Education Entertainment And Learning In The Home:

Education, Entertainment, and Learning in the Home David Buckingham, Margaret Scanlon, 2003 This book is based on an extensive research project investigating the developing market in educational materials designed for use in the home It considers the characteristics of edutainment in children s information books pre school magazines and CD Roms It discusses the economic forces at work in the production and marketing of these media and the rhetoric of the sales pitches Also it considers how parents and children use them in the home Film, Politics, & Education Kelvin Shawn Sealey, 2008

Introducing the concept of cinematic education defined as pedagogy infused by the moving image this volume explores the historical theoretical and practical basis for using film in kindergarten through post secondary classrooms Its scholarly inquiry into the meaning film can bring to teaching and learning extends a vast literature on film theory At the same time it broadens the scope of cultural studies in education to include a more thorough consideration of the day to day political dimensions of the cinematic in K 12 public and private classrooms Educational Research and Innovation Education in the Digital Age Healthy and Happy Children OECD, 2020-10-15 The COVID 19 pandemic was a forceful reminder that education plays an important role in delivering not just academic learning but also in supporting physical and emotional well being Balancing traditional book learning with broader social and personal development means new roles for schools and education more generally **Critical Perspectives on Technology and Education** Scott Bulfin, Nicola F. Johnson, Chris

Bigum, 2015-02-11 This book offers critical readings of issues in education and technology and demonstrates how researchers can use critical perspectives from sociology digital media cultural studies and other fields to broaden the ed tech research imagination open up new topics ask new questions develop theory and articulate an agenda for informed action

Handbook of New Media Leah A Lievrouw, Sonia M. Livingstone, 2006-01-17 Thoroughly revised and updated this Student Edition of the successful Handbook of New Media has been abridged to showcase the best of the hardback edition This Handbook sets out boundaries of new media research and scholarship and provides a definitive statement of the current state of the art of the field Covering major problem areas of research the Handbook of New Media includes an introductory essay by the editors and a concluding essay by Ron Rice Each chapter written by an internationally renowned scholar provides a review of the most significant social research findings and insights *A Companion to the Anthropology of Education* Bradley A. Levinson, Mica Pollock, 2016-01-19 A Companion to the Anthropology of Education presents a comprehensive and state of the art overview of the field exploring the social and cultural dimension of educational processes in both formal and nonformal settings Explores theoretical and applied approaches to cultural practice in a diverse range of educational settings around the world in both formal and non formal contexts Includes contributions by leading educational anthropologists Integrates work from and on many different national systems of scholarship including China the United States Africa the Middle East Colombia Mexico India the United Kingdom and Denmark Examines the consequences of

history cultural diversity language policies governmental mandates inequality and literacy for everyday educational processes Blair's Educational Legacy? Geoffrey Walford, 2013-10-18 The United Kingdom General Election on 1st May 1997 gave a landslide victory to a re vitalised Labour Party Tony Blair became Prime Minister with a huge Commons majority of 179 over all other parties Such a majority meant that extensive changes of policy could be implemented with little effective opposition During the election campaign Tony Blair had repeatedly claimed that the top three priorities of a New Labour government would be education education education and on page two of the Labour Party s election manifesto a smiling Blair is seen with Nelson Mandela the unacknowledged originator of the oratorical education triplet Following a third Election victory in 2005 and after over ten years as Prime Minister Blair finally stepped down to Gordon Brown in mid 2007 but only after a promotional final tour that lasted several months Towards the end Blair devoted considerable efforts to try to ensure that his legacy would be positive and that he would be remembered for more than his role in the Iraq war But what is his legacy in the field of education This book brings together the assessments of key educational researchers who have been centrally involved with both the critique and implementation of various policy developments It is now time to make a solid academic evaluation of his influence on education This book is timely and relates directly to the central policy themes of the last decade It considers the relationships between theory and practice and examines the nature of policy and politics Each contribution will review empirical data and policy changes relating to Blair s period as Prime Minister and will make an assessment of the enduring effects of changes in policy Each will assess the long term and lasting effects as well as the shorter term responses This book was published as a special issue of the Oxford Review of Education Creativity and Writing Teresa Grainger, Kathy Goouch, Andrew Lambirth, 2005 This accessible yet authoritative book considers and encourages flexible playful and innovative practices in the teaching of writing and shows how certain practices can develop children s creative and linguistic potential and their overall skill *Sesame Street* Helle Strandgaard Jensen, 2023 In *Sesame Street A Transnational History* author Helle Strandgaard Jensen tells the story of how the American television show became a global brand Jensen argues that because the show s domestic production was not financially viable from the beginning *Sesame Street* became a commodity that its producers assertively marketed all over the world *Sesame Street A Transnational History* combines archival research from seven countries bolstering an insightful analysis of how local reception and rejection of the show related to the global sales strategies and American ideals it was built upon Contrary to the producers oft publicized claims of *Sesame Street* s universality the show was heavily shaped by a fixed set of assumptions about childhood education and commercial entertainment This made sales difficult as *Sesame Street* met both skepticism and direct hostility from foreign television producers who did not share these ideals Drawing on insights from new histories about childhood education and transnational media the book lays bare a cultural clash of international proportions rooted in divergent approaches to children s television In doing so it provides a reflective backdrop to the many ongoing debates about

