Gelber,2020-06-23 A comprehensive history of evaluation in American higher education In Grading the College Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate

focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education

David Riesman and Critical Theory Amirhosein Khandizaji, Mary Caputi, 2021-08-17 Although David Riesman wrote over half a century ago his concept of autonomy as presented in The Lonely Crowd 1950 speaks directly to the intellectual and emotional disarrangements of the twenty first century The current malaise produced by the excesses of commodity culture information technology the hyperreal and fake news militate against our ability to think critically about contemporary society And while postmodern authors insist that this bewildering situation weakens and assails our critical thinking skills Riesman's notion of autonomy refuses to capitulate to such a somber interpretation Rather he is convinced that individuals have the intellectual and emotional mettle to think for themselves and not be drawn into the demands of a commercialized culture and a

commodity driven lifestyle As we pick and choose the terms of our engagement we can remain aloof from society's engulfing influence and preserve the oppositional thinking needed for democracy To illustrate this point most clearly this book puts Riesman into conversation with the writings of Theodor Adorno whose evaluation of the critical faculty's ability to withstand the culture industry is famously pessimistic **Handbook of Education Policy Studies** Guorui Fan, Thomas S.

Early Holistic Scoring of Writing Richard Haswell, Norbert Elliot, 2019-11-01

What is

the most fair and efficient way to assess the writing performance of students Although the question gained importance during the US educational accountability movement of the 1980s and 1990s the issue had preoccupied international language experts and evaluators long before One answer to the question the assessment method known as holistic scoring is central to understanding writing in academic settings Early Holistic Scoring of Writing addresses the history of holistic essay assessment in the United Kingdom and the United States from the mid 1930s to the mid 1980s and newly conceptualizes holistic scoring by philosophically and reflectively reinterpreting the genre s origin development and significance The book chronicles holistic scoring from its initial origin in the United Kingdom to the beginning of its heyday in the United States Chapters cover little known history from the holistic scoring of school certificate examination essays written by Blitz evacuee children in Devon during WWII to teacher adaptations of holistic scoring in California schools during the 1970s Chapters detail the complications challenges and successes of holistic scoring from British high stakes admissions examinations to foundational pedagogical research by Bay Area Writing Project scholars The book concludes with lessons learned providing a guide for continued efforts to assess student writing through evidence models Exploring the possibility of actionable history Early Holistic Scoring of Writing reconceptualizes writing assessment Here is a new history that retells the origins of our present body of knowledge in writing studies

Telecollaboration in Translator Education Mariusz Marczak,2023-11-24 This volume provides a comprehensive treatment of telecollaboration as a learning mode in translator education surveying the state of the art exploring its distinctive challenges and affordances and outlining future directions in both theoretical and practical terms The book begins with an overview of telecollaboration and its rise in prominence in today s globalised world one in which developments in technology have significantly impacted practices in professional translation and translator education The volume highlights basic design types and assessment modes and their use in achieving competence based learning outcomes drawing on examples from seven telecollaboration projects In incorporating real life research Marczak draws readers attention to not only the practical workings of different types of projects and their attendant challenges but also the opportunities for educators to diversify and optimize their instructional practices and for budding translators to build competence and better secure their future employability in the language service provision industry This volume will be a valuable resource for students and researchers in translation studies particularly those with an interest in translator education and translation technology as well as stakeholders in the professional translation industry

The Lost Black Scholar David A. Varel,2018-04-13 Allison Davis 1902-83 a preeminent black scholar and social science pioneer is perhaps best known for his groundbreaking investigations into inequality Jim Crow America and the cultural biases of intelligence testing Davis one of America s first black anthropologists and the first tenured African American professor at a predominantly white university produced work that had tangible and lasting effects on public policy including contributions to Brown v Board of Education the federal Head Start program and school testing practices Yet Davis remains largely absent

from the historical record For someone who generated such an extensive body of work this marginalization is particularly surprising But it is also revelatory In *The Lost Black Scholar* David A Varel tells Davis s compelling story showing how a combination of institutional racism disciplinary eclecticism and iconoclastic thinking effectively sidelined him as an intellectual A close look at Davis s career sheds light not only on the racial politics of the academy but also the costs of being an innovator outside of the mainstream Equally important Varel argues that Davis exemplifies how black scholars led the way in advancing American social thought Even though he was rarely acknowledged for it Davis refuted scientific racism and laid bare the environmental roots of human difference more deftly than most of his white peers by pushing social science in bold new directions Varel shows how Davis effectively helped to lay the groundwork for the civil rights movement **The University of Chicago Magazine** ,2004 **American Book Publishing Record** ,2003
