**Foreword by Charles D. Tenney** Richard Buckminster Fuller, 1962      **Education Automation** R. Buckminster Fuller, 2010  
Buckminster Fuller's prophetic 1962 book *Education Automation* brilliantly anticipated the need to rethink learning in light of a dawning revolution in informational technology upcoming major world industry. Along with other essays on education including *Breaking the Shell of Permitted Ignorance*, *Children the True Scientists* and *Mistake Mystique*, this volume presents a powerful approach for preparing ourselves to face epochal changes on spaceship earth whether we are going to make it or not is really up to each one of us; it is not something we can delegate to the politicians. What kind of world are you really going to have? Description by Lars Muller Publishers courtesy of The Estate of Buckminster Fuller      *At a Distance* Annmarie Chandler, 2005. The theory and practice of networked art and activism including mail art, sound art, telematic art, fax art, Fluxus and assemblages. Networked collaborations of artists did not begin on the Internet. In this multidisciplinary look at the practice of art that takes place across a distance, geographical, temporal or emotional, theorists and practitioners examine the ways that art, activism and media fundamentally reconfigured each other in experimental, networked projects of the 1970s and 1980s. By providing a context for this work, showing that it was shaped by varying mixes of social relations, cultural strategies and political and aesthetic concerns, *At a Distance* effectively refutes the widely accepted idea that networked art is technologically determined. Doing so, it provides the historical grounding needed for a more complete understanding of today's practices of Internet art and activism and suggests the possibilities inherent in networked practice. *At a Distance* traces the history and theory of such experimental art projects as Mail Art, sound and radio art, telematic art, assemblages and Fluxus. Although the projects differed, a conceptual questioning of the art object combined with a political undermining of dominant art institutional practices animated most distance art. After a section that sets this work in historical and critical perspective, the book presents artists and others involved in this art, re-viewing their work including experiments in mini FM, telerobotics, networked psychoanalysis and interactive book construction. Finally, the book recasts the history of networks from the perspectives of politics, aesthetics, economics and cross-cultural analysis      **The Experimenters** Eva Díaz, 2014-12-25. In the years immediately following World War II, Black Mountain College, an unaccredited school in rural Appalachia, became a vital hub of cultural innovation. Practically every major artistic figure of the mid-twentieth century spent some time there: Merce Cunningham, Ray Johnson, Franz Kline, Willem de Kooning, Robert Motherwell, Robert Rauschenberg, Dorothea Rockburne, Aaron Siskind, Cy Twombly; the list goes on and on. Yet scholars have tended to view these artists' time at the College as little more than prologue, a step on their way to greatness. With *The Experimenters*, Eva Díaz

reveals the importance of Black Mountain College and especially of three key teachers Josef Albers John Cage and R Buckminster Fuller to be much greater than that D az s focus is on experimentation Albers Cage and Fuller she shows taught new models of art making that favored testing procedures rather than personal expression These methodologies represented incipient directions for postwar art practice elements of which would be sampled and often wholly adopted by Black Mountain students and subsequent practitioners The resulting works which interrelate art and life in a way that imbues these projects with crucial relevance not only reconfigured the relationships among chance order and design they helped redefine what artistic practice was and could be for future generations Offering a bold compelling new angle on some of the most widely studied creative figures of modern times The Experimenters does nothing less than rewrite the story of art in the mid twentieth century

**Labor's End** Jason Resnikoff,2022-01-18 Labor s End traces the discourse around automation from its origins in the factory to its wide ranging implications in political and social life As Jason Resnikoff shows the term automation expressed the conviction that industrial progress meant the inevitable abolition of manual labor from industry But the real substance of the term reflected industry s desire to hide an intensification of human work and labor s loss of power and protection behind magnificent machinery and a starry eyed faith in technological revolution The rhetorical power of the automation ideology revealed and perpetuated a belief that the idea of freedom was incompatible with the activity of work From there political actors ruled out the workplace as a site of politics while some of labor s staunchest allies dismissed sped up tasks expanded workloads and incipient deindustrialization in the name of technological progress A forceful intellectual history Labor s End challenges entrenched assumptions about automation s transformation of the American workplace
