German Light Half-Tracked Prime Movers 1934-1945 Reinhard Frank,1997 Covers all of the light half tracked prime movers used by Germany during WWII      **Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA** Nigel Askey,2013-11-01 Operation Barbarossa Volume IIA concerns the Wehrmacht All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I along with the contextual history An assessment of each weapon system s inherent combat power is provided as well as attributes such as the relative anti tank anti personnel and anti aircraft values Volume IIA then focuses on the detailed Kriegstarkenachweisungen KStN or TOE for German land units including those in the West as well as the unit s actual organisation and equipment All significant units in the German Army Heer Waffen SS Luftwaffe and security forces are included ranging from the largest panzer divisions down to small anti aircraft companies military police units Landeschützen battalions and rail road and construction companies In all cases the data is presented in detailed tables using the weapon systems and combat squads previously analysed      Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIB Nigel Askey,2014-08-26 Volume IIB is the second volume relating to and completing the Wehrmacht and the German mobilisation and war economy from June to December 1941 It includes the most detailed Orders of Battle ever published on the German Heer Luftwaffe Waffen SS and Kriegsmarine in all areas of the Reich between 22nd June and 4th July 1941 Even small and obscure units are included such as flak companies artillery HQs observation battalions bridging columns Landeschützen battalions MP battalions railroad companies and Luftwaffe Kurierstaffeln Verbindungsstaffeln and Sanitätsflugbereitschaften The Luftwaffe OOBs also include details on aircraft types and strengths in each air unit      **German Military Vehicles of World War II** Jean-Denis G.G. Lepage,2014-11-18 This volume presents a cross section of the most common transport vehicles produced and used by the German army Tanks plus auxiliary vehicles such as cars motorcycles vans ambulances trucks and tractors made it possible for the troops to keep moving These lightly armored or unarmored vehicles aka soft skins operated behind the front lines maintaining supply lines connecting armies with their home bases and ultimately determining the outcome of battle Beginning with the development of military vehicles in the early 1930s this volume discusses the ways in which this new technology influenced and to some extent facilitated Hitler s program of rearmament Nomenclature standard equipment camouflage and the combat roles of the various vehicles are thoroughly examined Individual vehicle types are arranged and discussed by the following classifications cars and motorcycles trucks and tractors half tracks and wheeled combat vehicles Accompanied by well researched detailed line drawings each section deals with a number of individual vehicles describing their design manufacture and specific use      *American Book Publishing Record* ,1997      **Logistics in World War II** John Norris,2020-04-30 John Norris shows how logistics though less glamorous than details of the fighting itself played a decisive

role in the outcome of every campaign and battle of World War Two The author marshals some astounding facts and figures to convey the sheer scale of the task all belligerents faced to equip vast forces and supply them in the field He also draws on first hand accounts to illustrate what this meant for the men and women in the logistics chain and those depending on it at the sharp end Many of the vehicles from supply trucks to pack mules and other relevant hardware are discussed and illustrated with numerous photographs This first volume of two looks at the early years of the war so we see for example how Hitlers panzer divisions were kept rolling in the Blitzkrieg a German division in 1940 still had around 5000 horses requiring hundreds of tonnes of fodder and the British armys disastrous loss of equipment at Dunkirk This is a fascinating and valuable study of a neglected aspect of World War Two
