Photofascism Vanessa Rocco, 2020-11-26 Photography and fascism in interwar Europe developed into a highly toxic and combustible formula Particularly in concert with aggressive display techniques the European fascists were utterly convinced of their ability to use the medium of photography to manufacture consent among their publics Unfortunately as we know in hindsight they succeeded Other dictatorial regimes in the 1930s harnessed this powerful combination of photography and exhibitions for their own odious purposes But this book for the first time focuses on the particularly consequential dialectic between Germany and Italy in the early to mid 1930s and within each of those countries vis vis display culture The 1930s provides a potent case study for every generation and it is as urgent as ever in our global political environment to deeply understand the central role of visual imagery in what transpired Photofascism demonstrates precisely how dictatorial regimes use photographic mass media methodically and in combination with display to persuade the public with often times highly destructive even catastrophic results **The Photography of Crisis** Daniel H. Magilow, 2012 Examines photo essays from Weimar Germany s many social crises Traces photography s emergence as a new language that German photographers used to intervene in modernity s key political and philosophical debates changing notions of nature and culture national and personal identity and the viability of parliamentary democracy

Appalachian Photographs of Earl Palmer Jean Haskell Speer, 2014-07-11 For more than fifty years mountain born Earl Palmer traveled the Southern Appalachians with his camera recording his personal vision of the mountain people and their heritage Over these year he created in several thousand photographs a distinctive body of work that affirms a traditional image of Appalachia a region of great natural beauty inhabited by a self sufficient people whose lives are notable for simplicity and

harmony For this book Jean Haskell Speer has selected more than 120 representative photographs from Palmer's collection and has written a biographical and critical commentary based on extensive interviews with the photographer Palmer's photographs Speer argues are significant cultural statements that depict not so much a geographical region as a particular idea of Appalachia

Antisemitism in the German Military Community and the Jewish Response, 1914-1938 Brian E. Crim, 2014-04-17 Antisemitism in the German Military Community and the Jewish Response 1914-1938 explores how German World War I veterans from different social and political backgrounds contributed to antisemitic politics during the Weimar Republic The book compares how the military right wing veterans and Jewish veterans chose to remember their war experiences and translate these memories into a political reality in the postwar world Antisemitism addresses several neglected issues First there is relatively little scholarship discussing antisemitism in the imperial German army and the impact former imperial officers had on the antisemitic predilections of veteran associations This subject deserves attention given that veteran politics during the Weimar Republic were of tremendous significance to the collapse of democracy and the rise of National Socialism and that the primary architects of the Third Reich and the Final Solution were either World War I veterans or had been members of paramilitary organizations in the interwar period The second issue addressed is how veterans influenced the definition of Aryan identity or how race came to be perceived through the prism of war and political violence Since German Jews had to fight both accusations of shirking military service and the perception of the Jew as effeminate the manner in which these veterans tried to reforge Jewish identity and their relationship with their former comrades is an extraordinarily important issue The third issue concerns situational antisemitism or the process by which an organization expressed an opinion or policy concerning Jews in response to internal dissension and external influences

German Art 1907-1937 Martin Ignatius Gaughan, 2007 This book examines the responses of visual artists including architects designers and photographers to the technological and social modernisation of Germany during the first three decades of the twentieth century It investigates how these aspects of the modernising process inform both the subject matter and formal innovations of their work The study analyses how these visual practices were not just the concerns of isolated and enclosed art worlds but had wider social resonances ranging from the debates concerning the reformist objectives of the Deutscher Werkbund 1907 to the National Socialist ideological onslaught on modernist culture culminating in the Entartete Kunst Degenerate Art exhibitions of 1937 Many of the artists encountered here were radicalised by the First World War the Russian Revolution and the November 1918 Revolution in Germany experiences which effected change in their conceptualising of cultural production and its social function their modes of working however would also set challenging markers for what forms art might take for the twentieth century The book is therefore both a study of art in complex political and sociocultural contexts and a reflection on how engagement with a social imagination can challenge a tradition based on the assumptions of individual imaginings
