India's Spatial Imaginations of South Asia Shibashis Chatterjee, 2018-12-14 Since India attained independence its foreign policy discourse has imagined its South Asian neighbourhood through the politics of realism This imagination explicates state interest in South Asia by establishing it as a space of sovereign territoriality Even today India s foreign and security policies are primarily shaped by geopolitical centrism

and remain unaffected by economic prosperity and community concerns As a part of the Oxford International Relations in South Asia series this volume examines alternative conceptions of South Asian space in terms of geo economics and community and justifies why they have been unable to replace its dominant understanding irrespective of the political regime This volume probes reasons behind the relevance of differentiated cartography of territorial nationalism in our shared understanding of space politics society and the community Environmental Security Simon Dalby,2002 Since the end of the Cold War environmental matters especially the international implications of environmental degradation have figured prominently in debates about rethinking security But do the assumptions underlying such discussions hold up under close scrutiny In this first treatment of environmental security from a truly critical perspective Simon Dalby shows how attempts to explain contemporary insecurity falter over unexamined notions of both environment and security Adding environmental history aboriginal perspectives and geopolitics to the analysis explicitly suggests that the growing disruptions caused by a carbon fueled and expanding modernity are at the root of contemporary difficulties Environmental Security argues that rethinking security means revisiting the question of how we conceive identities as endangered and how we perceive threats to these identities The book clearly demonstrates that the conceptual basis for critical security studies requires an extended engagement with political theory and with the assumptions of the modern subject as progressive political agent Viewed thus on a global scale the environmental security discourse raises profoundly troubling political questions as to who we are and what kind of world we are collectively making in our efforts to be secure
