German Architecture and the Classical Ideal David Watkin, Tilman Mellinghoff, 1987 German Classicism is a powerful architectural force that is only now being fully studied As this extensively illustrated book shows palaces private houses public buildings and urban planning all received patronage on a scale that could not be paralleled in other countries Of the host of architects whose genius was given such superb opportunities in the years 1740 to 1840 only Karl Friedrich Schinkel's name has become widely known yet this book points out all over Germany rulers were dramatically transforming their capitals and the achievements of Weinbrenner at Karlsruhe Moller at Darmstadt or Klenze at Munich are by any standards astonishing The first part of the book is by David Watkin a leading British authority on the Classical Revival He provides a historical account that sets German Neoclassicism in its regional and political context and notes the impact of France and England and the Franco Prussian style before Schinkel He discusses Schinkel's own work that of Leo von Klenze and Neoclassicism in North and South Germany The book's second part consists of an index of buildings prepared by Tilman Mellinghoff Here every important Neoclassical building both existing and destroyed is listed and described under its location The index is an invaluable source of information available nowhere else in English David Watkin is a Fellow of Peterhouse and a University Lecturer in History of Art at Cambridge University Tilman Mellinghoff is an Assistant Lecturer at the Universities of Cologne and Bonn

Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane's Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect's impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane's late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane's influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture

'Turquerie' and the Politics of Representation, 1728-1876 Nebahat Avcioglu, 2011 Devoted explicitly to the examination of Ottoman Turkish inspired architecture in Western Europe during the eighteenth and nineteenth centuries in this study Nebahat Avcioglu rethinks the question of cultural frontiers not as separations but as a

rapport of heterogeneities Reclaiming turquerie as cross cultural art from the confines of the inconsequential exoticism it is often reduced to Avcioglu analyses hitherto neglected constructions and links them to notions of self representation and politics "Turquerie and the Politics of Representation, 1728-1876 " Nebahat Avcioglu,2017-07-05 In this first full length study devoted explicitly to the examination of Ottoman Turkish inspired architecture in Western Europe during the eighteenth and nineteenth centuries Nebahat Avcioglu rethinks the question of cultural frontiers not as separations but as a rapport of heterogeneities Reclaiming turquerie as cross cultural art from the confines of the inconsequential exoticism it is often reduced to Avcioglu analyses hitherto neglected images designs and constructions and links Western interest in the Ottoman Empire to notions of self representation and national politics In investigating why and to what effect Europeans turned to the Turk for inspiration Avcioglu provides a far reaching cultural reinterpretation of art and architecture in this period Presented as a series of case studies focusing on three specific building types kiosks mosques and baths chosen on the basis that each represents the first full fledged manifestations of their respective genres to be constructed in Western Europe the study delves into the cultural politics of architectural forms and styles The author argues that the appropriation of those building types was neither accidental nor did it merely reflect European domination of another culture The process was essentially dialectical and contributed to transculturation in both the West and the East

**The Imperfect City: On Architectural Judgment** Samir Younes, 2016-03-03 If architectural judgment were a city a city of ideas and forms then it is a very imperfect city When architects judge the success or failure of a building the range of ways and criteria which can be used for this evaluation causes many contentious and discordant arguments Proposing that the increase in number and intensity of such arguments threatens to destabilize the very grounds upon which judgment is supposed to rest this book examines architectural judgment in its historical cultural political and psychological dimensions and their convergence on that most expressive part of architecture namely architectural character It stresses the value of reasoned judgment in justifying architectural form a judgment based on three sets of criteria those criteria that are external to architecture those that are internal to architecture and those that pertain to the psychology of the architect as image maker External criteria include philosophies of history or theories of modernity internal criteria include architectural character and architectural composition while the psychological criteria pertain to mimetic rivalry or rivaling desires for the same architectural forms Yet although architectural conflicts can adversely influence judgment they can at the same time contribute to the advancement of architectural culture

explore the many issues raised by the very concepts of Romantic and Romanticism The Greenwood Encyclopedia of Homes through World History James M. Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three dimensional record of culture Twenty four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present The Lincoln Memorial & American Life Christopher A. Thomas, 2002 Christopher Thomas offers the first detailed analysis of Bacon's design and the memorial as a system including the statue of Lincoln by Daniel Chester French Using extensive archival data Thomas discusses just why the memorial looks as it does Ichnographia Rustica William Alvis Brogden, 2017-02-17 One of the most significant occurrences in the history of design was the creation of the English Landscape Garden Accounts of its genesis the surprising structural change from the formal to a seeming informal are numerous But none has ever been quite convincing and none satisfactorily placed the contributions of Stephen Switzer Unlike his contemporaries Switzer an 18th century author of books on gardening and agricultural improvement grasped a quite new principle that the fashionable pursuit of great gardens should be rural and extensive rather than merely the ornamentation of a particular part of an estate Switzer saw that a whole estate could be enjoyed as an aesthetic experience and by the process of improving its value could increase wealth By encouraging improvers to see the garden in his enlarged sense he opened up the adjoining countryside the landscape and made the whole a subject of unified design Some few followed his advice immediately such as Bathurst at Cirencester But it took some time for his ideas to become generally accepted Could this vision and its working out in practice between 1710 and 1740 be the very reason for such changes 300 years after the first volume of his writings began to be published this book offers a timely critical examination of lessons learned and Switzer's roles In major influential early works at Castle Howard and Blenheim and later the more minor works such as Spy Park Leeswood or Rhual the relationships between these designs and his writings is demonstrated In doing so it makes possible major reassessment of the developments and thus our attitudes to well known works It provides an explanation of how he and his colleagues and contemporaries first made what he had called Ichnographia Rustica or more familiarly Modern Gardening from the mid 1740s and later landscape gardens It reveals an exceptional innovator who by transforming the philosophical way in which nature was viewed integrated good design with good farming and horticultural practice for the first time It raises the issue of the cleavage in thought of the later 18th century essentially whether the ferme ornee as the mixture of utile and dulci was the perfect designed landscape or whether this was the enlarged garden with

features of unadorned nature The book discusses these considerable and continuing contrary influences on later work and suggests Switzer has many lessons for how contemporary landscape and garden design ought be perceived and practised

**The Secret Lives of Buildings** Edward Hollis, 2009-11-10 A strikingly original beautifully narrated history of Western architecture and the cultural transformations that it represents Concrete marble steel brick little else made by human hands seems as stable as immutable as a building Yet the life of any structure is neither fixed nor timeless Outliving their original contexts and purposes buildings are forced to adapt to each succeeding age To survive they must become shape shifters In an inspired refashioning of architectural history Edward Hollis recounts more than a dozen stories of such metamorphosis highlighting the way in which even the most familiar structures all change over time into something rich and strange The Parthenon that epitome of a ruined temple was for centuries a working church and then a mosque the cathedral of Notre Dame was restored to a design that none of its original makers would have recognized Remains of the Berlin Wall meanwhile which was once gleefully smashed and bulldozed are now treated as precious relics With *The Secret Lives of Buildings* Edward Hollis recounts the most enthralling of these metamorphoses and shows how buildings have come to embody the history of Western culture Hollis exposes the surprisingly motley histories of some of the world's great landmarks The chapter on the Parthenon actually brought me to tears Jenna Russell *The Boston Globe* What a happy tingle of discovery to come across a book that differs sharply from all the others in its field Hollis thinks with such originality and writes with such flair that he is a pleasure to read Stanley Abercrombie *The American Scholar*
