This book discusses the political and economic history and geography of Georgia the problems it has faced and how it has overcome and is still overcoming them In most countries at the end of the 20th century the successful resolution of social economic political demographic and ecological problems was largely dependent on effectively protecting the population and economic assets from natural disasters and on ensuring conditions for their sustainable development These problems are most acute in mountainous regions like Georgia where the unplanned development of natural ecosystems has had drastic consequences It is therefore necessary to understand not only the probability of changing conditions natural as well as political and demographic but also the probability of the resulting economic losses The book is divided into four sections historical and political geography geological processes ecological processes and developmental geography In the historical and political geography section the authors present a detailed discussion on ancient history historical and political geography ethnic groups and religions demographics and socio cultural geography The geological processes section contains information on geology geodynamical processes glacial and periglacial processes The ecological processes section examines a variety of landscapes and ecosystems aspects of deforestation reforestation and desertification along with anthropogenic impacts on the environment The developmental geography section looks at different economies natural resources sustainable development and climate change      **The Dental Register** ,1890