children's media In contrasting the positive receptions and renunciations of Sesame Street Jensen demonstrates that it was only after a substantial rethinking of Sesame Street's aims and business model that this program ended up on numerous broadcasting schedules by the mid 1970s Along the way this rethinking and the constant negotiations with potential international buyers created and shaped the business and corporate brand that paved the way for the Sesame Street we know today

Popular Culture, Pedagogy and Teacher Education Phil Benson, Alice Chik, 2014-01-10 The integration of popular culture into education is a pervasive theme at all educational levels and in all subject areas Popular Culture Pedagogy and Teacher Education explores how popular culture and education come together and interact in research and practice from an interdisciplinary perspective The international case studies in this edited volume address issues related to how popular culture teaches our students and what they learn from it outside the classroom how popular culture connects education to students' lives how teachers use popular culture in educational settings how far teachers should shape what students learn from engagement with popular culture in school how teacher educators can help teachers integrate popular culture into their teaching Providing vivid accounts of students' teachers and teacher educators and drawing out the pedagogical implications of their work this book will appeal to teachers and teacher educators who are searching for practical answers to the questions that the integration of popular culture into education poses for their work

Learning Beyond the School Julian Sefton-Green, Ola Erstad, 2018-08-06 Whilst learning is central to most understandings of what it is to be human we now live in a knowledge society where being educated defines life chances more than ever before Learning Beyond the School brings together accounts of learning from around the world in organisations' spaces and places that are schooled but not school Exploring examples of learning organisation pedagogisation informal learning and social education the book shows not only how understandings of education are framed in terms of local versions of schooling but what being educated could and should mean in very different social and political contexts With contributions from scholars based in Australia Europe the USA Latin America and Asia the book brings together accounts of learning outside of school Chapters contain rich and detailed case studies of innovative projects new kinds of learning institutions youth peer driven and community based activities and public pedagogies as well as engaging with the dimensions of an argument about the place and nature of learning outside of the school It challenges dominant versions of school around the world whilst also critically discussing the value and place of non institutionalised learning Learning Beyond the School should be of interest to academics researchers postgraduate scholars engaged in the study of comparative education youth work education systems digital culture sociology of education and youth development It should also be essential reading for practitioners and policymakers who are interested in youth and education system reform

Cultural Pedagogies and Human Conduct Megan Watkins, Greg Noble, Catherine Driscoll, 2015-03-24 Pedagogy is often glossed as the art and science of teaching but this focus typically ties it to the instructional practices of formalised schooling Like the emerging work on public pedagogies the notion

of cultural pedagogies signals the importance of the pedagogic in realms other than institutionalised education but goes beyond the notion of public pedagogies in two ways it includes spaces which are not so public and it includes an emphasis on material and non human actors This collection foregrounds this broader understanding of pedagogy by framing enquiry through a series of questions and across a range of settings How for example are the processes of teaching and learning realised within and across the pedagogic processes specific to various social sites What ensembles of people things and practices are brought together in specific institutional and everyday settings to accomplish these processes This collection brings together researchers whose work across the interdisciplinary nexus of cultural studies sociology media studies education and museology offers significant insights into these cultural pedagogies the practices and relations through which cumulative changes in how we act feel and think occur Cultural Pedagogies and Human Conduct opens up debate across disciplines theoretical perspectives and empirical foci to explore both what is pedagogical about culture and what is cultural about pedagogy *International Perspectives on Student Outcomes and Homework* Rollande Deslandes,2009-04-08

