Economics Ethics And Environmental Policy:

Economics, Ethics, and Environmental Policy Daniel W. Bromley, Jouni Paavola, 2008-04-15 Economics Ethics and Environmental Policy Contested Choices offers a comprehensive analysis of the ethical problems associated with basing environmental policy on economic analysis and ways to overcome these problems **The Business of Consumption** Laura Westra, Patricia Hogue Werhane, 1998 At the forefront of international concerns about global legislation and regulation a host of noted environmentalists and business ethicists examine ethical issues in consumption from the points of view of environmental sustainability economic development and free enterprise Visit our website for sample chapters

Environmental Ethics and International Policy H. ten Have, 2006-01-01 This publication a joint initiative of the World Commission on the Ethics of Scientific Knowledge and Technology COMEST and the UNESCO Division of Ethics of Science and Technology contains essays written by eight leading international experts in this relatively new inter disciplinary area of applied ethics These papers consider the moral dimensions of environmental management issues and explores proposals for effective international policy making to promote environmental objectives Ecology, Economics, Ethics F. Herbert Bormann, Stephen R. Kellert, Stephan R... Kellert, Professor F Herbert Bormann, 1991 In this book a distinguished group of environmental experts argues that in order to solve global environmental problems we must view them in a broad interdisciplinary perspective that recognizes the relations the interconnected circle among ecology economics and ethics Currently the circle is broken they say because environmental policy is decided on short term estimations of material return that take little account of the economic or moral burdens that will be borne by future generations if we deplete our resources now **The Environmental Ethics and Policy Book** Donald VanDeVeer, Christine Pierce, 1994 This text is designed for students who wish to explore in depth questions about how on earth we ought to live e g how we can behave responsibly toward nonhumans and toward the planet Although primarily oriented toward questions of ethics broadly understood and approached philosophically the volume crosses disciplinary boundaries and attends seriously to economic reasoning and its implications for environmental policy issues It seeks to extract for critical attention the relevant moral or normative presuppositions which lie behind policy recommendations whether they are ones made by biologists ecologists economists philosphers engineers public officials or anyone concerned with policy decisions The Elgar Companion to Social Economics, Second Edition John B. Davis, Wilfred Dolfsma, 2015-05-29 Social economics is a dynamic and growing field that emphasizes the key roles social values play in the economy and economic life This second edition of the Elgar Companion to Social Economics revises all chapters from the first edition and adds impo **Introduction to the Law and Economics of Environmental Policy** T. Swanson, 2002-08-15 Three important issues concerning institutional design are policies instruments and enforcement This volume surveys each of the issues and emphasises the common themes arising in optimal institutional design It looks at the importance of institutional design in addressing social problems Environmental Values

Institutions and the Environment Arild Vatn, 2007-01-01 Vatn has prepared a vast feast for his readers Hopefully this book will become one of the core textbooks both in institutional economics and in resource economics As a political scientist I can recommend it to social scientists more generally I must confess I enjoyed it all Elinor Ostrom 2009 Nobel Laureate Land Economics Institutions and the Environment indeed serves as a first rate starting point for students and researchers regardless of whether they are mainly interested in institutions in general or environmental governance and ecological economics in particular Charlotta S derberg Environmental Politics This timely book is about institutions how they develop how they function and how they solve problems This book exemplifies the fine institutionalist tradition of using knowledge to solve pressing problems in fact institutionalists will find little here to criticize The scope of this book is wide policy makers government officials institutionalists environmentalists and the general public will all benefit from reading this book Keep this book handy you ll want to make frequent references as the global warming policy debate unfolds Jack Reardon Journal of Economic Issues Vatn

s book addresses the urgent question of environmental policy and shows that an understanding of the role of institutions is vital in this area It incorporates insights on institutions from both mainstream and heterodox traditions of thought

Magisterial and comprehensive it is both a textbook and an inspiring pioneering monograph Geoffrey M Hodgson University of Hertfordshire UK This is an excellent book which can be read at different levels I very much enjoyed reading this book and would recommend it to anyone interested in these issues I feel it is likely to become one of the core text books on the topic

Neil Powe Newcastle University UK We have here an encompassing work of remarkable clarity and coherence demonstrating the enduring pertinence of classical institutional economics to the vexing issues of our time While most of the illustrative examples come from the realm of environmental problems the reach of this fine book goes far beyond this particular issue and informs how we ought to think about all aspects of public policy

