Semitism this book bridges the gap between two seemingly unrelated topics     Britain, 1846-1964 Martin Roberts, 2001 The aim of this book is to explain how Britain's circumstances changed between 1846-1964 Britain in 1846 was by far the richest nation in the world In 1964 Britain was comparatively much less rich than the USA and though amongst the world's richest nations was losing ground to Japan and to Western Europe Because of her wealth and her navy Britain in 1846 was the most powerful nation in the world Britain in 1964 was dwarfed by the superpowers of the USA and the USSR The British Empire of the 1840s reflected Britain's power By 1964 the Empire was collapsing Only one in five men and no women could vote in the Britain of 1840s By 1964 Britain was fully democratic with all adults entitled to vote In a period of a little over a century these were some of the changes to which Britain had to adapt It was a period that marked a substantial fall in Britain's comparative power and prosperity in the world     **War, Nation, Memory** Keith A. Crawford, Stuart J. Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1.7 billion people or three quarters of the world's population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instil in the young a sense of national pride common identity and shared collective memory To understand this process War Nation Memory describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present     **The Progressive Revolution** Ellis Washington, 2016-12-13 His tenth book The Progressive Revolution Volume V continues his legal historical and literary series based on Natural Law Natural Rights and the original political philosophy of the constitutional Framers and original jurisprudence of the U.S. Supreme Court Washington systematically chronicles both the historical significance and political deconstruction that the Progressive Revolution or the Progressive Age circa 1860 present has perpetrated against Western Civilization and American society even to this day These volumes are a collection of selected essays articles and Socratic dialogues from Washington's weekly columns published in RenewAmerica.com an essential news and opinion website of primarily conservative writers and ideas This opus Volume V 2014-15 Writings which rather than being arranged chronologically by date are organized topically according to their subject matter of 16 intellectual disciplines including Law Politics Foreign Policy Philosophy Aesthetics the Academy Religion Economics Science Medicine Math
