Germany, Inc. Werner Meyer-Larsen, 2000 Ten strong egos three different strategies and one major target Enter Deutschland AG Volkswagen v Ford Bertelsmann v Time Warner Hoechst BASF and Bayer v DuPont Allianz v Metropolitan Life Lufthansa v American Airlines Airbus v Boeing The contest is thrilling intoxicating even The figures of Deutschland AG versus those of Corporate America everything is so right it s really wrong when you come right down to it As Japan s sun sinks slowly in the West a formidable new competitor has risen to replace her as America s chief rival in the battle for global business leadership Emboldened by reunification and its role as leader of the European Union Germany is flexing its muscles For the first time in history a transatlantic global conglomerate is rapidly taking shape its policies defined by a small band of German business elites What are the economic sociopolitical and cultural forces driving the new German expansionism What is the strategy behind it and how threatening is it really Who are the major players involved and what can we expect from them in the years ahead How do Germany s plans fit with the ultimate unification of European economies under the euro And perhaps most intriguing to what extent has American post cold war policy been deliberately skewed to encourage the hegemony of Germany Inc and why Written by Werner Meyer Larsen a journalist who has closely covered the transatlantic business beat for over a decade this book provides answers to these and other questions of crucial importance to every businessperson While the merger of Daimler Benz and Chrysler in March 1999 is popularly held to have been the opening shot in a new war of global attrition it was as Meyer Larsen explains in reality a major turning point in a German offensive that has been quietly gaining ground for some years Since the late 1980s a handful of Germany s most powerful industrial concerns has been steadily chipping away at America s lead in a range of sectors including publishing air travel steel insurance and cars Leading the attack is a new generation of ambitious young executives unencumbered by the political restrictions or sins of their predecessors and bolstered by a virtual banking cartel controlled by Deutsche Bank Compelled as much by their anxiety over the post cold war power vacuum as a desire to strut their stuff on a global scale their battle cry is Go West Think big Meyer Larsen traces the growth of these companies and the evolution of Germany Inc He takes us inside Daimler Lufthansa VW Bertelsmann Hoechst Siemens Allianz and the other top players to reveal their strategies And he provides vivid portraits of the men who control their reins including Ferdinand the Shark Piech of VW Bertelsmann s Thomas Middelhoff a k a Mr Spock Mr Stockmarket Rolf E Breuer of Deutsche Bank and Gerhard Crommer of Krupp the Spider in the Web of Steel explaining in each case the likely impact of each leader s style on the future of his industry A penetrating fact filled exploration of a development of paramount commercial geopolitical and cultural importance Germany Inc is must reading for businesspeople policymakers and students of current affairs everywhere A History of Modern Germany Since 1815 Frank B. Tipton, 2003 Tipton s book will prove a godsend to teachers and students of Modern German History not only does it provide a fresh and compelling account of the whole period from 1815 right up to the present it achieves a rare

A World of Regions Peter J. Katzenstein, 2015-11-16 Observing the dramatic shift in world politics since the end of the Cold War Peter J Katzenstein argues that regions have become critical to contemporary world politics This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation state or the inevitable march of globalization In detailed studies of technology and foreign investment domestic and international security and cultural diplomacy and popular culture Katzenstein examines the changing regional dynamics of Europe and Asia which are linked to the United States through Germany and Japan Regions Katzenstein contends are interacting closely with an American imperium that combines territorial and non territorial powers Katzenstein argues that globalization and internationalization create open or porous regions Regions may provide solutions to the contradictions between states and markets security and insecurity nationalism and cosmopolitanism Embedded in the American imperium regions are now central to world politics

Toward a Critical Theory of States Clyde W. Barrow, 2016-05-12 In depth study of the enduring impact of the 1970s debate between state theorists Ralph Miliband and Nicos Poulantzas We have recently lived through the turmoil of a global financial crisis that originated in the United States and despite the platitudes of neo liberal ideology nation states were deeply involved in managing this crisis If the state is again a preeminent actor in the global economy then state theory and the problem of the state should also return to the forefront of political theory *Toward a Critical Theory of States* is an intensive analysis of the 1970s debate between state theorists Ralph Miliband and Nicos Poulantzas including its wider impact on Marxist theories of the state in subsequent decades Clyde W Barrow makes unique arguments and contributions to this continuing discussion in state theory and lays the foundation for more theoretically informed empirical and historical research on the state in the age of globalization He argues that by merely moving past the Poulantzas Miliband debate as some have recommended scholars have abandoned much that is valuable in understanding the state particularly the need to comprehend the contemporary transformation of the state form and the state apparatuses as part of the new conditions of globalization and transnational capital accumulation Building upon themes of state restructuring found in Poulantzas and Miliband Barrow establishes the outlines of an approach that integrates the thought of both to propose a synthetic understanding of the new imperialism

High Skills : Globalization, Competitiveness, and Skill Formation Phillip Brown, Andy Green, Hugh Lauder, 2001-09-20 Economic globalization has led to intense debates about the competitiveness of nations Prosperity social justice and welfare are now seen to depend on the creation of a high skilled workforce This international consensus around high skills has led recent American presidents to claim themselves education presidents and in Britain Tony Blair has announced that talent is 21st century wealth This view of knowledge driven capitalism has led all the developed economies to increase numbers of highly trained people in preparation for technical professional and

managerial employment But it also harbours the view that what we regard as a skilled worker is being transformed The pace of technological innovation corporate restructuring and the changing nature of work require a new configuration of skills described in the language of creativity teamwork employability self management and lifelong learning But is this optimistic account of a future of high skilled work for all justified This book draws on the findings of a major international comparative study of national routes to a high skills economy in Britain Germany Japan Singapore South Korea and the United States and includes data from interviews with over 250 key stakeholders It is the first book to offer a comparative examination of high skill policies a topic of major public debate that is destined to become of even greater importance in all the developed economies in the early decades of the twenty first century
