International Contracts and National Economic Regulation:Dispute Resolution Through International Commercial Arbitration Mahmood Bagheri,2000-12-06 The growth of national economic regulation and the process of globalisation increasingly expose international transactions to an array of regulations from different jurisdictions These developments often contribute to widespread international contractual failures when parties claim the incompatibility of their contractual obligations with regulatory laws The author challenges conventional means of dispute resolution and argues for an interdisciplinary approach whereby disciplines such as international economic law conflict of laws contract law and economic regulations are functionally united to resolve international and multifaceted regulatory disputes He identifies the normative foundation of contract law as an important determinant in this process contending that contract law is essentially neutral and underpinned by the concept of corrective justice while economic regulations are mainly prompted by distributive justice Applying this corrective distributive justice dichotomy to international contracts the author critically

assesses major conflict of laws approaches such as proper law the Rome Convention and governmental interest analysis which could disregard either public interest or private rights The author taking these theories into account proposes an alternative two dimensional interest analysis approach He tests the viability of this approach with reference to arbitral awards and court decisions in various jurisdictions and concludes that it uniquely fits into the structure of international commercial arbitration In adopting this approach arbitrators would take into account both corrective and distributive justice and to the extent that corrective justice prevails would be able to avert a total failure of the contract *1972 Census of Selected Service Industries* ,1976 The American economic review ,1921 *OECD Reviews of Regulatory Reform: Regulatory Reform in the United States 1999* OECD,1999-10-10 This report presents an integrated assessment of regulatory reform in framework areas such as the macroeconomic context the quality of the public sector competition policy and enforcement and integration of market openness principles in regulatory processes **EU Competition Law Volume II: Mergers and Acquisitions** Jones, Christopher,Weinert, Lisa,2021-12-14 This book is a Claey's and Casteels title now formally part of Edward Elgar Publishing With extensive updating in the decade since the publication of the second edition and written by the key Commission and European Court officials in this area as well as leading practitioners the third edition of this unique title provides meticulous and exhaustive coverage of EU Merger Law *The United States Department of Commerce Publications, Catalog and Index Supplement* United States.
