Jones,Damien Mooney,2017-08-31 Creating an orthography is often seen as a key component of language revitalisation Encoding an endangered variety can enhance its status and prestige In speech communities that are fragmented dialectally or geographically a common writing system may help create a sense of unified identity or help keep a language alive by facilitating teaching and learning Despite clear advantages creating an orthography for an endangered language can also bring challenges and this volume debates the following critical questions whose task should this be that of the linguist or the speech community Should an orthography be maximally distanced from that of the

language of wider communication for ideological reasons or should its main principles coincide for reasons of learnability Which local variety should be selected as the basis of a common script Is a multilectal script preferable to a standardised orthography And can creating an orthography create problems for existing native speakers *Our Lives – Our Stories* Roland Pfau, Asli Göksel, Jana Hosemann, 2021-01-18 Sign languages are non written languages Given that the use of digital media and video recordings in documenting sign languages started only some 30 years ago the life stories of Deaf elderly signers born in the 1930s 1940s have except for a few scattered fragments in film not been documented and are therefore under serious threat of being lost The chapters compiled in this volume document important aspects of past and present experiences of elderly Deaf signers across Europe as well as in Israel and the United States Issues addressed include i historical events and how they were experienced by Deaf people ii issues of identity and independence iii aspects of language change iv experiences of suppression and discrimination The stories shared by elderly signers reveal intriguing yet hidden aspects of Deaf life On the negative side these include experiences of the Deaf in Nazi Germany and occupied countries and harsh practices in educational settings to name a few On the positive side there are stories of resilience and vivid memories of school years and social and professional life In this way the volume contributes in a significant way to the preservation of the cultural and linguistic heritage of Deaf communities and sheds light on lesser known aspects against an otherwise familiar background This publication has been made possible within the SIGN HUB project which has received funding from the European Union s Horizon 2020 research and innovation programme *From Bayreuth to Burkina Faso* Sarah Hegenbart ,2022-11-30 Opera Village Africa a participatory art experiment by the late German multimedia artist Christoph Schlingensief serves as a testing ground for a critical interrogation of Richard Wagner s notion of the Gesamtkunstwerk Sarah Hegenbart traces the path from Wagner s introduction of the Gesamtkunstwerk in Bayreuth to Schlingensief s attempt to charge the idea of the total artwork with new meaning by transposing it to the West African country Burkina Faso Schlingensief developed Opera Village in collaboration with the world renowned architect Francis K r This final project of Schlingensief is inspired by and illuminates the diverse themes that informed his artistic practice including coming to terms with the German past anti Semitism critical race theory and questions of postcolonial self criticism *From Bayreuth to Burkina Faso* introduces the notion of the postcolonial Gesamtkunstwerk to disrupt the Eurocentric perspective on art history exploring how the socio political force of a postcolonial Gesamtkunstwerk could affect processes of transcultural identity construction It reveals how Schlingensief translocated the Wagnerian concept to Burkina Faso to address German colonial history and engage with it from the perspective of multidirectional memory cultures *A Treasury of German Trademarks: 1925-1950* ,1982
