Economic Governance And The Challenge Of Flexibility In East Asia:

Economic Governance and the Challenge of Flexibility in East Asia Frederic C. Deyo, Richard F. Doner, Eric Hershberg, 2001 This book analyzes the institutional underpinnings of East Asia's dynamic growth by exploring the interplay between governance and flexibility in an endlessly demanding globalized marketplace. In case studies that encompass a variety of key industrial sectors and countries, the contributors emphasize the importance of network patterns of governance for facilitating flexibility in firms throughout the region. Their analyses illuminate both the strengths and limitations of recent growth strategies and offer insights into prospects for continued expansion in the wake of the East Asian economic crisis of the late 1990s. Visit our website for sample chapters [Remapping East Asia](#) T. J. Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today. The region has at least a century-long history of internal divisiveness, war and conflict, and it remains the site of several nettlesome territorial disputes. However, a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia. In *Remapping East Asia*, T. J. Pempel suggests that the region is ripe for cooperation rather than rivalry, and that recent region-building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics. This collection is about the people, processes, and institutions behind that region-building. In it, experts on the area take a broad approach to the dynamics and implications of regionalism. Instead of limiting their focus to security matters, they extend their discussions to topics as diverse as the mercurial nature of Japan's leadership role in the region, Southeast Asian business networks, the war on terrorism in Asia, and the political economy of environmental regionalism. Throughout, they show how nation-states, corporations, and problem-specific coalitions have furthered regional cohesion, not only by establishing formal institutions but also by operating informally, semiformally, or even secretly. [Japan and East Asia in Transition](#) H. Yoshimatsu, 2002-12-31 This book examines how Japan has changed its economic relationship with East Asia since the mid-1990s by looking at its commitments to import relief, regional financial and industrial transformations, and regionalism. While the Japanese government has taken proactive initiatives to sustain the sound development of the regional economies, it has become more strategic in preserving its interests in the rapid industrial transformation. The book includes valuable information about Japan's trade remedy measures, Sino-Japan relations, and regional integration in East Asia. **State-centric to Contested Social Governance in Korea** Hyöng-nae Kim, 2013 In this interdisciplinary study of governance, Hyuk Rae Kim traces how civil society and NGOs have evolved over time, how they differ in motivation from their Western counterparts, and the role civil society/NGOs have played in consolidating democracy as the governance system in Korea changes from a state-centric to a contested one. This book presents civil society's rise in Korea through in-depth analyses of today's most pressing issues in order to chart the shifting role of a formerly state-centric to a contested governance system in modern Korea. With detailed case studies and policy discussions, this book explores the role of NGOs in campaigning for political reform and the

eradication of political corruption the provision of public goods and services challenging the government's policies on migration tackling the issue of North Korean refugees and human rights and the provision of regional environmental governance These case studies demonstrate that the state is no longer the sole guardian and provider of public institutions and goods and underline the growing role of civil society in Korea Both a study of contested governance and an exploration of contemporary Korean society this book will be of imminent interest to students and scholars alike of Korean politics East Asian politics governance and civil society

Globalizing Regional Development in East Asia Henry Wai-chung Yeung, 2013-09-13 Significant historical and geographical differences account for the many processes and trajectories of regional development in East Asia These historical and geographical specificities in East Asia have prompted serious re examination of existing theories in regional development and in particular the new regionalism approach associated with such ideas as the learning region institutional thickness relational assets and regional innovation system This book brings together a group of leading researchers specializing in local and regional development in East Asian economies Through in depth empirical studies of specific regions and localities these authors offer fresh and innovative perspectives on how regions evolve and develop over time in the world's most dynamic macro regional economy In particular their work points to the critical importance of local and trans local processes in shaping regional development trajectories The book is timely given that the debate on the nature and dynamics of regional development in both academic and policy circles has now moved on From the earlier focus on endogenous regional assets such as localized networks of association and trust scholars and policymakers are now analyzing the complex relationship between economic globalization and regional change This high calibre collection makes a significant contribution to the literature on local and regional development in Asia and provides an important resource for researchers

students and policy makers interested in East Asia This book was published as a special issue of Regional Studies

