**Economic Harmonization in the Canadian/U.S./Mexican Grain-livestock Subsector** R. M. A. Loyns, Ronald D. Knutson, Karl D. Meilke, 1998 North American Agricultural Market Integration and Its Impact on the Food and Fiber System Thomas L. Vollrath, 2003 The North American Beef Industry in Transition Andrea M. Brocklebank, Jill E. Hobbs, William Alexander Kerr, 2007 This book provides an in depth analysis of the factors providing the impetus for change in the North American beef industry and how the industry is responding to the challenges The beef industry story provides lessons for other agri food industries attempting to respond to rapidly evolving food markets The book provides important insights into the process whereby industries respond to a rapidly changing marketplace and in particular industries with complex supply chains consisting of many actors The agri food industry provides an excellent example of a market that is evolving rapidly in ways few would have contemplated even a few years ago The beef industry has an exceedingly complex supply chains that must co ordinate complex resources such as genetics extensive grazing precision feeding strategies high tech processing cold chain logistics and food safety protocols The interaction between changing demands and the beef industry s responses to an evolving marketplace provide the focus of the book The book examines the process whereby the beef industry prior is making the transition from a supplier of commodities to a provider of differentiated products with attributes tailored to individual consumers The book then provides a theoretical basis for the examination of evolving supply chains and a means by which the industry s response can be assessed using modern quantitative methods Case studies are developed to dig deeper into the transition the beef industry is experiencing Insights are drawn for other agri food sectors facing similar challenges Ranchers have always had a special place in the cultural heritage that defines North Americans and beef has been the premium product in the dietary hierarchy in traditional North American cuisine As urban dwellers who are generations removed from agricultural production now overwhelmingly make up the consumer base the image of cattle producers is buffeted by new customer priorities such as animal welfare environmental sustainability and the ability to determine the place of origin of their food As the proportion of food consumed at home declines and consumers seek to expand their range of culinary experiences food from cultures where beef is not a mainstay of the diet have gained more prominence These restaurant experiences are increasingly being reflected in the near table ready products on offer in supermarkets Consumers are still likely to enjoy a good steak other traditional beef products now struggle for consumers The implications of the response of the beef industry to the changes buffeting the sector goes beyond strictly commercial concerns and will determine the place of beef and the industry s participants in the evolving North American culture

**International Environmental Economics** Günther G. Schulze, Heinrich W. Ursprung, 2001 Environmental economics has traditionally been conducted in a closed economy mode Most textbooks on the subject still reflect this restriction international aspects of environmental problems are often not covered at all or dealt with as an afterthought In a world in which many environmental pollutants spill over national borders and national economies have become increasingly integrated this state of affairs is clearly unsatisfactory rational environmental policies undertaken in a globalizing world need to take the international economic and environmental relationships into consideration This perception has given rise to much literature employing an open economy approach to analysing environmental problems and policies After a decade of intensive research the time has come to take stock of the state of the art knowledge It is the objective of this volume to provide a review which will be of interest to scholars and graduate students of economics and political science who wish to familiarize themselves with the main issues and actors in the field of international environmental economics This collection of non technical issue oriented and comprehensive surveys is written by leading specialists in international and environmental economics

**Integration of Transport and Trade Facilitation** T. R. Lakshmanan, 2001-01-01 Annotation With contributions from 35 leading economists this forward looking book explores the future of development economics against the background of the past half century of development thought and practice Outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation The volume offers a thorough analysis of the broad range of issues involved in development economics and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty An overriding issue is whether in the future development economics is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory Frontiers of Development Economics is an ideal reference for all those working in the international development community A Copublication of the World Bank and Oxford University Press
