February 1916 the German Army launched a major attack on the French fortress of Verdun The Germans were confident that the ensuing battle would compel France to expend its strategic reserves in a savage attritional battle thereby wearing down Allied fighting power on the Western Front However initial German success in capturing a key early objective Fort Douaumont was swiftly stemmed by the French defences despite heavy French casualties The Germans then switched objectives but made slow progress towards their goals by July the battle had become a stalemate During the protracted struggle for Verdun the two sides infantrymen faced appalling battlefield conditions their training equipment and doctrine would be tested to the limit and beyond New technologies including flamethrowers hand grenades trench mortars and more mobile machine guns would play a key role in the hands of infantry specialists thrown into the developing battle and innovations in combat communications were employed to overcome the confusion of the battlefield This study outlines the two sides wider approach to the evolving battle before assessing the preparations and combat record of the French and German fighting men who fought one another during three pivotal moments of the 101 2 month struggle for Verdun

The Dynamics of Military Revolution, 1300-2050 MacGregor Knox, Williamson Murray, 2001-08-27 The Dynamics of Military Revolution aims to bridge a major gap in the emerging literature on revolutions in military affairs suggesting that there have been two very different phenomena at work over the past centuries military revolutions which are driven by vast social and political changes and revolutions in military affairs which military institutions have directed although usually with great difficulty and ambiguous results By providing both a conceptual framework and a historical context for thinking about revolutionary changes in military affairs the work establishes a baseline for understanding the patterns of change innovation and adaptation that have marked war in the Western World since the thirteenth century beginning with Edward III s revolutionary changes in medieval warfare through the development of modern Western military institutions in seventeenth century France to the cataclysmic changes of the First World War and the German Blitzkrieg victories of 1940 This history provides a guide for thinking about military revolutions in the coming century which are as inevitable as they are difficult to predict

No Place to Run Tim Cook, 2011-11-01 Historians of the First World War have often dismissed the important role of poison gas in the battles of the Western Front In No Place to Run however Tim Cook shows that the serious threat of gas did not disappear with the introduction of gas masks By 1918 gas shells were used by all armies to deluge the battlefield and those not instructed with a sound anti gas doctrine left themselves exposed to this new chemical plague Cook uses fascinating primary sources diaries letters reminiscences published memoirs and the official archival record to illustrate the horror of gas warfare for the average trench soldier As the first chlorine clouds rolled across the fields during the 2nd Battle of Ypres soldiers were forced to stuff urine soaked handkerchiefs in their mouths in order to survive As the gas war evolved mustard gas plagued the soldiers at the front as it lay active in mud and snow for weeks on end There was no escape from the pervasive nature of poison gas Entering the dug outs it attacked men when they were least ready In response the Canadian Corps had to develop an anti gas doctrine a process that Cook describes in full No Place to Run provides a challenging re examination of the function of gas warfare in the First World War including its important role in delivering victory in the campaign of 1918 and its curious postwar legacy It will be of interest both to historians and military buffs
