The Economics, Marketing, and Technology of Fish Protein Concentrate Steven R. Tannenbaum, Bruce R. Stillings, Nevin S. Scrimshaw, 1974 *The Economics, Marketing, and Technology of Fish Protein Concentrate* Steven R. Tannenbaum, Bruce R. Stillings, Nevin S. Scrimshaw, 1974 *The Economic, Marketing and Technology of Fish Protein Concentrate* Steven R. Tannenbaum, Bruce R. Stillings, Nevin S. Scrimshaw, 1974 **Fish Protein Concentrate** Ernst R. Pariser, 1978 Abstract During the past twenty years international attention has been focused on the kaleidoscopic fate of fish protein concentrate FPC as a panacea for the world's food crisis However the problem of malnutrition transcends the simplistic solution of developing new proteins to bridge the protein gap The history and cultural significance of fish as food and the growth and development of FPC in the U S are reviewed Case studies in four countries show how economic social and political factors frustrated the success of FPC Policy implications are discussed **Biochemical Aspects of New Protein Food** Jens Adler-Nissen, Bjørn O. Eggum, Lars Munck, 2014-05-18 Biochemical Aspects of New Protein Food examines the biochemical aspects of the use and consumption of new protein foods and determine future areas for research by biochemists The symposium showcases the presentation of biochemical research that provides a better understanding of the characteristics of new protein foods their methods of production and solutions to problems in the evaluation of their nutritive properties Chapters are devoted to the novel and conventional protein foods in the future production of food from waste and a comparative analysis of protein situation in developed versus developing countries It is hoped that the symposium will be able to help overcome the problems of acceptability of the new foods and catapult it as an important part of human diet Biochemists food technologists biologists and food manufacturers will find the book interesting and informative **Seafood Safety, Processing, and Biotechnology** Fereidoon Shahidi, Yvonne M. Jones, David Kitts, 2020-08-19 Research and development of seafood continues to be productive in terms of new and improved products for both food and non food purposes The use of biotechnology microbiology computer modeling and advanced analytical techniques has led to improvements in processing and product safety This recent book provides extensive new information on these developments The 25 reports were prepared by food scientists specializing in seafood The reports are well illustrated with numerous schematics and some micrographs Extensive reference data is provided in tables and graphs *World Food Problem* Professor Miloslav Rechcigl, 2018-01-10 The aim of this publication is to provide the interested reader with an authoritative and comprehensive up to date bibliography on all important facets of the world food problem encompassing such questions as the availability of natural resources the present and future sources of energy environmental quality population growth world malnutrition the state of food production food consumption patterns future food needs toxicological aspects of food agricultural and industrial aspects of food production and family planning It is the first compilation of its kind in that it covers the subject from a multidisciplinary point of view including publications that deal with the description and analysis of

the world food problem as well as those that offer alternative strategies and specific technological measures for alleviating the problem **New and Developing Sources of Food Proteins** B.J.F. Hudson, 2012-12-06 The recent series of texts

Developments in Food Proteins comprised in all seven volumes which were published in the course of the decade 1982-1991. Each volume contained inter alia one or more chapters that were concerned with new or developing sources of food proteins. Most of these have now been collected together in an up dated and re evaluated form for the present volume. New sources of food proteins includes those sources that are unconventional that are still of very limited significance in market terms or that are at present of very localized use. Several of these were included in Developments in Food Proteins. One of them algae appeared both in Volume 1 and in an up dated form in Volume 7. It is therefore not included here. Others such as yeasts and bacteria have not yet increased in practical importance as potential food components beyond the long term promise already evident at that time. However leaf protein as described in the present Chapter 10 has moved from the original rather crude concept to a much more sophisticated product in the form of Rubisco. Fungal protein as Quorn Chapter 11 has also proved to be potentially of real food value. Developing sources of food protein are those sources that have always been basic items in human diets. *Sea Grant Publications Index*, 1975 **Nutrition and Agricultural Development** Nevin

Scrimshaw, 2013-03-09 For the past thirteen years symposia have been held either in South America or in Mexico on subjects of special interest to Latin American scientists. When the opportunity of holding the 14th International Biological Symposium in Guatemala was offered it was most welcome especially as the occasion was the celebration of the 25th Anniversary of the Institute of Nutrition of Central America and Panama INCAP. With the encouragement of members of the Ford Foundation staff and the National Academy of Sciences the idea for a symposium on the broad approach to the problem of nutrition was developed by Dr Moises Behar the second director of INCAP 1961-1974. Dr Nevin Scrimshaw first director of INCAP 1949-1961 and members of the INCAP staff. Because the availability of food has become a serious international problem a discussion of the underlying problems was most timely. INCAP one of the pioneer and leading institutions in the area of nutrition has a profound influence on nutrition in Latin America. The meeting was attended by about 300 scientists from more than 20 countries. Because this was the first symposium in this series to be held in Central America it provided an opportunity to get acquainted with scientists from many of the Central American republics. It was especially rewarding that so many students from the Central American universities attended this meeting. *Marine Science Affairs*, 1970 *Report of the Bureau of Commercial Fisheries for the Calendar Year* United States.
