Nineteenth-Century Explorers Britannica Educational Publishing,2013-06-01
Although the once fuzzy outlines of the global map had largely been defined by the 19th century much had yet to be learned As some explorers continued to search either for resources or for unknown regions others increasingly embraced a new kind of discovery that of scientific knowledge Readers will journey alongside a host of notable explorers accompanying Lewis and Clark on their famous expedition during which they both charted much of the United States and identified 178 new plants and marvelling at Charles Darwin s revolutionary findings in the Galapagos Islands Their explorations and many others are chronicled within these pages **Australian Explorers by Sea, Land, and Air, 1788-1988** Ian Francis McLaren,1990 European Discovery and Exploration of Australia Erwin Feeken,2019-06-21
The map of Australia abounds with fascinating geographical place names the origins of which have for long been hidden in the journals of our early explorers Now after nine years of research Erwin Feeken a highly qualified cartographer and his wife Gerda have finalised the first complete record of Australian geographical place names and the most comprehensive general reference work on Australian exploration ever published In *European Discovery and Exploration of Australia* there are twenty three beautifully drawn four colour maps plus index showing the routes of more than 120 explorers with the locality of their named features numbered to accord with a Key to the Maps The place names in the Key have been numbered approximately in chronological order of their naming though places found during a single expedition have been grouped together There is also a gazetteer containing over four thousand place names alphabetically arranged with notes on their origins The map reference numbers in brackets form a cross reference with the Key to the Maps The work is introduced by a foreword from Lord Casey and an essay on the nature of Australian exploration by Professor O H K Spate director of the Research School of Pacific Studies Australian National University The text comprising a survey of Australian exploration is arranged in the form of biographies of the explorers describing for the first time several almost unknown figures with emphasis on their expeditions and under the following headings The Approach to Australia Exploration before Settlement 1606 1788 From Botany Bay to the Blue Mountains 1788 1813 Land and Sea Expeditions 1813 1901 This section of the book is very fully illustrated with 18 full colour plates and some 150 black and white photographs mostly reproductions of early prints Concluding the book are bibliographies of sources and references a list of illustrations and an index of explorers and ships The comprehensive nature of this work will ensure that it becomes a valuable reference book for students while the text and illustrations will appeal to all who are interested in our

history Collectors of Australiana will welcome this most attractive addition to the ever increasing number of available publications

The Australian Explorers George Grimm,2024-02-05 Persons who have yet to make their acquaintance with the early history of New South Wales will learn with surprise that the colony had been founded for almost a quarter of a century before the Blue Mountain barrier was crossed For so long a period it was scarcely possible to proceed more than forty miles from Sydney in any direction Many a despairing look must those early settlers have cast on the frowning ramparts of the range which leaving only a narrow margin between itself and the sea threatened to convert the cradle of the colony into a Procrustes bed to which its dimensions would have to conform in the future as they had done in the past This sense of confinement was the harder to bear that it was met with in a land of freedom and many a time did the caged eagle dash itself with fruitless rage against the bars of its prison A record of the unsuccessful attempts to get beyond the main range would form a heroic chapter of our history and one too of which we might well feel proud if there is any truth in the saying that in great undertakings it is glorious even to fail Within four months after the arrival of the first fleet our annals present a picture of Governor Phillip and party struggling laboriously westward to the gorges of the mountains

Horsemen of the First Frontier (1788-1900) and the Serpent's Legacy Keith Robert Binney,2005 An economic and social history of early New South Wales told through the life stories of pioneer 19th century horsemen Traces the origin and development of the horse in Australia and a special tribute to Australia s internationally acclaimed thoroughbred expert C Bruce Lowe
