Geography, Culture and Education Rod Gerber, M. Williams, 2013-04-17 An important challenge for our world is to understand how cultural understanding and geographical education can be linked and used to improve the global society We readily accept that our world is constituted by numerous groups of people who are organised by committees tribes regions nations or continental entities How these groups interact show concern for each others well being and progress is still an unpredictable activity Intercultural tensions racial conflicts and religious clashes have all led to the challenges for enacting a constructive world Fundamental perspectives challenge moderate ones and the resulting tensions produce elements of fear doubt and distrust The extremist views of terrorist groups exaggerate these tensions to the extent that some different cultural groups do not prefer to live in peace with their neighbours Deep seated intercultural tensions predominate over peaceful co existence Such challenges may easily dominate the interaction between racial groups tribes indigenous peoples and colonisers However we know that through the sound practice of intercultural understanding cultural groups in different contexts around the world can interact

and co exist successfully and productively In fact they can work together to seek to improve their society This does not mean that one group will dominate the other Rather it means that both groups work together to improve their collective lives Education has played an important role in the long term achievement of such harmony This volume has been developed to demonstrate that geographical education can be a potent force in the development of cultural understanding in different societies

Social Justice, Peace, and Environmental Education Julie Andrzejewski,Marta Baltodano,Linda Symcox,2009-04-01 The concept of standards seems antithetical to the ways critical educators are dedicated to teaching but what would standards look like if they were generated from social justice perspectives and through collaborative and inclusive processes Such is the central question posed by the contributors of this groundbreaking collection on the interconnectivity of social justice peace and environmental preservation Challenging education that promotes consumerism careerism and corporate profiteering they boldly offer examples of a new paradigm for practicing a transformative critical pedagogy Rather than just talking about coalition building within and across educational communities they demonstrate how we might communicate from different vantage points and disciplinary boundaries to create a broader picture of social and eco justice Social Justice Peace and Environmental Education will be required reading for educators and students who want to envision and practice living acting and teaching for a better world
