Developing a dialogue between historians and economists is a crucially important task if we are to improve our understanding of the past. Economists have the tools to be able to provide in depth analysis the historians have the meat and substance which is necessary and a blending of the two is terribly important. Economics and the Historian is a valuable resource for this interchange. Nobel Laureate Douglass C North author of *Institutions Institutional Change and Economic Performance*. This is a superlative collection of essays for historians who would like to learn about economic history but lack much formal training in mathematics and economic theory. The essays present fundamental concepts of economic analysis in a clear and concise manner and they show how these concepts can be applied to a variety of historical problems. Ted W Margadant author of *Urban Rivalries in the French Revolution*. This book is must reading for historians who want to know what there is in economics that might be useful for their fields. Nobel Laureate Robert W Fogel author of *Time on the Cross*. Introduces historians and history students to the concepts models and logic of economic theory and shows how economic analysis can be applied to solving historical puzzles and problems. Each of the essays illuminates a different subfield of economics with numerous examples drawn from a quarter century of cliometrics. This book will make basic tools of economic historical analysis accessible and at times even entertaining to students and colleagues who have little or no background in economics. And it is guaranteed to enliven any course or seminar as it did mine. John H Coatsworth author of *Central America and the United States*.

Venice as the Polity of Mercy Richard MacKenney, 2018-12-21. This study re examines Venice's political economy from the viewpoint of its ordinary people or popolani who despite the commonly held view that they were excluded from political life by the nobility or nobili actually organized and ran for themselves hundreds of corporations within the city state. Mercy was central to this popolani's Christian values and those who offered mercy to their fellow men and women in temporary hardship were investing in the expectation of reciprocity in their own time of need. Beginning by tracing a formative linking of religion economy and polity from the thirteenth to the fifteenth centuries Venice as the Polity of Mercy then chronicles the collapse of this triad during the struggles between church and state in the mid sixteenth and seventeenth centuries followed by a revitalizing reconnection of economy and polity within a different religious climate after the plague of 1630. As such Richard Mackenney's book offers up a revitalized image of Renaissance Venetian society as dynamic rather than static as well as a new understanding of the city's significance through a reconfiguration of its history and artwork.

The Making of Modern Finance Samuel Knafo, 2013-07-03. The Making of Modern Finance is a path breaking study of the construction of liberal

financial governance and demonstrates how complex forms of control by the state profoundly transformed the nature of modern finance Challenging dominant theoretical conceptions of liberal financial governance in international political economy this book argues that liberal economic governance is too often perceived as a passive form of governance It situates the gold standard in relation to practices of monetary governance which preceded it tracing the evolution of monetary governance from the late middle Ages to show how the 19th century gold standard transformed the way states relate to finance More specifically Knafo demonstrates that the institutions of the gold standard helped to put in place instruments of modern monetary policy that are usually associated with central banking and argues that the gold standard was a prelude to Keynesian policies rather than its antithesis The author reveals that these state interventions played a vital role in the rise of modern financial techniques which emerged in the late 18th and 19th century and served as the foundation for contemporary financial systems This book will be of strong interest to students and scholars of international political economy economic history and historical sociology It will appeal to those interested in monetary and financial history the modern state liberal governance and varieties of capitalism

The Low Countries History Yearbook 1982 J. De Belder, R. W. J. M. Bos, G. Teitler, C. B. Wels, C. Fasseur, A. Meynen, C. R. Emery, Johanna A. Kossmann, 2012-12-06 The present volume number 15 of the *Acta Historiae Neerlandicae* which have been appearing since 1978 under the title *The Low Countries History Yearbook* is the last of the series Economic reasons force the publishers to discontinue it This is a matter for regret Both the editors of the Yearbook and the board of the *Nederlands Historisch Genootschap* under the auspices of which it has been published are convinced that the books serve a useful purpose We hope that in the future more favourable circumstances will enable Dutch and Flemish historians to start a second series We feel however that the Yearbook should not be allowed to disappear completely In our opinion one of its most attractive features has been the Survey of recent historical works on Belgium and the Netherlands published in Dutch It is the intention of the *Nederlands Historisch Genootschap* to seek means to continue this in another form probably in that of pamphlets appearing every two years and written by the same or a similar group of experts In that way we may be able to provide a useful service to our colleagues abroad

Britain's Political Economies Julian Hoppit, 2017-05-03 The Glorious Revolution of 1688-9 transformed the role of parliament in Britain and its empire Large numbers of statutes resulted with most concerning economic activity Julian Hoppit here provides the first comprehensive account of these acts revealing how government affected economic life in this critical period prior to the Industrial Revolution and how economic interests

across Britain used legislative authority for their own benefit Through a series of case studies he shows how ideas interests and information influenced statutory action in practice Existing frameworks such as mercantilism and the fiscal military state fail to capture the full richness and structural limitations of how political power influenced Britain s precocious economic development in the period Instead finely grained statutory action was the norm guided more by present needs than any grand plan with regulatory ambitions constrained by administrative limitations and some parts of Britain benefiting much more than others
