Teece, Josef Chytrý, 2005 Understanding Industrial and Corporate Change contains pioneering work on technological organizational and institutional change and explores three distinct themes Markets and Organizations Evolutionary Theory and Technological Change and Strategy Capabilities and Knowledge Management **Computable, Constructive and Behavioural Economic Dynamics** Stefano Zambelli, 2010-02-25 The book contains thirty original articles dealing with important aspects of theoretical as well as applied economic theory While the principal focus is on the computational and algorithmic nature of economic dynamics individual as well as collective decision process and rational behavior some contributions emphasize also the importance of classical recursion theory and constructive mathematics for

dynamical systems business cycles theories growth theories and others are in the area of history of thought methodology and behavioural economics The contributors range from Nobel Laureates to the promising new generation of innovative thinkers This volume is also a Festschrift in honour of Professor Kumaraswamy Vela Velupillai the founder of Computable Economics a growing field of research where important results stemming from classical recursion theory and constructive mathematics are applied to economic theory The aim and hope is to provide new tools for economic modelling This book will be of particular appeal to postgraduate students and scholars in one or more of the following fields computable economics business cycles macroeconomics growth theories methodology behavioural economics financial economics experimental and agent based economics It might be also of importance to those interested on the general theme of algorithmic foundations for social sciences

Innovation, Organization and Economic Dynamics Giovanni Dosi, 2000-01-01 Conventional economic analysis of property rights in natural resources is too narrow and restrictive to allow for effective comparisons between alternative institutional structures In this book a conceptual framework is developed for the analysis of the

Creating a Sustainable Economy Gerardo Marletto, 2013-06-19 This book is designed for those scholars students policy makers or just curious readers who are looking for heterodox thinking on the issue of environmental economics and policy Contributions to this book draw on multiple streams of institutional and evolutionary economics and help build an approach to environmental policy that radically diverges from mainstream prescriptions No silver bullet solutions emerge from the analyses Even market based tools such as green taxes or tradable pollution permits are bound to fail if they are not incorporated into an integrated multi dimensional and multi actor policy for structural change

Industrial Clusters and Regional Business Networks in England, 1750-1970 John Wilson, Andrew Popp, 2017-07-05 Although economists have long recognised industrial districts as one of the key features of many economies it is only recently that attention has been focused on the region as an effective means of generating accurate insights into the larger picture of economic performance This renewed interest in regional issues has also placed at centre stage the role played by networks as a principal organisational feature of the local business community providing scholars with a rich topic for investigation and debate Recent work has shown that universal generalisations concerning the impact of networking on the performance of industrial clusters lack credibility highlighting the consequent need to compare the role played by business networks in a variety of regions Using a copious range of research material examining several British regions this volume poses a series of fundamental questions about the nature of industrial clusters and networks Particular attention is paid to identifying the basic characteristics of a network outlining how they evolved in key industrial clusters and assessing their impact on industrial performance both regionally and nationally The durability of such networks is another key thread that runs through the essays prompting comparison with industrial clusters in Britain and abroad These are issues which stimulate discussion on a wide range of factors within the disciplines of business economic and social history

Dead Firms Miguel M. Torres, Virginia Cathro, Maria Alejandra

Gonzalez-Perez,2016-07-05 Why do firms die This volume explores international and cross disciplinary perspectives carrying out a forensic examination of how and why companies die in order to understand the lessons dead firms may have to offer

Technology, Market Structure and Internationalization Nagesh Kumar,N. S. Siddharthan,2013-05-13 Technology Market Structure and Internationalization discusses the domestic and external factors that impinge upon the process of technological capability building in developing countries and draws policy implications Specifically it examines the interaction between technological effort in developing countries Providing fresh insights this volume will be of interest to researchers in development economics as well as to those involved with the creation of policy in developing countries

Social Capital, Corporate Social Responsibility, Economic Behaviour and Performance L. Sacconi,G. Antoni,2010-12-13 This book focuses on the concepts of social capital corporate social responsibility and economic development in relation to economic theory of institutions and behavioural economics It also takes a macroeconomic and empirical approach on the relationship between social capital ethical behaviour and economic development

