James M. Skibo, 2012-08-15 The 1992 publication of Pottery Function brought together the ethnographic study of the Kalinga and developed a method and theory for how pottery was actually used Since then there have been considerable advances in understanding how pottery was actually used particularly in the area of residue analysis abrasion and sooting carbonization At the 20th anniversary of the book it is time to assess what has been done and learned One of the concerns of those working in pottery analysis is that they are unsure how to do use alteration analysis on their collection Another common concern is understanding intended pottery function the connections between technical choices and function This book is designed to answer these questions using case studies from the author and his colleagues for applying use alteration analysis to infer actual pottery function The focus of Understanding Pottery Function is on how practicing archaeologists can infer function from their ceramic collection      Prehistoric Britain Ann Woodward, J. D. Hill, 2017-01-31 Pottery has become one of the major categories of artifact that is used in reconstructing the lives and habits of prehistoric people In these 14 papers members of the Prehistoric Ceramics Research Group discuss the many ways in which pottery is used to study chronology behavioral changes interrelationships between people and between people and their environment technology and production exchange settlement organization cultural expression style and symbolism      The Rise of Metallurgy in Eurasia Miljana Radivojević, Benjamin Roberts, Miroslav Marić, Julka Kuzmanović-Cvetković, Thilo Rehren, 2021-12-23 The Rise of Metallurgy in Eurasia is a landmark study in the evolution of early metallurgy in the Balkans It demonstrates that far from being a rare and elite practice the earliest metallurgy in the world was a common and communal craft activity      **Ancient Psychoactive Substances** Scott M. cultures and highlight the ways they evolved from being sacred to recreational in more modern times By analyzing evidence of these substances across a diverse range of ancient cultures the contributors explore how and why past civilizations harvested manufactured and consumed drugs Case studies examine the use of stimulants narcotics and depressants by hunter gatherers who roamed Africa and Eurasia prehistoric communities in North and South America and Maya kings and queens Offering perspectives from many different fields of study contributors illustrate the wide variety of sources and techniques that can provide information about materials that are often invisible to archaeologists They use advanced biomolecular procedures to identify alkaloids and resins on cups pipes and other artifacts They interpret paintings on vases and discuss excavations of breweries and similar sites Uncovering signs of drugs including ayahuasca peyote ephedra cannabis tobacco yaupon vilca and maize and molle beer they explain how psychoactive substances were integral to interpersonal relationships religious practices and social cohesion in antiquity Scott M Fitzpatrick professor of archaeology at the University of Oregon is coeditor of *Island Shores Distant Past Archaeological and Biological Approaches to the Pre Columbian Settlement of the Caribbean* Contributors Quetta Kaye Victor D Thompson Thomas J Pluckhahn Sean Rafferty Mark Merlin Matt Sayre Constantino Manuel Torres Zuzana Chovanec Jennifer A Loughmiller Newman Justin Jennings Daniel M Seinfeld Shannon Tushingham Scott M Fitzpatrick *Archaeology in Environment and Technology* David Frankel, Susan Lawrence, Jennifer Webb, 2013-05-02 Environments landscapes and ecological systems are often seen as fundamental by archaeologists but how they relate to society is understood in very different ways The chapters in this book take environment culture and technology together All have been the focus of much attention often one or other has been seen as the starting point for analysis but this volume argues that it is the study of the inter relationships between these three factors that offers a way forward The contributions to this book pick up different strands within the tangled web of intersections between environment technology and society providing a series of case studies which explore facets of this common theme in different settings and circumstances and from different perspectives As well as addressing themes of theoretical and methodological interest these case studies draw on primary research dealing with time periods from the late Pleistocene glacial maximum to the very recent past and involve societies of very different types Running through all the contributions however is a concern with the archaeological record and the ways in which scales of observation and availability of evidence affect the development of questions and explanations The diversity of the chapters in this volume demonstrates the inherent weakness in any attempt to prioritise environment technology or society These three factors are all embedded in any human activity as change in one will result in change in the others social and technical changes alter relations with the environment and indeed the environment itself and as environmental change drives changes in society and technology As this book shows it is possible to consider the relationship between the three factors from different perspectives but any attempt to consider one or even two in isolation will mean that valuable insights will be missed **Anthropological**

**Perspectives on Technology** Michael B. Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana [An Anthropology of Things](#)

Rothman, 2017-03-07T00:00:00+01:00 The Kura Araxes a cultural tradition of the late 4th and 3rd millennia BC has recently become a focus of international archaeological research It was first discovered in the mountains of the Taurus and the South Caucasus From near the beginning of the tradition evidence suggests that populations bearing some of its hallmarks black burnished handmade pottery and a ritual of the hearth spread out over a wide region of the Taurus Zagros and Caucasus Mountains and as far south as the area of the Sea of Galilee in the southern Levant Recent research has questioned whether the simple narrative of a discreet homeland and unassimilated migrants fairly describes the ancient reality One of the key dependent variables used to trace the prehistory of the Kura Araxes cultural tradition is pottery This article discusses the cultural meaning and interpretive use of pottery but also the limits of pottery style alone to reconstruct prehistory It adds

previously unpublished material from Veli Sevin's surveys in Malatya and Elaz provinces to the larger database for study of the Kura Araxes Materiality, Techniques and Society in Pottery Production Daniel Albero Santacreu, 2014-01-01 Daniel Albero Santacreu presents a wide overview of certain aspects of the pottery analysis and summarizes most of the methodological and theoretical information currently applied in archaeology in order to develop wide and deep analysis of ceramic pastes. The book provides an adequate framework for understanding the way pottery production is organised and clarifies the meaning and role of the pottery in archaeological and traditional societies. The goal of this book is to encourage reflection especially by those researchers who face the analysis of ceramics for the first time by providing a background for the generation of their own research and to formulate their own questions depending on their concerns and interests. The three-part structure of the book allows readers to move easily from the analysis of the reality and ceramic material culture to the world of the ideas and theories and to develop a dialogue between data and their interpretation. Daniel Albero Santacreu is a Lecturer Assistant in the University of the Balearic Islands, member of the Research Group Arqueo UIB and the Ceramic Petrology Group. He has carried out the analysis of ceramics from several prehistoric societies placed in the Western Mediterranean as well as the study of handmade pottery from contemporary ethnic groups in Northeast Ghana. **Origini - XXXVI** Lorna Anguilano, Francesca Balossi Restelli, Baruch Brandl, Salvatore Chilardi, Geoff Emberling, Maria Carmela Gatto, Enrico Giannitrapani, Filippo Ianni, Sara T. Ethnographic and archaeological records feature a rich body of data suggesting that understandings of the mineral world are in fact both culturally variable and highly diverse *Soils Stones and Symbols* highlights studies from the fields of anthropology archaeology and philosophy that demonstrate that not all individuals and societies view minerals as commodities to be exploited for economic gain or as passive objects of disembodied scientific enquiry In visiting such diverse contexts as contemporary India colonial period Australia and prehistoric Europe and the Americas the papers in this volume demonstrate that in pre industrial societies minerals are often symbolically meaningful ritually powerful and deeply interwoven into not just economic and material but also social cosmological mythical spiritual and philosophical aspects of life In addressing the theme of the mineral world this book is not only unique within the social and geo sciences but also at the forefront of recent attempts to demonstrate the importance of materiality to processes of human cognition and sociality It draws upon theoretical developments relating to meaning experience the body and material culture to demonstrate that studies of rock art landscapes architecture technology and resource use are all linked through the minerals that constantly surround us and are the focus of our never ending attempts to understand and transform them