Daniel W Bromley University of Wisconsin Madison US This is a superb book on institutional economics and environmental policy Vatn has written the definitive exposition of the theory and policy approaches of modern institutional economics It not only builds on the work of the best institutional economists from Veblen to Bromley and Hodgson it also incorporates the extremely relevant and exciting research now being done in contemporary mainstream economics With the demise of Walrasian economics and the current drive for the unification of the behavioral sciences the time is ripe for institutional economics to once again become a dominant school of economic thought

Vatn s book shows the way John Gowdy Rensselaer Polytechnic Institute US This important text develops an institutional response to the core issues raised in public policy making and develops a distinct understanding of the role of institutions not least in the study of environmental problems It questions how are conflicting interests shaped and taken into account in policy making How should they be accounted for What motivates the behaviour of firms and individuals and how is it possible to change these motivations to produce the favoured common outcomes The author addresses these questions by integrating elements from classical institutional economics neoclassical economics sociology and ecological economics He argues that public policy in general and environmental policy in particular are best examined from an institutional perspective In this way the author presents a distinct and consistent alternative to standard neoclassical economics for students and scholars who

Alternative Institutional Structures Sandra Batie, Nicholas Mercurio, 2008-06-16 In the spring on 2006 a workshop was held at Michigan State University to honour the career of A Allan Schmid and his writings about how institutions evolve and how alternative institutions including property rights shape political relationships and impact economic performance This edited book is the outcome of the workshop It is a collection

Ethical Issues in Business - Second Edition Peg Tittle, 2016-12-15 Peg Tittle s ambitious business ethics text brings together readings cases and the author s own informed opinions The second edition includes over a dozen new readings and case studies as well as a new chapter on issues in Information and Communication Technology Includes Canonical and topical readings on issues ranging from whistleblowing and advertising to international business the nature of capitalism and the environment Engaging

overviews from the author encourage careful reflection and critical examination of conventional assumptions What to Do scenarios and Case Studies illustrate the practical relevance of each topic Comprehensive introductions to ethical theory and the ethics of business Questions following each selection test understanding and promote active reading A primer on ethical institutions examines the role of ethics consultants codes of ethics and more

Developmental Dilemmas Peter Ho, 2005-05-24 Developmental Dilemmas singles out land as an object of study and places it in the context of one of the world s largest and most populous countries undergoing institutional reform the People s Republic of China The book demonstrates that private property protected by law the principle of getting the prices right and the emergence of effectively functioning markets are the outcome of a given society s historical development and institutional fabric Peter Ho argues that the successful creation of new institutions hinges in part on choice and timing in relation to the particular constellation of societal economic political and cultural parameters Disregarding these could result in rising inequality bad land stewardship and the eruption of land related grievances

Southern Baltic Coastal Systems Analysis Hendrik Schubert, Felix Müller, 2023-01-31 This book gives an overall analysis

of the current knowledge status about structures functions utilization for German Baltic coast ecosystems The main focus of this book is on the aquatic area but land sea interactions as well as river outfalls are included as well Characteristic for this book is the inclusion of social science aspects Approximately one third of its extent will be about the ecosystem services In this segment the results of the last 6 years are presented in which a comprehensive quantification of the social relevance of ecosystems was carried out covering the entire area of the German Baltic Sea This part builds directly on the results of scientific investigations and are in relation to social ideals The assessment will not only be economically and ethically but also the mechanisms that are used for the valorisation of the ecosystem services will be evaluated Both sub areas the classic natural science part as well as the part of social science aspects deal with the changes caused by increasing anthropogenic influence and social including demographic changes This will be among others in the sense of an exemplary historical outline The final chapter of the synthesis therefore not only presents a summary of the level of knowledge gained and a deduction of the research needs It further contains a presentation of the application aspects resulting from the analysis of the social relevance gained from basic scientific research The book is aimed at scientists and students of natural life and social sciences analysing functioning and structures of coastal ecosystems with regard to sustainable use and nature protection including aspects of coastal protection Besides it is thought to become a reference for all levels of decision makers and stakeholders in coastal and marine management of the Baltic and North Sea region providing also a blueprint for system analysis respecting for societal as well as biological aspects world wide
