German And Scandinavian Protestantism 1700 1918:

German and Scandinavian Protestantism 1700-1918 Nicholas Hope, 1999 The Pietist Impulse in Christianity G William Carlson, Christian T Collins Winn, Christopher Gehrz, Eric Holst, 2012-10-25 Pietism is a reform movement originating among German Lutherans in the 17th century. It focused on personal faith reacting against Lutheran Church's emphasis on doctrine and theology over Christian living. The movement quickly expanded exerting an enormous influence on various forms of Christianity and became concerned with social and educational matters. Indeed Pietists showed a strong interest in issues of social and ecclesial reform, the nature of history and historical inquiry, the shape and purpose of theology and theological education, the missional task of the church and social justice and political engagement. Though the movement remained largely misunderstood especially in Anglo American contexts, negative stereotypes depicted Pietism as a quietist and sectarian form of religion merely concerned with the pious soul and its God. The main proposal of the editors of this volume is to correct this misunderstanding assembling a deep collection of essays written by scholars from a variety of fields. This work demonstrates that Pietism was a movement characterized by great depth and originality. Besides they show the vitality and impulse of Pietism today and emphasize the ongoing relevance of the movement for contemporary problems and questions.

Bach in Berlin Celia Applegate, 2014-10-31 Bach's St Matthew Passion is universally acknowledged to be one of the world's supreme musical masterpieces yet in the years after Bach's death it was forgotten by all but a small number of his pupils and admirers. The public rediscovered it in 1829 when Felix Mendelssohn conducted the work before a glittering audience of Berlin artists and intellectuals, Prussian royals and civic notables. The concert soon became the stuff of legend sparking a revival of interest in and performance of Bach that has continued to this day. Mendelssohn's performance gave rise to the notion that recovering and performing Bach's music was somehow national work. In 1865 Wagner would claim that Bach embodied the history of the German spirit's inmost life. That the man most responsible for the revival of a masterwork of German Protestant culture was himself a converted Jew struck contemporaries as less remarkable than it does us today. A statement that embraces both the great achievements and the disasters of 150 years of German history. In this book Celia Applegate asks why this particular performance crystallized the hitherto inchoate notion that music was central to Germans' collective identity. She begins with a wonderfully readable reconstruction of the performance itself and then moves back in time to pull apart the various cultural strands that would come together that afternoon in the Singakademie. The author investigates the role played by intellectuals, journalists and amateur musicians; she is one herself in developing the notion that Germans were the people of music. Applegate assesses the impact on music's cultural place of the renewal of German Protestantism, historicism, the mania for collecting and restoring and romanticism. In her conclusion she looks at the subsequent careers of her protagonists and the lasting reverberations of the 1829 performance itself. **The First World War** Hew Strachan, 2003-02-06 This is the first truly definitive history of the First World War, the war that has done most to

shape the twentieth century The first generation of its historians had access to only a limited range of sources and their focus was primarily on military events More recent approaches have embraced cultural diplomatic economic and social history In Hew Strachan's authoritative and readable history these fresh perspectives are incorporated with the military and strategic narrative The result is an account that breaks the bounds of national preoccupations to become both global and comparative To Arms the first of three volumes in this magisterial study examines not only the causes of the war and its opening clashes on land and sea but also the ideas that underpinned it and the motivations of the people who supported it It provides full and pioneering accounts of the war's finances of the war in Africa and of the Central Powers bid to widen the war outside Europe

Theology and the University in Nineteenth-Century Germany Zachary Purvis, 2016-07-21 Theology and the University in Nineteenth Century Germany examines the dual transformation of institutions and ideas that led to the emergence of theology as science the paradigmatic project of modern theology associated with Friedrich Schleiermacher Beginning with earlier educational reforms across central Europe and especially following the upheavals of the Napoleonic period an impressive list of provocateurs iconoclasts and guardians of the old faith all confronted the nature of the university the organization of knowledge and the unity of theology's various parts quandaries which together bore the collective name of theological encyclopedia Schleiermacher's remarkably influential programme pioneered the structure and content of the theological curriculum and laid the groundwork for theology's historicization Zachary Purvis offers a comprehensive investigation of Schleiermacher's programme through the era's two predominant schools speculative theology and mediating theology Purvis highlights that the endeavour ultimately collapsed in the context of Wilhelmine Germany and the Weimar Republic beset by the rise of religious studies radical disciplinary specialization a crisis of historicism and the attacks of dialectical theology In short the project represented university theology par excellence Engaging in detail with these developments Purvis weaves the story of modern university theology into the broader tapestry of German and European intellectual culture with periodic comparisons to other national contexts In doing so he Purvis presents a substantially new way to understand the relationship between theology and the university both in nineteenth century Germany and indeed beyond

