German Armoured Cars Bryan Perrett,1982 *SdKfz 251 Half-Track 1939-45* Bruce Culver,2012-07-20 Following in the best traditions of German ingenuity in design and construction of armoured vehicles the SdKfz 251 firmly realised the concept of a competent cross country tactical vehicle for armoured infantry units So successful was this half track that not only did a modified version of it remain in use with Czech forces well into the 1980s but also ironically the armoured infantry tactics that the Germans pioneered with it were adopted by Allied forces in the Second World War and helped them to achieve the eventual defeat of Germany This book covers the genesis and development of the SdKfz 251 and details the numerous modifications and variations that sprang from combat experience **German Armoured Cars and**

Reconnaissance Half-Tracks 1939-45 Bryan Perrett,1999-09-01 Flexibility mobility and the ability to effectively communicate were all key requirements that the units operating armoured cars and reconnaissance half tracks demanded and that were also crucial to the Panzerwaffe and German Army as a whole Bryan Perrett s treatment of the development and history of German armoured cars and recce vehicles fully accounts for the crucial role that such units and more importantly their vehicles played during the course of World War II Full orders of battle are also given along with technical details and specifications of the vehicles assigned to particular units Scouts Out! The Development Of Reconnaissance Units In

Modern Armies [Illustrated Edition] John J. McGrath,2014-08-15 Illustrated with 60 maps plans and diagrams Reconnaissance and counter reconnaissance are battlefield missions as old as military history itself and missions for which many armies have created specialized units to perform In most cases these units were trained equipped and used differently from the majority of an army s fighting units Horse cavalry performed these missions for centuries for it had speed and mobility far in excess of main battle units Once the horse was replaced by mechanization however the mobility advantage once enjoyed by the horse cavalry disappeared Since the early 20th century the search for the proper mix of equipment the proper organization and the proper employment of reconnaissance units has bedeviled armies around the world This survey uses a diverse variety of historical cases to illustrate the enduring issues that surround the equipping organizing and employment of reconnaissance units It seems that these specialized units are either too heavily or too lightly equipped and too narrowly specialized or too conventionally organized Pre war reconnaissance doctrines tend to undergo significant change once fighting begins leading to post conflict analysis that reconnaissance units were misused in one way or another McGrath ends his study with an intriguing conclusion about the role that specialized reconnaissance units should have in the future that may surprise many readers **Soviet Armoured Cars 1936-45** Jamie Prenatt,2020-10-29 The armoured car

has an important place in the early history of Soviet armoured fighting vehicles AFVs they were the most important AFV during the Russian Civil War and figured prominently in the mechanization of the Red Army that began in late 1929 The 1930s saw the development and production of a wide variety of armoured cars which were used extensively in Soviet

Fallschirmjäger Bruce Quarrie, 2001-10-25 Few of the combatants of World War II have captured the imagination as compulsively as the Fallschirmjäger. Boldness and courage were vital characteristics in the rigorous selection process and their training was highly demanding. Hitler's airborne troops were involved in some of the most daring actions of the whole war from the 1940 assault on Eben Emael and the invasion of Crete in 1941 to the rescue of Mussolini and the attempt on Tito's life. In addition they saw service as elite line infantry in the key theatres of North West Europe, North Africa and the Eastern Front. This title looks at the life and experiences of the average Fallschirmjäger and includes first hand accounts from different theatres and periods of the war.
