Geriatric Medicine, 1989 *Geriatric Medicine* Bradley S. Bender, George J. Caranasos, 1989 Pathy's Principles and Practice of Geriatric Medicine Alan J. Sinclair, John E. Morley, Bruno Vellas, 2012-03-13 This new edition of the comprehensive and renowned textbook *Principles and Practice of Geriatric Medicine* offers a fully revised and updated review of geriatric medicine. It covers the full spectrum of the subject, features 41 new chapters, and provides up-to-date evidence-based and practical information about the varied medical problems of ageing citizens. The three editors from UK, USA, and France have ensured that updated chapters provide a global perspective of geriatric medicine as well as reflect the changes in treatment options and medical conditions which have emerged since publication of the 4th edition in 2006. The book includes expanded sections on acute stroke, dementia, cardiovascular disease, and respiratory diseases, and features a new section on end-of-life care. In the tradition of previous editions, this all-encompassing text continues to be a must-have text for all clinicians who deal with older people, particularly geriatric medical specialists, gerontologists, researchers, and general practitioners. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store. Fundamentals of Geriatric Medicine Rainier P. Soriano, 2007-05-26 Prior to the evolution of modern medicine with its superabundance of diagnostic and therapeutic medical technology and the rise of the litigious society the value of clinical skills was evident in both history taking and the physical examination Even today physicians can make a correct diagnosis solely by utilizing their clinical skills in about 90% of patient encounters Furthermore in the past physicians understood their role as a psychologist and were more apt to be familiar with the social context of their patients House calls were common The doctor was also a placebo who at his best inspired hope and

probably sped recovery Geriatricians use both clinical skills and take advantage of modern technology sparingly for they know they are dealing with the most challenging and frail of patients older patients who so often present with multiple complex interacting behavioral social and physical problems In contrast to medicine for young people working with the older patient is much more demanding Furthermore the complex issue of societal attitudes toward old people can come into play especially the physician's need to deal with natural fears of aging dependency depression dementia and death Ageism is the enemy of effective medical treatment At its best geriatrics exemplifies ways that medical care for all ages can become more humane problem oriented and holistic