Chapman,2014-10-30 Oxford Berlin and Chicago were extraordinarily dynamic centres of theology during the nineteenth and early twentieth centuries However significant differences in the political climate and culture of each location bred strikingly divergent theological approaches in the universities of each city Mark Chapman offers a highly original exploration of the subjection of their theologies to the changes and developments of educational policy and national and international politics shedding light upon the constraints that such external factors have imposed upon the evolution of the discipline Chapman highlights the efforts of theologians and churchmen to relate the true core of Christianity a lived religion free of shibboleths to their rapidly changing world The opinions of conservative and liberal theologians are skilfully balanced to reveal the problems of critical history of political authority of increasing global awareness and of the need for social amelioration which profoundly shaped the ways in which theology was conceived during the period New ground has been broken in this interdisciplinary study of the social political and ecclesiastical contexts of Western theology This book will be invaluable to any reader interested in the use of theology as part of the wider quest for social integration and meaning in an increasingly fragmented society Modern Prussian History: 1830-1947 Philip G. Dwyer,2014-06-11 The rise of Prussia and subsequent

unification of Germany under Prussia was one of the most important events in modern European history However the fact that this unification was brought about as a result of the Prussian military has led to many misconceptions about the nature of Prussia and consequently of Germany which persist to this day This collection sets out to correct them Beginning in 1830 and finishing with the official dissolution of Prussia by the Allies in 1947 the book takes a broad approach chapters cover the conservatives and the monarchy industrialisation the transformation of the rural and urban environment the labour movement the tensions between Catholics and Protestants within the state and the debate about the links between Prussian militarism and the final tragedy of Nazi Germany By focusing on the social religious and political tensions that helped define the course of Prussian history the book also throws light on the development of modern German history **F D Maurice**

and the Crisis of Christian Authority Jeremy Morris, 2005-03-18 This book offers a reassessment of the theology of F D Maurice 1805-72 one of the most significant theologians of the modern Church of England It seeks to place Maurice's theology in the context of nineteenth century conflicts over the social role of the Church and over the truth of the Christian revelation Maurice is known today mostly for his seminal role in the formation of Christian Socialism and for his dismissal from his chair at King's College London over his denial of the doctrine of eternal punishment Drawing on the whole range of Maurice's extensive published work this book argues that his theology and his social and educational activity were held together above all by his commitment to a renewal of Anglican ecclesiology At a time when following the social upheavals of the French Revolution and the Industrial Revolution many of his contemporaries feared that the authority of the Christian Church and particularly of the Church of England was under threat Maurice sought to reinvigorate his Church's sense of mission by emphasizing its national responsibility and its theological inclusiveness In the process he pioneered a new appreciation of the diversity of Christian traditions that was to be of great importance for the Church of England's ecumenical commitment He also sought to limit the damage of internal Church division by promoting a view of the Church's comprehensiveness that acknowledged the complementary truth of convictions fiercely held by competing parties

Schleiermacher and Palmer Justin A. Davis, 2019-09-11 Twenty first century Protestantism is radically different from the Protestantism of the Reformation The challenges of modernity affected all aspects of Christianity and the more successful attempts to combat these challenges came about as a result of two rather different yet similar theologians in the nineteenth century This work provides an exhaustive look at Friedrich Schleiermacher the father of modern liberal Protestantism and Phoebe Palmer the mother of the Holiness movement The trend of liberalism is to strip away all but what is essential to Christian life while the Holiness movement sought to make all of life applicable to the Bible and God While these two movements may appear contradictory they are grounded in a shared source of experiential Protestantism commonly known as Pietism and develop their theological systems from this starting point This study includes not only their theologies but also biographies that introduce the reader to these two luminaries Liberalism and holiness as created by Schleiermacher and Palmer lay the foundation for Pentecostalism fundamentalism neo orthodoxy and the interdenominational movements of the nineteenth century Only from this vantage can we understand the modern Protestant mindset

A History of Lutheranism Eric W. Gritsch, In a clear nontechnical way this noted Reformation historian tells the story of how the nascent reforming and confessional movement sparked and led by Martin Luther survived its first battles with religious and political authorities to become institutionalized in its religious practices and teachings Gritsch then traces the emergence of genuine consensus at the end of the sixteenth century followed by the age of Lutheran Orthodoxy the great Pietist reaction Lutheranism's growing diversification during the Industrial Revolution its North American expansion and its increasingly global and ecumenical ventures in the last century

Handbook of Religious Culture in Nineteenth-Century Europe Anthony Steinhoff, Jeffrey Zalar, 2024-12-30 This handbook offers a guide to research on religious culture during Europe's long nineteenth century 1800-1914. Grounded in the latest theoretical approaches and in line with trends that have produced a religious turn in the study of modern Europe, the volume assesses the state of the field while making provocative recommendations for its enlargement. Unique and ambitious in its thematic breadth, it addresses the histories of all five of Europe's main religious traditions: Eastern Orthodox Christianity, Judaism, Islam, Protestantism, and Roman Catholicism, and brings these histories into comparative analysis. This analysis extends to a wide range of subjects: from popular belief and practice, education, and modern knowledge formation and the arts, to the intersections between religion and urbanization, civil society, and politics, and missions and imperialism. It also evaluates recent developments in work on religion vis-à-vis both gender and nationalism, while calling attention to newer research that proposes secularism as a form of belief in its own right. Presenting the scholarship of eighteen leaders in their respective fields, the volume explains why religion as a topic of research has moved from the periphery to the center of modern European historiography.
