Education And National Development A Comparative Perspective:

Education and National Development Ingemar Faegerlind, Lawrence J. Saha, 2016-06-03 *Education and National Development A Comparative Perspective* discusses the correlation between education and national development. The book is comprised of nine chapters that cover several concerns regarding the subject matter such as the theoretical underpinning, dimensions, policies and practice. The first chapter discusses the origins of modern development thought while the second chapter talks about how formal schooling can serve as an agent of change. Chapters 3, 4 and 5 cover the various dimensions of development which are economic growth, employment, quality of life and political system. Chapter 6 discusses strategies for educational reform while Chapter 7 deals with the evaluation of development policy. The eighth chapter provides a comparative discourse about education and development under capitalism and socialism. Chapter 9 talks about education, the state and development. The book will be of great interest to readers concerned about how education correlates with national development.

Development, Education and Learning in Sri Lanka Angela W. Little, 2024-06-13. Sri Lanka's early achievements in education and literacy became well known among the international development community in the middle of the last century and were often used to benchmark progress elsewhere. *Development Education and Learning in Sri Lanka* presents an illuminating narrative of changing education fortunes and inequalities based on half a century of research. This research journey was undertaken in collaboration with Sri Lankan researchers island wide in myriad communities, schools, classrooms and education offices through conversations with countless parents, teachers, students, community members, trade union officers, politicians and members of local, national and international development agencies as well as through extensive documentary analysis. The book delineates the distinctive and changing features of the Sri Lankan education system through comparisons with systems elsewhere through an understanding of national, political, economic and social conditions, crises and upheavals through changes in education policy and through shifting patterns of opportunity among diverse social groups. These analyses are framed by themes in the international development discourse ranging from modernisation to basic needs to globalisation and sustainable development, some of which themes have been influenced by the Sri Lankan story. The book's overriding messages are the need to understand education and development in a country's own terms and to place learning at the heart of education policy, situating it within broader conceptions of the purpose, values and means of development. Praise for *Development Education and Learning in Sri Lanka* Through rigorous and comprehensive research and a blend of

Livelihoods and Learning Caroline Dyer, 2014-05-30 Current paradigms of development generally serve mobile pastoralist groups poorly their visibility in policy processes is minimal and their mobility is constructed by the powerful as a problem rather than as a rational livelihood strategy Increasingly damaged eco systems shrinking natural resources globalisation and urbanisation all put pressure on pastoralist livelihoods Such processes often worsen rather than alleviate poverty and socio economic marginalisation among pastoralists but they also precipitate engagement with forms of education that may improve their future livelihood security and social status and enhance occupational diversification Opening with a discussion of how the relationships between education poverty and development have been conceived in dominant development discourses this book reviews the disappointing international experience of education provision to mobile pastoralist groups It highlights a lack of sufficient flexibility and relevance to changing livelihoods and more fundamentally education s conceptual location within a sedentarist paradigm of development that is antagonistic to mobility as a legitimate livelihood strategy These global themes are examined in India where policy and practices of education inclusion for mobile marginalised groups are critiqued Empirically based chapters drawing on ethnographic research provide detailed insights into how the Rabaris of Kachchh a pastoralist community in Gujarat Western India engage with education as a social and economic development strategy for both adults and children and show how ethnographic and participatory research approaches can be used for policy advocacy for marginalised groups Livelihoods and Learning highlights the complex contested and often inconsistent role of education in development and the social construction of poverty and calls for a critical reappraisal of the notion of education The book will be key reading for postgraduates and academics in education development studies international and comparative education and research methodology as well as policy makers ministries and related agencies with responsibility for education

World Bank Financing of Education Phillip W. Jones, 2007-02-12 Based on detailed analysis of thousands of confidential World Bank

documents this book demonstrates that the World Bank lies at the centre of the major changes in global education of our time. It outlines the evolution of World Bank lending policies in education and assesses the policy impact of the Bank's educational projects looking at how it has shaped the economic and social policies of many governments including policies that affect education. It has been an influential proponent of the rapid expansion of formal education systems around the world financing much of that expansion. It has been instrumental in forging those policies that see education as a precursor to modernisation served as a major purveyor of Western ideas about how education and the economy are or should be related. Following on from the success of the first edition this revised edition covers topical issues of globalisation and looks into the political debate concerning aid to developing countries. It will be of enormous value to those studying or working in educational policy in developing countries, international organisations and financial institutions and aid agencies.

Politics of Educational Innovations in Developing Countries Nelly P. Stromquist, Michael L. Basile, 2003-08-29 In the educational arena new ideas often compete as solutions to recurrent problems making the concept of innovations a widespread discursive term. While expectations are substantial for each innovation implementation of ideas has shown them to be more modest in practice. This book examines innovations in several developing countries presenting case studies of technological, curricular and organizational innovations selected for their magnitude in financial investment scope and duration. The case studies explore the social and political contexts that shaped the features of these innovations and what they accomplished over time in terms of teacher cost reduction, status, mobility, access to education and national unity. The experience of countries such as Brazil, Lesotho, the Philippines and Namibia and the influence of international agencies such as the World Bank are described and analyzed against theories of social and organizational change. The case studies themselves also serve as subjects for reflection on the prevailing positivist approaches to research and knowledge. The *Politics of Educational Innovations* should be of considerable interest to students of educational change whether in the academic world or in the fields of government and international cooperation.
