

SHARP EDGES

A close-up photograph of a hand holding a sharp, translucent crystal, likely a piece of ice or a mineral specimen, against a blurred background of other crystals. The hand is positioned in the upper left, with fingers gripping the crystal. The crystal itself is elongated and has several sharp, faceted edges. The background is filled with various other crystals of different shapes and sizes, some appearing more crystalline and others more like snow or crushed ice. The overall color palette is cool, with blues, greys, and whites, and the lighting creates strong highlights and shadows on the crystal surfaces.
