A History of Seating,

3000 BC to 2000 AD Jenny Pynt, Joy Higgs, 2010 The focus of this book is on functional seating and the key argument presented is that functional seating needs to assist the person using it for the performance of seated tasks enhance rather than detract from the person's posture and health and it needs to provide aesthetic features that do not limit task or health The book spans the period 3000BC to 2000AD and presents largely Western seating This book is unique in its approach to seating because it draws together evidence that relates to seating that facilitates health and task while also addressing aesthetic factors This evidence creates an understanding of how seats may be designed to not only promote bodily health but also allow functional optimisation of sitting and seating This book is important to furniture and industrial designers interior decorators architects those teaching seat design health professionals attending and educating those who relax or work in the seated position furniture historians and members of the general public interested in the history of seating The Encyclopedia of Furniture Joseph Aronson, 1961-12-13 A completely revised edition covering every period and development to the present the designers and makers the woods and other materials the architecture and decoration 2 000 photographs Glossary Bibliography Index
