Michael H. Goldman,1968 **Political Competition, Economic Reform and Growth** Ivan Pavletic,2010 Which political and institutional factors trigger reforms that enable the poor to benefit from the process of economic growth How can the incentives of policy makers be influenced in order to achieve such a dynamic These are the questions this study seeks to address by examining the transition process in post communist countries The author argues that political competition within

an accepted and respected institutional environment has been a driving force in shaping the direction and success of transition reforms Evidence shows that in countries with a sufficient degree of political competition citizens responded to economic crises by calling for economic liberalization Economic liberalization removed existing distortions increased economic efficiency and raised public welfare This activated a dynamic self enforcing reform process that also strengthened the political and economic power of the poor In the absence of political competition such a process failed to emerge thereby contributing to the persistence of poverty Based on these findings there is good reason to postulate that some level of political competition is essential for transition reforms to improve economic efficiency and public welfare in a sustainable manner

**Enterprise Guidance in Eastern Europe** David Granick,2015-03-08 The sixties were a decade of major reform in the guidance of industry in the socialist countries of Eastern Europe In this comparative study of industrial management the different directions taken by reform in the German Democratic Republic Hungary and Yugoslavia are examined against the pattern shown by Romania a country in which no significant reform has occurred The author focuses on the methods used to coordinate enterprises in the early 1970s The book is the product of a remarkable opportunity eleven months of interviews in the four countries Those interviewed were mainly middle and upper managers of enterprises but also include officials of ministries planning commissions banks trade unions and national Communist parties The resulting data made possible new interpretations of enterprise management in Eastern Europe Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase

Cooperation between East and West Friedrich Levick,Jan Stankovsky,2017-09-08 This title was first published in 1979 A number of valuable and interesting publications have appeared in the last few years on East West cooperation These studies which by means of interviews and direct contacts with the firms concerned have shed some light on a subject that in the past had remained little known also provided us with extremely valuable incentives Most of these studies dealt only with individual aspects of cooperation particularly the legal and microeconomic aspects The quantitative data used however did not easily lend themselves to comparison Eastern European studies more often contained the views of the respective governments than the experiences of enterprises involved in cooperative undertakings In this book the authors have attempted to provide a unified picture of the most important problems of East West cooperation The motivations and goals of those concerned in all their microeconomic macroeconomic commercial and political aspects are brought together with the pertinent legal and institutional factors and are analyzed
