### **Einstein's Pathway to the Special Theory of Relativity**

Galina Weinstein, 2015-06-18 This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincaré and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein

### **The Man Who Stalked Einstein**

Bruce J. Hillman, Birgit Ertl-Wagner, Bernd C. Wagner, 2015-04-16 By the end of World War I Albert Einstein had become the face of the new science of theoretical physics and had made some powerful enemies One of those enemies Nobel Prize winner Philipp Lenard spent a career trying to discredit him Their story of conflict pitting Germany's most widely celebrated Jew against the Nazi scientist who was to become Hitler's chief advisor on physics had an impact far exceeding what the scientific community felt at the time Indeed their mutual antagonism affected the direction of science long after 1933 when Einstein took flight to America and changed
