Fragmentation in Semi-Arid and Arid Landscapes Kathleen A. Galvin, Robin S. Reid, Roy H. Behnke, Jr., N. Thompson Hobbs, 2007-10-12 Casual readers of the title of this book might be forgiven for thinking that it is a little esoteric far removed from the pressing day to day concerns of humans and wildlife in the drylands of the world But they could not be more wrong It addresses an issue of the utmost practical importance in the world today yet does so on the basis of exciting new theory about how the world operates Of the billion or so human beings who now live in the world's arid and semi arid lands a majority depend on natural resources for their livelihoods These natural resources include livestock and their forage as well as the wild biota that creates opportunities for tourism or subsistence harvesting Arid and semi arid lands are spread over a third of the world's land surface from Colorado to the Kalahari the Sahel to the Simpson the Altai Steppe to Amboseli Notwithstanding their diversity these lands are broadly characterized by low productivity management at large scales and great climate variability in short by high spatial and temporal heterogeneity This book is about the implications of that high spatial and temporal heterogeneity for life management and policy in arid and semi arid lands Greater Yellowstone Rick Reese, 1991 *Travels in the Greater Yellowstone* Jack Turner, 2009-05-12 Award winning nature writer Jack Turner directs his attention to one of America's greatest natural treasures the Greater Yellowstone Ecosystem Comprised of two national parks three national wildlife refuges parts of six national forests and eleven wilderness areas Greater Yellowstone is a vast array of differing environments and geographies In a series of essays Turner explores this wonderland venturing on twelve separate trips in all seasons using various modes of travel hiking climbing skiing canoeing lakes floating rivers and driving his way across the landscape He treks down the Teton Range picks up the Oregon Trail in the Red Desert and floats the South Fork of the Snake River Along the way he encounters a variety of wildlife moose elk trout and wolves From the treacherous mountains in the dead of winter to lush river valleys in the height of fishing season his words and steps trace one

of the most American of experiences exploring the West Turner who has lived in Grand Teton for three decades designates Greater Yellowstone as ground zero for the country's conflict between preservation and development At a time when the battle to preserve a wild and natural environment is relentless his accounts of the areas conflicts with alien species logging real estate oil and gas development are alarming A mixture of adventure nostalgia and Americana Turner's rare experiences and evocative writing transform the sights and sounds of Greater Yellowstone into an intimate narrative of travel through America's most beloved lands Praise for Teewinot Bursting with a sense of place a rewarding reading experience replete with ravishing observations of nature Publishers Weekly a measured luxuriance in the landscape a love song to the natural history of a place Turner's writing is muscular never swaggering and almost lyrical summoning a Teton Range in its rightful sublime austerity Kirkus Reviews Teewinot is a rare book The wonderful accounts of mountaineering serve as armature not only for Turner's meditative reverence for the Grand Tetons and his often evocative prose but also for an uncommon density of knowledge of place Peter Matthiessen author of *Tigers in the Snow* This is simply stated a wonderful and utterly engaging book Jim Harrison author of *Dalva* and *The Road Home* Each place must find its muse The Tetons have found theirs and his name is Jack Turner Terry Tempest Williams author of *Coyote's Canyon*
