HORACIO SALGÁN - TANGO COURSE Horacio Salgán,2020-06-10 Writing this Tango Course is both an obligation and a great pleasure for me It is an obligation because I would like to contribute something of all the things that I owe in return as an appreciation of having been fortunate enough to educate myself in the Orchestras where I learned to play Tango The Orchestras were a crucible where the ideas of its members and or other creative musicians experimented played and came together to create playing styles rhythmic forms etc These contributions were what took the Tango little by little to such a high musical level Nowadays it is not at all easy to belong to an Orchestra considering the fact that so few can subsist This makes it more difficult for those who want to have careers in Tango music to acquire the vast knowledge necessary for playing and interpreting it Let us not forget that the Orchestras have always been the best schools for such an apprenticeship It is also a great pleasure to be able to transmit and share that what I have learned trying always not to leave anything out that is my real intention by relying on my memory which fortunately still helps me I never intended for my conclusions to be taken as the absolute truth nor wanted to win something over anyone in anything This course just shows my position and the ideas with which I have always worked We will deal here with the Tango in versions which in my understanding are genuine manifestations of itself I love the Tango because I love good music and I got into it to learn to play it not to change it If my versions and arrangements have something different about them it is only because this is my language and I have expressed myself through it I will also talk about the incorporation of new contributions and changes as long as they are authentic within the genre The many streams of opinion may or may not coincide with what will be said in this course Considering the broadness of the theme and the flexibility which should govern artistic creation other concepts may prove constructive as well I sincerely hope that this course will be useful to someone Horacio Salg n

New Approaches to Latin American Studies Juan Poblete,2025-05-30 New Approaches to Latin American Studies Culture and Power Vol 2 provides an examination of the new and defining approaches that have emerged in the field of Latin American Studies in the last decade since 2014 Like its predecessor this second volume of New Approaches to Latin American Studies is organized using the concept of a turn as in linguistic or cultural turn and aims to help both students and faculty in an eminently interdisciplinary space like Latin American Studies find new ways of conceptualizing objects and research Original contributions from experts in their fields provide a discussion that is not meant to be fully comprehensive but concentrates instead on key authors and key texts In each chapter the keyword that defines the turn functions as a specific limit that contains the proliferation of references and connections restricting them to the trajectory of such turn This second volume includes 11 new chapters covering important transformations during the last decade on the issues perspectives and stakes of the field This book is an expert produced reliable and reader friendly orientation to the many new areas of research Latin American Studies now encompasses and evidence of the dynamism of this complex field

Tropical Gothic in Literature and Culture Justin D. Edwards,Sandra G.T. Vasconcelos,2016-01-13 Tropical Gothic examines Gothic within a specific geographical area of the

South of the Americas In so doing we structure the book around geographical coordinates from North to South and move between various national traditions of the gothic Mexico Argentina Brazil etc alongside regional manifestations of the Gothic the US south and the Caribbean as well as transnational movements of the Gothic within the Americas The reflections on national traditions of the Gothic in this volume add to the critical body of literature on specific languages or particular nations such as Scottish Gothic American Gothic Canadian Gothic German Gothic Kiwi Gothic etc This is significant because while the Southern Gothic in the US has been thoroughly explored there is a gap in the critical literature about the Gothic in the larger context of region of the South in the Americas This volume does not pretend to be a comprehensive examination of tropical Gothic in the Americas rather it pinpoints a variety of locations where this form of the Gothic emerges In so doing the transnational interventions of the Gothic in this book read the flows of Gothic forms across borders and geographical regions to tease out the complexities of Gothic cultural production within cultural and linguistic translations Tropical Gothic includes but is by no means limited to a reflection on a region where European colonial powers fought intensively against indigenous populations and against each other for control of land and resources In other cases the vast populations of African slaves were transported endowing these regions with a cultural inheritance that all the nations involved are still trying to comprehend The volume reflects on how these histories influence the Gothic in this region

