Welfare futures Nicholas Deakin, Catherine Jones Finer, Bob Matthews, 2004 **Remaking New Zealand and Australian Economic Policy** Shaun Goldfinch, 2000 During the 1980s and early 1990s both Australia and New Zealand extensively deregulated their economies moving to become amongst the most liberal economies in the OECD Shaun Goldfinch interviewed more than 180 leading policy makers in Australia and New Zealand including former prime ministers ministers of finance treasurers public servants and other policy elites and examined primary government sources to demonstrate the reasons and processes involved in this remarkable period of economic reform This major comparative study sheds new light on economic policy making and change including the role of economic ideas and the importance of institutions and policy communities It contrasts the crash through approach that characterised reform in New Zealand with the bargained consensus that underpinned changes in Australia Finally it asks the critical question Has the New Zealand approach to policy change delivered better policy outcomes *After Neoliberalism* John Quiggin, 2024-07-30 Since the early 1980s Australian economic policy has been dominated by the ideology of neoliberalism also known as economic rationalism including policies of privatisation financial deregulation and micro economic reform Throughout this period John Quiggin has presented critical assessments of neoliberal policies and the claims about productivity growth made in support of those policies The credibility

of neoliberalism was fatally wounded by the Global Financial Crisis and its aftermath Nevertheless market ideology has lumbered on in zombie form for want of a clear alternative It is only recently that we have begun to reverse the failed policies of privatisation and deregulation and to consider radical alternatives such as a shift to a four day week This book provides a historical perspective in the form of a series of articles written from the mid 1980s to the present day It concludes with some suggestions for the way forward after neoliberalism John Quiggin is the intellectual equivalent of a dazzling fireworks display I walk away from every encounter with a bright new insight and this book is no exception Agree or disagree Professor Quiggin is a veritable trove of fresh insights Spanning nearly four decades this volume brings together some of Professor Quiggin s most provocative contributions driven by a deep commitment to equity It will pique your curiosity and encourage you to work towards a better world Andrew Leigh Parliamentarian and author of *The Shortest History of Economics*

Schooling Reform In Hard Times Bob Lingard, John Knight, Paige Porter, 2003-09-02

Based on research carried out under Labour governments throughout the 1990s in Western Australia, the authors consider the social, political, and economic conditions under which policy is formulated, understood, and enacted. They look at how the state structure affects the content and nature of policy statements and provide an outline of the history of policy developments and point to future possibilities and probabilities. Outcomes within funding ceilings, accountability frameworks, and national guidelines are but some of the changes referred to. The emergence of competency-based standards in education and training in schools, workplaces, and the professions is evident throughout Australia at state level, but the concern is whether issues of education should be played out within the state and outside civil society. The authors argue for the mediation in implementation of policy rather than a lambasting of policy formulation and implementation. This text is intended for heads of education departments, PGCE, BEd, MEd students, and researchers interested in education policy and planning. Education policymakers and educational historians.
