of class as a primordial social grouping beyond its economic significance. Indeed his demonstration that class, ethnic and religious groupings were decisive in determining the course of British working class education has broad ranging implications. These groupings remain at the heart of educational conflict, debate and change in most societies including our own and prompt us to pose again and again the chronic question: who controls the educational terrain?

**International Bibliography of Business History** Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16. With the growth of multi-national corporations in the 1980s, international and inter-firm comparisons have gained in importance. In addition, there has been a move towards improving links with mainstream economic, financial and social history through techniques and outlook. The *International Bibliography of Business History* brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in business history. This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians.

*The Great Exhibition of 1851* Jeffrey A. Auerbach, 1999-01-01. The book challenges the common view that the Exhibition symbolized peace, progress, prosperity and the emergence of an industrial middle class. Auerbach suggests instead that the Great Exhibition became a cultural battlefield on which proponents of different visions of industrialization, modernization and internationalism fought for ascendancy in the struggle for a new national identity.
