Employment in Europe Günther Schmid, 2008-01-01 The book is without doubt a must read reflection on the notion of full employment and a source of inspiration for the establishing of the knowledge based economy that is such an aspiration for Europeans Thomas Bauwens Agence Europe Every book by Günther Schmid is an event This one illuminates the current European policy debate on flexicurity It gives fresh analyses of the comparative employment performances of the EU and the USA and proposes a path breaking framework for understanding and improving them Pragmatic and provocative Schmid's contribution should be a must for researchers but also for HR managers social partners representatives and policymakers interested in the present and future of work and employment Bernard Gazier University Paris 1 and a Member of the Institut Universitaire de France Transitional Labour Markets TLM defined as legitimate negotiated and politically supported sets of various employment options in critical events over the life course are an essential ingredient of modern full employment strategies After assessing the European Employment Strategy this book offers a detailed comparative analysis of employment performance for selected European member states and the United States It suggests that successful employment systems arise from a new paradigm of flexibility and security flexicurity the balance of which varies according to countries

institutional paths Whilst there is no best practice TLM theory does provide normative and analytical principles that can be generalised for various institutional settings The book also provides good practice examples for managing critical transitions over the life course from education to employment from one job to another from unemployment to employment from private activities to gainful work and from employment to retirement and develops the contours for extending unemployment insurance to work life insurance With a fresh and new approach to the question of full employment in modern society this book will appeal to academic scholars interested in labour market and employment policies and policy decision makers at local regional national and European levels
