Economic Modernization Of Spain 1830 1930 Pb:

The Foundations of Civil War Francisco J. Romero Salvado, 2016-04-29 This book analyzes the decay of Liberal politics in Spain as the regional version of the general crisis that engulfed most of Europe between 1916 and 1923 Romero enriches the important wider debate about this watershed period of European history when in the face of unprecedented mass social protest and political mobilization incumbent governing elites struggled to find a valid formula of social containment in the dawning of mass politics which also saw the spread of the radical new doctrines of Bolshevism and Fascism Above all this book examines Spain's crisis of modernization a process marked by complex social and political realignments through which the nature of civil society was profoundly altered It resulted in an unprecedented spiral of violence and a polarization that firstly led to an authoritarian formula of social control in 1923 and ultimately to the outbreak of civil war in 1936 **The**

Economic Modernization of Spain, 1830-1930 Nicolás Sánchez-Albornoz, 1987-01-01 *The Economic Modernization of Spain, 1830-1930* Nicolás Sánchez-Albornoz, 1987 Those readers with some understanding of how the world economy has radically changed since the Industrial Revolution will probably find that a great deal of their information will most likely be based on how the leading economies performed during the process of change In the tightening network of global economic interdependence it can also be important to be aware of the steps taken by smaller and initially less successful nations as they moved toward modernization even when their arrival at full industrial transformation has been somewhat late book that was first presented by historians meeting to discuss the structural transformation of the Spanish economy during the past two centuries The approach is twofold first along lines of major economic sectors and then according to major regions

Historical Turning Points in Spanish Economic Growth and Development, 1808-2008 Concha Betrán, Maria A. Pons, 2020-06-27 This book analyses the main historical turning points in the Spanish economy and the related challenges it faced It focuses on six turning points that changed the direction of the Spanish economy and identifies the economic social or political origin of these watersheds It also compares the Spanish trajectory with the international one exploring the macroeconomic context in which these turning points happened as well as the external and internal constraints on domestic political choices for a small country like Spain The book focuses on how Spain faced up to each turning point the reforms that were implemented the differences between the Spanish response and that of other countries the results of the policies enacted and what problems were not tackled This is an interesting and unique perspective as most of the turning points in economic history are generally studied from the viewpoint of core countries such as the UK US or Germany The ultimate objective is to learn useful lessons from Spanish economic history in order to better face future turning points **Economic**

Tafunell,2021-02-22 This book provides a rigorously chronological journey through the economic history of modern Spain always with an eye opened to what happens in the international economy and a focus on economic policy making and institutional change It shows the central theme of the Spanish economy from the late 18th century to the early 21st century is the painful transformation from being a major imperial power to a small nation and later a member of the European Community and a player in a globalized economy It looks in detail at two major issues economic growth and convergence or divergence to the Western European pattern and the permanent tension between the two when assessing historical experience since the industrial revolution This book proposes new visions of the economic past of Spain and provides comparisons over time and space which will be of interest to academics and students of economic history European economic history and more specifically Spanish economic history **Economic Development, Female Wages and Missing Female Births in Spain, 1900-1930** Rebeca Echávarri-Aguinaga,Francisco J. Beltrán Tapia,2022

Focusing on the years between 1900 and 1930 a period characterised by significant structural transformations and rapid economic growth this article shows that Spain exhibited abnormally high sex ratios at birth SRB at least until the 1920s Apart from ruling out the possibility that female under registration and different mortality environments solely explain the results reported here the analysis of regional information indicates that SRB were higher in those provinces whose economic structure was dominated by agriculture and manufacturing relative to the service sector In addition during the First World War period which arguably subjected the Spanish economy to an exogenous demand shock increased wages resulted in decreases in SRB in those province years that reported male and female wages Importantly the protective role of female wages was twice as large as that of males Likewise in those provinces that published male but not female wages increases in male wages had the opposite effect and increased the SRB thus further supporting the link between relative labour returns and female neglect around birth As expected the relationship between wages and SRB vanished during the 20s along with the bias in SRB These results stress that gender discrimination around birth does not necessarily vanishes with economic growth unless this process is not accompanied by expanding labour opportunities for women **The Mesta** Julius Klein,1920

Of the many economic problems brought forth by the war two stimulated especial interest and have already been made the subject of considerable research One of these is the national control of raw materials and the other the economic foundations of newly organized states It may not be altogether inopportune therefore at a time when so much thought is being given to these fundamental matters to invite attention to the same questions as they appeared in another age and under far different circumstances Spanish merino wool was for generations one of the great staples of commerce during the period when modern Europe was in the making The history of the Honorable Assembly of the Mesta the Castilian sheep raisers gild presents a vivid picture of some six hundred years of laborious effort on the part of one of the great European powers to dominate the production and marketing of that essential raw material This policy though primarily concerned with the agrarian affairs of the realm had nevertheless a far wider significance because of its part in the mercantilistic ambitions of the greatest of the Castilian monarchs The high unit value of wool its compact exportable form and the universal demand for it made it one of the most valued means for determining the relative status of rival monarchies As a factor in the laying of the foundations of the Castilian state which rose from the ruins of the Reconquest the Mesta played an inconspicuous but important part It was used by each of the stronger sovereigns in turn to carry on a prolonged struggle against the ancient traditions of Spanish separatism political racial and economic provincialism and to work toward a united peninsula Its rise synchronized with the successful efforts of the warrior monarchs of the Reconquest to weld their newly won dominions into a nation Its decline began with the collapse of the monarchy and the triumph of separatist influences under the seventeenth century Hapsburgs

Spanish Economics in the Sixteenth Century Alexander Gallardo, 2002-12

Modern economics is generally credited to Adam Smith and his *Wealth of Nations* written in 1776 His economic theories still influence us today Yet Smith was influenced by the economic theories of sixteenth century Spain In particular the school of economics known as the School of Salamanca Further this work shows how the great influx of gold and silver coming into Spain from the New World affected not only Spain but all of Europe The Spanish government struggled to control inflation and the struggling Spanish economy All the while Spain tried to control not only the New World but also half of Europe oppose the Reformation and hold back the threat of the advancing Islamic Ottoman Empire Considering the economic stagnation of our times the problems in the Middle East and our strained relationship with various European countries this work offers insight into understanding these concerns
