*Oil and the political economy in the Middle East* Martin Beck, Thomas Richter, 2021-08-17 The downhill slide in the global price of crude oil which started mid 2014 had major repercussions across the Middle East for net oil exporters as well as importers closely connected to the oil producing countries from the Gulf Following the Arab uprisings of 2010 and 2011 the oil price decline represented a second major shock for the region in the early twenty first century one that has continued to impose constraints but also provided opportunities Offering the first comprehensive analysis of the Middle Eastern political economy in response to the 2014 oil price decline this book connects oil market dynamics with an understanding of socio political changes Inspired by rentierism the contributors present original studies on Bahrain Egypt Jordan Kuwait Lebanon Oman Qatar Saudi Arabia and the United Arab Emirates The studies reveal a large diversity of country specific policy adjustment strategies from the migrant workers in the Arab Gulf who lost out in the post 2014 period but were incapable of repelling burdensome adjustment policies to Egypt Jordan and Lebanon who have never been able to fulfil the expectation that they could benefit from the 2014 oil price decline With timely contributions on the COVID 19 induced oil price crash in 2020 this collection signifies that rentierism still prevails with regard to both empirical dynamics in the Middle East and academic discussions on its political economy

**Economic Development in the Middle East** Rodney Wilson, 2021-09-23 This new edition examines how development in the Middle East is being influenced by global economic change This comparative textbook focuses on the region's strengths and highlights development success especially in the Gulf Turkey and Israel The major structural changes in the economies of the Middle East are analysed and current employment challenges are discussed The impact of demographic changes is considered notably the dramatic decline in birth rates which will have implications for future employment The contribution of banks and capital markets to the region's development is appraised including that of Islamic financial institutions which play a prominent role in the Gulf Cooperation Council GCC countries but

are on the margins of the financial systems elsewhere Historically development in the GCC was linked to oil and gas production and prices a key issue being whether these are being decoupled as economies diversify and become more self sustaining The evidence on this from the GCC is encouraging with transparent and accountable financial management and major improvements in economic governance despite the lack of democracy Examining the drivers of economic development in the Middle East in a regional and global context this fully updated textbook is a key resource for students and academics interested in economic development and the political economy of the Middle East Monographic Series Library of Congress,1979 Report of the Special Study Mission to the Near East Comprising Representative Edward R.