Economic Development in a Globalized Environment Henry Y. Wan Jr.,2011-06-28 Is the East Asian growth record replicable today This book answers yes It places the common East Asian theme in the theoretic context of product cycles globalization and convergence and the historical perspective of the German Miracle after World War II also the more recent Irish growth it identifies the effective policies for sustained rapid growth by structured comparisons among different economies it evaluates the strengths and weaknesses of the alternative policy packages of Korea Taiwan Hong Kong and Singapore in the light of such recent events like global trend for liberalization and the Crises of 1997 and 2001 Economic Development in a Globalized Environment also scrutinizes the major debates in development economics using documented cases and analytic reasoning for support Law and Development of Middle-Income Countries Randall Peerenboom,Tom Ginsburg,2014-02-10 In 1960 there were 101 middle income countries By 2008 only thirteen of these had become high income countries Why do so many middle income countries fail to develop after a promising start becoming mired in the so called middle income trap This interdisciplinary volume addresses the special challenges that middle income countries confront from both a theoretical and a practical perspective It is the first volume that addresses law and development issues in middle income countries from the perspective of political administrative and legal institutions and policies The goal is to provide international development agencies and domestic policy makers with feasible recommendations to address the wide range of technically politically and socially complex issues that middle income countries face *Chinese Thought as Global Theory* Leigh Jenco,2016-05-12 Using Chinese thought explores how non Western thought can structure generally applicable social and political theory With a particular focus on Chinese thought this volume explores how and under what conditions so called non Western traditions of thought can structure generally applicable social and political theory Reversing the usual comparison between local Chinese application and universal theory the work demonstrates how Chinese experiences and ideas offer systematic insight into shared social and political dilemmas Contributors discuss how medieval Chinese understandings of causal heterogeneity can relieve impasses within contemporary historiography how current economic and social conditions in China respond proactively to the future configuration of world markets and how hybrid modes of cross cultural engagement offer new foundations for the enterprise of learning from cultural others Each chapter works from Chinese perspectives to theorize the location of knowledge its conditions of production and the modes through which its content or adequacy is legitimated challenged and sustained Rather than reproducing Eurocentric knowledge production in Chinese form the mobilization of Chinese thought as a generally applicable body of theory actually breaks down clear boundaries between Chinese and non Chinese thought Hong Kong, China Gordon Mathews,Dale Lü,Jiewei Ma,2008 The idea of national identity is an ambiguous one for Hong Kong Returned to the national embrace of China on 1 July 1997 after 150 years as a British colony the concept of national identity and what it means to belong to a nation is a matter of great

tension and contestation in Hong Kong Written by three academic specialists on Hong Kong cultural identity social history and mass media this book explores the processes through which the people of Hong Kong are learning to belong to a nation by examining their relationship with the Chinese nation and state in the recent past present and future It considers the complex meanings of and debates over national identity in Hong Kong over the past fifty years and especially during the last decade following Hong Kong's return to China It also places these arguments within a larger global perspective to ask what Hong Kong can teach us about national identity and its potential transformations Multidisciplinary in its approach Hong Kong and China explores national identity in terms of theory mass media survey data ethnography and history and will appeal to students and scholars of Chinese history cultural studies and nationalism Capitalist Restructuring and the Pacific Rim Ravi Palat,2004-07-31 This book situates the evolution of capitalist economies along Asia's Pacific Rim after the Second World War within broader global political and economic changes Specifically it charts their growth at the interface of periodic crises and successive waves of restructuring and links changes in the world economy to shifts in regional dynamics in east and southeast Asia It suggests that while the expansion of Japanese corporate networks was crucial to the emergence of the region as a low cost exporter to the world the reintegration of China into the world market will free the region from its dependence on the US as a market of last resort **Malaysian Industrial Policy** Jomo Kwame Sundaram,2007 Malaysian Industrial Policy argues that selective government promotion efforts have been successful and crucial for Malaysia's industrialisation despite some disastrous consequences associated with the Mahathir government's heavy industrialisation programme The authors present evidence to show that direct and indirect government interventions have induced and supported investments accelerating the structural transformation of the Malaysian economy However industrial development in Malaysia has been modest compared with that in Northeast Asia because of weaknesses in industrial policy and excessive reliance on foreign investments **Hong Kong Society** Stephen WK Chiu,Kaxton YK Siu,2022-02-23 This book borrows the concept of high definition from digital broadcasting to highlight our unique approach to Hong Kong society which gives a sharper image than analyses It intends to highlight contrasts with many common and taken for granted stories myths and representations of Hong Kong which often presented with a low level of detail lacking proper connections between grounded personal experiences and the macro social context With chapters covering various salient dimensions of Hong Kong's society including migration economy inequality identity and social movements our high definition approach presents images with high enough resolution to match multiple layers of experiences from walks of life of Hong Kong people contributing to an understanding of how global transformation impacts local people's experiences as well as Hong Kong's significance in the regional and global system Asian Capitalism and the Regulation of Competition Michael W. Midwest Book Review This book serves as an important guide to the many fascinating research questions about Asian business waiting to be addressed The study of Asian business has reached equality in importance to the study of business in Europe and North America Researchers who study any of these regions have an incentive to follow the study of business in the other regions if for no other reason than that many global firms from each region operate in all regions now Nonetheless the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research Henry Yeung and the contributors are to be thanked for setting out a rich agenda for research on Asian business that will elevate this study to equality with research elsewhere in the world
