construction involved millions of bricks or blocks of stone for sufficiently thick walls to withstand collapse However the entrance barely seen from the carriage window might be an impressive Italianate arch as at Primrose Hill or a castellated portal worthy of the Middle Ages as at Bramhope This book sets out to tell the story of tunnelling in Britain up to about 1870 when it was a question of burrowing through earth and rock with spade and explosive powder with the constant danger of collapse or flooding leading to injury and death It uses contemporary accounts from the dangers of railway travel by Dickens to the excitement of being drawn through the Liverpool Wapping Tunnel by the young composer Mendelssohn It includes descriptions from early railway company guide books newspapers and diaries It also includes numerous photographs and colored architectural elevations from railway archives *Lives of the Engineers, with an Account of Their Principal Works* Samuel Smiles, 1862