Literature and the Work of Universality Alice Duhan, Stefan Helgesson, Christina Kullberg, Paul Tenngart, 2024-07-22 In an age of accelerating ecological crises global inequalities and democratic fragility it has become crucial to achieve renewed articulations of human commonality With anchorage in critical theory as well as world literary studies this volume approaches literature and modes of literary thinking as a key resource for such a task Universality is understood here not as an established universalism but as a horizon towards which intellectual inquiry and literary practices orient themselves In the field of world literature there is by now a wide repertoire of epistemological resources through which claims to universality can be both questioned and reconfigured If at one end of the spectrum world literature confronts us with the spectre of homogenisation and the commodification of difference under a regime of global capitalism at another end renewed forms of philological anthropological and ecological attentiveness to the particulars of languages and texts within the crucible of connected histories allow for defamiliarising perspectives both on received historical narratives and aesthetic practices Vernacularity emerges here as a central point of reference for constructing the universal from within the particular the idiomatic and the experiences of social subordination or complicity

Aurality Ana María Ochoa Gautier, 2015-02-20 In this audacious book Ana Mar a Ochoa Gautier explores how listening has been central to the production of notions of language music voice and sound that determine the politics of life Drawing primarily from nineteenth century Colombian sources Ochoa Gautier locates sounds produced by different living entities at the juncture of the human and nonhuman Her acoustically tuned analysis of a wide array of texts reveals multiple debates on the nature of the aural These discussions were central to a politics of the

Medina Cordova,2022 How are contemporary authors reimagining the idea of Ecuador following the worst financial crisis in the nation s history and how do countries on the periphery of the global literary market challenge and enrich World Literature Winner of the 2020 21 AHGBI Spanish Embassy Publication Prize In March 1999 in an effort to stave off financial collapse the Ecuadorian government suspended all banking operations and froze all bank accounts in the country for a period of five days This episode the Feriado Bancario represents the peak of the worst financial crisis in the nation s history and one which had far reaching and long last effects on society politics the economy and cultural production The very idea of Ecuador was transformed as Ecuador became a country marked by constant interaction with the world beyond its borders This book explores how contemporary Ecuadorian authors are reimagining the nation following the Feriado Bancario Starting from a rereading of Ecuador s national novel Jorge Icaza s Huasipungo 1930 which saw the nation as rooted in the land the book examines post crisis fiction which offers an image of Ecuador as a transnational space It posits that these novels Eli cer C rdenas El oscuro final del Porvenir 2000 Leonardo Valencia s Kazbek 2008 Carlos Arcos Memorias de Andr s Chiliquinga 2013 and Gabriela Alem n s Humo 2017 both reflect and explain the new reality of Ecuador as a nation that can no longer be defined by its territory At the same time the book uses the Ecuadorian case to challenge the conceptualisation of Latin American literature as post national and to show how countries on the periphery of the global literary market can from the very fact of their minoritarian position enrich and better define World Literature **Catalog of Copyright Entries. [La poética del acontecer](#) Gastón Soublette, 2022-06-15 En este libro el autor propone desarrollar el discernimiento por analogía que consiste en rescatar del inconsciente una vía clausurada de acercamiento a lo real Una vía que estuvo abierta hace siglos para nuestros antepasados pero que los imperativos de la empresa civilizadora occidental cerraron mediante una pedagogía unidimensional en la que se formaron las masas ciudadanas desde el despuntar de la civilización industrial El fundamento teórico de esta proposición procede de las investigaciones del psicólogo suizo alemán Karl Gustav Jung quien mediante la experimentación en la terapia el desarrollo de una teoría psicológica del inconsciente más una fuerte influencia oriental Confucio descubrió un paralelismo analógico permanente entre el acontecer psíquico y el acontecer objetivo Sincronicidad De este modo el binomio sujeto objeto que la lógica moderna había disociado se reintegra como conciencia participativa cesando la hegemonía de las verdades verticales y excluyentes para dejar paso a una cosmovisión de relaciones y resonancias horizontales
