Newnham,2009-03-02 Whether economic sanctions work at all and how they work if they do are questions that have long been debated by scholars of international relations Using a new analytic approach which distinguishes between positive and negative sanctions and between specific and general sanctions this book aims both to demonstrate the importance of economic linkage and to explain the variety of forms it can take *Deutsche Mark Diplomacy* draws support for its theoretical arguments from a careful study of Germany s efforts to gain political leverage over Russia via economic means from 1870 into the 1990s Focusing on two major powers over a long period during which regimes changed and issues varied Randall Newnham finds strong evidence to show that positive forms of linkage such as foreign aid and trade or credit incentives are more effective than negative types such as embargoes His book significantly expands our understanding of the role played by economic sanctions in international politics at the same time that it offers a more systematic way of explaining German foreign policy *Sanctions as Economic Statecraft* S. Art, 2013-02-15 The United States today is the most powerful nation in the world perhaps even stronger than Rome was during its heyday It is likely to remain the world's preeminent power for at least several decades to come What behavior is appropriate for such a powerful state To answer this question Robert J Art concentrates on grand strategy the deployment of military power in both peace and war to support foreign policy goals He first defines America's contemporary national interests and the specific threats they face then identifies seven grand strategies that the United States might contemplate examining each in relation to America's interests The seven are dominion forcibly trying to remake the world in America's own image global collective security attempting to keep the peace everywhere regional collective security confining peacekeeping efforts to Europe cooperative security seeking to reduce the occurrence of war by limiting other states offensive capabilities isolationism withdrawing from all military involvement beyond U S borders containment holding the line against aggressor states and selective engagement choosing to prevent or to become involved only in those conflicts that pose a threat to the country's long term interests Art makes a strong case for selective engagement as the most desirable strategy for contemporary America It is the one that seeks to forestall dangers not simply react to them that is politically viable at home and abroad and that protects all U S interests both essential and desirable Art concludes that selective engagement is not a strategy for all times but it is the best grand strategy for these times
