Ecology Control and Economic Development in East African History Helge Kjekshus, 2023-11-15 Ecology Control and Economic Development in East African History The Case of Tanganyika 1850 1950 explores a significant shift in East African historiography particularly with the move toward political independence This change has prompted a re examination of the African past with an emphasis on reclaiming African agency rejecting colonial era interpretations that focused predominantly on European actions Scholars like Oliver Mathew Kimambo and Temu have led the way in this new wave of historiography arguing that the African past was dynamic and that Africans were active agents in shaping their history particularly in the face of crises such as intertribal warfare and colonial incursions However this study seeks to go beyond political history and traditional frameworks shifting the focus to the ecological and economic systems that shaped African life in the 19th century The book argues that pre colonial East Africans were not merely responding defensively to external crises but were actively engaged in managing their environment and developing their economy Through ecological control such as agricultural and pastoral practices East Africans maintained a sustainable relationship with their land even in the face of challenges like the tsetse fly and the disruptions caused by intertribal conflict This study challenges the prevailing notion that East Africa was economically underdeveloped due to shifting cultivation and warfare Instead it highlights the prosperous agricultural and cattle economies that were able to thrive despite these challenges By examining the economic activities such as agriculture iron smelting and trade the study demonstrates the region's economic vibrancy and the agency of its people in controlling their environment and developing a complex economic system Through this approach the study calls for a reimagined understanding of East African history that emphasizes the active role of its peoples in shaping their destiny This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1977

Ecology Control & Economic Development in East African History Helge Kjekshus, 1996 *The Changing Face of Land and Conservation in Post-colonial Africa* George Barrett, Shirley Brooks, Jenny Josefsson, Nqobile Zulu, 2016-03-22 The year 2013 marked the 100th anniversary of the 1913 Land Act in South Africa which legalised the violent dispossession and alienation of the African majority from the land It is common cause that the alienation of land for conservation purposes

introduced to Africa under colonial rule has continued more or less uninterrupted until today. However, while nature conservation practices inevitably raise challenging questions relating to land and land use, there has thus far been little concentrated effort to bring together scholars working on the land question, particularly around issues of land tenure, with those whose work focuses on questions of nature construction and the social impacts of conservation in an African context. Compiled from research presented at a ground-breaking interdisciplinary conference held at Rhodes University in Grahamstown, South Africa, in 2012, the chapters in this book made their first appearance in a special issue of the *Journal of Contemporary African Studies* (JCAS) in July 2013. The book brings critical interdisciplinary analyses of the complex interrelations between contemporary neoliberal conservation practices in post-colonial Africa into conversation with the well-trodden territory of land use and contested land issues on the continent. Anchored by an intellectual curiosity about the extent to which past practices continue into the present and with what consequences, the book provides fresh insights into the complex relationship between land and conservation in contemporary Africa.

Memories of German Colonialism in Tanzania
 Reginald Elias Kirey, 2023-08-21
 German colonial history in today Tanzania Mainland is extensively documented but it has not been studied from its memory perspective despite it being widely remembered among the Tanzanians. This book documents German colonial memories as shared cultural legacy that exists in forms of monuments, archives and historical sites. It also presents them as trans-generational memory narratives that live in people's memories that are also commemorated in different ways like erection of war monuments. The book analyzes memories of colonialism from the historical perspective showing how the collective memories like monuments and commemorations have undergone structural and institutional changes over time. The study uses Michael Rothberg's multi-directional theory together with other theoretical approaches to analyze various forms of German colonial memories in Tanzanian context. The findings, which are analyzed historically, indicate that the collective memories of the Germans are cultural, communicative, commemorative, functional and topographical. They are also traumatic as well as nostalgic.

Mononegaviruses of Veterinary Importance
 Muhammad Munir, 2016-12-16
 The Mononegavirales is an order of viruses affecting large, small and marine animals and is responsible for diseases including Rinderpest, Rabies and Ebola. This book discusses the epidemiology and control of Mononegaviruses that pose a significant threat to animals in terms of severity and epidemiological risk. The book also addresses viruses with zoonotic potential and many that can be used as models in the study of infectious disease. With its comprehensive coverage, each chapter is dedicated to a different disease and has been authored by renowned scientists who have made seminal contributions to the field. This prestige reference work is arranged over two volumes: volume 1 pathobiology and molecular diagnosis and volume 2 molecular epidemiology and control. This broad-ranging text covers mononegaviral diseases of livestock, horses, dogs and cats as well as rodents, primates, fish and marine mammals and will be a valuable reference source for virologists, field veterinarians, infection and molecular biologists as well as