Computable, Constructive & Behavioural Economic Dynamics Stefano Zambelli,2010-02-25 The book contains thirty original articles dealing with important aspects of theoretical as well as applied economic theory While the principal focus is on the computational and algorithmic nature of economic dynamics individual as well as collective decision process and rational behavior some contributions emphasize also the importance of classical recursion theory and constructive mathematics for dynamical systems business cycles theories growth theories and others are in the area of history of thought methodology and behavioural economics The contributors range from Nobel Laureates to the promising new generation of innovative thinkers This volume is also a Festschrift in honour of Professor Kumaraswamy Vela Velupillai the founder of Computable Economics a growing field of research where important results stemming from classical recursion theory and constructive mathematics are applied to economic theory The aim and hope is to provide new tools for economic modelling This book will be of particular appeal to postgraduate students and scholars in one or more of the following fields computable economics business cycles macroeconomics growth theories methodology behavioural economics financial economics experimental and agent based economics It might be also of importance to those interested on the general theme of algorithmic foundations for social sciences

The Economic Behaviour of Industrial Corporations Jagdish Handa,Chandra Prakash Khetan,Ramesh R. Waghmare,1985-01-01 When a boy finds a skeleton buried in a dried up reservoir Detective Chief Inspector Alan Banks is brought in to head what seems like a routine dead end investigation With the help of Detective Sergeant Annie Cabbot Banks uncovers long kept secrets in a community that has concealed its past

Change, Transformation and Development J. Stan Metcalfe,Uwe Cantner,2012-12-06 For as long as one can remember the edifice of the neoclassical economic syn thesis has been under attack Critiques have focused on the extreme unreality of the assumptions that underpin the Arrow Debreu theorems of welfare economics They have queried the excessive formalism of the edifice and the lack of practical significance

of many of the results They have castigated the neoclassical synthesis for its internal incoherence lacking an independent theory of capital for example one of the favorite topics of the Cambridge school its lack of a dynamic element its non evolutionary character its lack of any conception of market process and so the list could be continued Blaug 1997 Through all this the neoclassical synthesis remains as strong as ever impervious it seems to these or any other attacks In this paper a different tack is taken The neoclassical edifice is left alone standing as a representation of what goes on in a certain kind of economy namely the economy where goods and services are produced and exchanged The paper then introduces another kind of economy namely an economy of productive entities called resources that are needed to produce the economy of goods and services

Elgar Companion to Neo-Schumpeterian Economics Horst Hanusch, Andreas Pyka, 2007 The Elgar Companion to Neo Schumpeterian Economics is a cutting edge collection of specially commissioned contributions highlighting not only the broad scope but also the common ground between all branches of this prolific and fast developing field of economics For 25 years economists have been investigating industrial dynamics under the heading of neo Schumpeterian economics which has itself become a mature and widely acknowledged discipline in the fields of innovation knowledge growth and development economics The Elgar Companion to Neo Schumpeterian Economics surveys the achievements of the most visible scholars in this area The contributions to the Companion give both a brief survey on the various fields of neo Schumpeterian economics as well as insights into recent research at the scientific frontiers The book also illustrates the potential of neo Schumpeterian economics to overcome its so far self imposed restriction to the domains of technology driven industry dynamics and to become a comprehensive approach in economics suited for the analysis of development processes in all economic domains Integrating both the public sector and financial markets the book focusses on the co evolutionary processes between the different domains As a roadmap for the development of a comprehensive neo Schumpeterian theory the Companion will be an invaluable source of reference for researchers in the fields of industrial dynamics and economic growth and academics and scholars of economics generally PhD students will find the Companion an indispensable general introduction to the field of neo Schumpeterian economics It will also appeal to politicians and consultants engaged in national and international policy as the Companion deals with the highly important and ever topical phenomena of economic development

Corporate Capital Christos Pitelis, 2004-08-19 This book looks at the role of the modern corporation in advanced capitalist countries In particular it considers corporate control and share ownership and the impact of these on consumers choice the mobilization of financial capital the saving function and the question of the potentially inherent tendency towards stagnation and crisis The author suggests that there is a tendency towards social ownership of the means of production in modern capitalist economies directly via share purchase and indirectly via e.g. occupational pension funds while at the same time control and appropriation remain vested in a small minority This is shown to affect financial capital accumulation and the saving function since the competition between giant corporations encourages

their controllers to increase corporate saving above the level desired by small shareholders who are suggested to be unable fully to compensate for such increases by their actions **The Economics and Management of Technological Diversification** John Cantwell, Alfonso Gambardella, Ove Granstrand, 2004-04-22 And conclusions Further bibliography Index
