**China's Education Aid to Africa** Wei

Ye, 2023-05-31 China's rise as an aid provider in Africa has caught global attention with China's activity being viewed as the projection of soft power of a neo colonialist kind in an international relations context This book which focuses on China's education aid government scholarships training Confucius Institutes dispatched teachers etc reveals a much more complicated picture It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China's soft power projection how much of China's aid is bound up with an education for economic growth outlook mirroring China's own recent experiences of economic development and how China's aid prioritized to reflect the commercial sector's interests is out of step with most international development aid which is dominated by education agendas and the campaigns of international organizations and traditional donors this leaves China easily exposed to the charge of neo colonialism This situation also reveals insufficient knowledge production of China and in South South Cooperation Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform

**Education in Transition** Rosarii Griffin, 2002-01-01 Reform and reconstruction of education in places as diverse as Chile South Africa and the former East Germany has highlighted the issue of education in transition In cases such as these there has been a rapid and profound change of political context from autocratic to democratic and theory has been generated relating to this Such cases are included here but the aim of this volume is to illustrate the fact that all nations are in some form of transition generated by a range of pressures and factors Consequently the contributing chapters are structured within three broad themes with the consideration of such issues as market orientation and gender as well as change arising from physical conflict The resultant book makes a distinctive contribution to the understanding of relationships between policy making for educational provision and the realities of outcomes in practice

**Education Reform in Societies in Transition**, 2006-01-01 Framed against the background of educational change this book proposes to examine the relationship between curriculum change teacher professional development policy reform and the processes of educational change The main aims of the book are to 1 focus on educational changes and reconstruction in transitional societies that have undergone political economic and social change in the past two decades 2 provide a forum for the dissemination of research on education reconstruction and reform in transitional societies 3 disseminate ideas that enhance both the practical and theoretical aspects of educational changes in these societies 4 further knowledge and understanding of emerging trends and issues in education in these societies 5 reflect the realities of educational scenarios in each transitional society The book presents an in depth exploration of educational reconstruction in 15 transitional societies In each chapter the authors have provided an overview of educational processes in the country a distillation of education change or reform and or reconstruction in each transitional society Collectively the

chapters in the book have attempted to contribute to a better understanding of the educational system in respective countries by identifying the challenges and obstacles the policy implications the teacher professional development needs and curriculum reform efforts

*State of Transition* Clive Harber, 2001-01-01 The main purpose of this book is to provide a concise overview of educational transition to document discuss and analyse key changes and continuities in South African education since the end of apartheid What makes this period particularly fascinating for educationalists is that the legacy of apartheid and the years of international isolation meant that educational reform had to be fundamental and wide ranging if South Africa was to become a modern democratic state participating in the global political economy of the twenty first century The result was that in the final five years of the twentieth century South Africa became something of a laboratory or crucible for educational innovation From 1948 to the early 1990s South African government was based on an institutionalised system of racial separation and inequality formally known as apartheid A white minority dominated a black majority in a context of stark social political and economic differentiation While the apartheid state used force to maintain this system formal education was also used to try to make the basic tenets of apartheid normal and acceptable in the minds of South Africans From the apartheid government s point of view the role of education was to help to perpetuate and reproduce a racist system and to encourage obedience and conformity to that system It is not therefore surprising that in the 1970s and 1980s education also became a key site in the struggle against apartheid or that educational reform was high on the agenda of the first democratically elected government after April 1994 However while the direction of educational reform has inevitably been strongly influenced by the nature and history of the anti apartheid struggle inside South Africa the global political and economic context has also played its part in shaping educational debate and policy outside South Africa Clive Harber s book recognises that there is a difference between planned reform and the actual nature of educational change on the ground and tries where possible to set reform in the contextual realities of South African education as they presently exist It aims to understand the difficulties and ambiguities of transition as well as the overt aims and goals as enshrined in policy documents and legislation

*South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While

decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI Resources in Education ,2000 **Africa in the Post-2015 Development**

**Agenda** Leo Charles Zulu,Cristina D'Alessandro,2018-04-19 This book offers a multifaceted examination of Africa s development into the post 2015 global agenda from a geographical perspective As a diversified and highly applied discipline geography has a lot to offer to global debates nuanced analysis of problems on and the search for innovative solutions to advance the African development agenda beyond 2015 The end of the Millennium Development Goals MDGs era and the launch of the Sustainable Development Goals SDGs in September 2015 mark an important turning point for Africa and an opportune time to examine new challenges and opportunities that it faces The regional disparities in MDG progress affirm an important geographic tenet that the unique yet internally differentiated socio cultural economic political ecological biophysical and historical context give Africa distinctive challenges and opportunities that demand particular approaches to development This edited book presents innovative contributions examining Africa s development performance in diverse sectors during the MDG era as a basis for understanding prospects for its development in the SDG era and beyond It offers new and innovative study perspectives and methodological approaches on urban transformation development financing food security climate change gender equality health and regional integration among other topics and useful insights for scholars students and development practitioners This book was originally published as a special issue of African Geographical Review the journal of the American Association of Geographers Africa Specialty Group to mark the transition from MDGs to SDGs

Africa's digital future Ali Parry, Susara J. Jansen van Rensburg, 2021-12-31 The main thrust of this book is to examine whether Africa is in a position to benefit from the digital age given the continent's many development challenges and slow adoption of digital technologies. While there is substantial literature on the digital economy and the quickening pace of the Fourth Industrial Revolution (4IR), comparatively little research has been conducted on what the digital age means for Africa. This book aims to close this research gap by using various qualitative and quantitative research methodologies to arrive at a cross section of original findings and perspectives on how Africa can capitalise on the benefits of digital developments including their potential to create jobs and bring about more inclusive growth. The book's main contribution is its coverage of a range of topics that will affect Africa's digital future including industrialisation, global value chains, transport and logistics, trade facilitation, labour market dynamics, employment and education. The theme of digital trade forms a backdrop to many of the chapters along with references to the COVID-19 pandemic. The book acknowledges that although African countries should learn from international best practices, they need to chart their own course according to their own particular circumstances. By adopting a digital mindset, countries should be able to diversify economically and extend their market reach across the continent. Furthermore, while Africa should be looking to the future and determining how digital technologies can become effective tools of sustainable development, the continent has much catching up to do.

**The Rise of English** Rosemary Salomone, Rosemary C. Salomone, 2022 A sweeping account of the global rise of English and the high stakes politics of language. Spoken by a quarter of the world's population, English is today's lingua franca, its common tongue. The language of business, popular media and international politics, English has become commodified for its economic value and increasingly detached from any particular nation. This meteoric rise of English has many obvious benefits to communication. Tourists can travel abroad with greater ease. Political leaders can directly engage their counterparts. Researchers can collaborate with foreign colleagues. Business interests can flourish in the global economy. But the rise of English has very real downsides as well. In Europe, imperatives of political integration and job mobility compete with pride in national language and heritage. In the United States and England, English isolates us from the cultural and economic benefits of speaking other languages. And in countries like India, South Africa, Morocco and Rwanda, it has stratified society along lines of English proficiency. In *The Rise of English*, Rosemary Salomone offers a commanding view of the unprecedented spread of English and the far-reaching effects it has on global and local politics, economics, media, education and business. From the inner workings of the European Union to linguistic battles over influence in Africa, Salomone draws on a wealth of research to tell the complex story of English and ultimately to argue for English not as a force for domination but as a core component of multilingualism and the transcendence of linguistic and cultural borders.

*University Pathway Programs: Local Responses within a Growing Global Trend* Cintia Inés Agosti, Eva Bernat, 2018-06-14 This volume is the first to compile the insights of experienced and informed education researchers and practitioners involved in the delivery of university pathway programs. These programs have

emerged as effective responses to global national and local students needs when transitioning to Higher Education The book opens with an overview of the main drivers for the development of university pathway programs and a description of the main characteristics of such programs as well as of the different types of programs available It examines topics such as the way in which policy and governance issues at the institutional state and federal level affect university pathway programs financial models compliance and quality assurance mechanisms as well as program provision It also looks at how to address issues related to non traditional background students such as those from lower socioeconomic background students for whom English is an additional language EAL indigenous students mature age students and humanitarian entrants The volume showcases thirteen university pathway programs offered in Australia Canada New Zealand South Africa Qatar and the United Kingdom These examples provide valuable insights that will help guide future practice in the field as the programs described effectively foster and support the development of students academic literacies study skills and awareness of the socio cultural norms that are necessary to participate successfully in higher education settings In reporting the strategies to overcome challenges in the areas of curriculum development and implementation of equity inclusion and participation of cross sector collaboration and of student welfare the volume promotes reflection on these issues and therefore better equips those education practitioners embarking on the university pathway program journey