Focusing on issues including parental engagement and the uses and abuses of homework this vital international snapshot of current research provides a research synthesis on the impact of family school community partnerships on student outcomes

Giving Voice Meryl Alper,2017-01-20 How communication technologies meant to empower people with speech disorders to give voice to the voiceless are still subject to disempowering structural inequalities Mobile technologies are often hailed as a way to give voice to the voiceless Behind the praise though are beliefs about technology as a gateway to opportunity and voice as a metaphor for agency and self representation In Giving Voice Meryl Alper explores these assumptions by looking closely at one such case the use of the Apple iPad and mobile app Proloquo2Go which converts icons and text into synthetic speech by children with disabilities including autism and cerebral palsy and their families She finds that despite claims to empowerment the hardware and software are still subject to disempowering structural inequalities Views of technology as a great equalizer she illustrates rarely account for all the ways that culture law policy and even technology itself can reinforce disparity particularly for those with disabilities Alper explores among other things alternative understandings of voice the surprising sociotechnical importance of the iPad case and convergences and divergences in the lives of parents across class She shows that working class and low income parents understand the app and other communication technologies differently from upper and middle class parents and that the institutional ecosystem reflects a bias toward those more privileged Handing someone a talking tablet computer does not in itself give that person a voice Alper finds that the ability to mobilize social economic and cultural capital shapes the extent to which individuals can not only speak but be heard *Boundless cyber world?* Nadia Kutscher,Stefan Iske,Hans-Uwe Otto,Alexandra Klein,2007-07-12 Welche Bedeutung haben technische Ausstattung und soziale Zugangsorte f r die Teilhabe im virtuellen Raum Welchen Einfluss haben soziale Rahmenbedingungen auf Nutzungsdifferenzen und welche Auspr gungen finden sich in dieser Hinsicht bei Jugendlichen In

der Beantwortung dieser neuen Fragestellungen führt der Band international herausragende ExpertInnen aus verschiedenen Disziplinen zusammen. Zentrale Fragen der Bildungsteilhabe in der Informations- und Wissensgesellschaft gerade für die nachwachsende Generation, die häufig als DIE Mediengeneration schlechthin gilt, werden im Zusammenhang mit der Problematik der digitalen Spaltung thematisiert und systematisiert. Die erstmalige Zusammenführung dieser unterschiedlichen Blickwinkel führt zu neuen Erkenntnissen über die Bildungsherausforderungen des Internet.

International Handbook of Research on Children's Literacy, Learning and Culture Kathy Hall, Teresa Cremin, Barbara Comber, Luis C. Moll, 2016-10-31 The International Handbook of Research in Children's Literacy, Learning and Culture presents an authoritative distillation of current global knowledge related to the field of primary years literacy studies. Features chapters that conceptualize, interpret and synthesize relevant research. Critically reviews past and current research in order to influence future directions in the field of literacy. Offers literacy scholars an international perspective that recognizes and anticipates increasing diversity in literacy practices and cultures. Mobile Learning Norbert Pachler, Ben Bachmair, John Cook, 2009-12-15 As with television and computers before it, today's mobile technology challenges educators to respond and ensure their work is relevant to students. What's changed is that this portable, cross-contextual way of engaging with the world is driving a more proactive approach to learning on the part of young people. The first full-length authored treatment of the relationship between the centrality of technological development in daily life and its potential as a means of education. Mobile Learning charts the rapid emergence of new forms of mass communication and their potential for gathering, shaping and analyzing information, studying their transformative capability and learning potential in the contexts of school and socio-cultural change. The focus is on mobile cell phones, PDAs and to a lesser extent gaming devices and music players, not as the next new thing but meaningfully integrated into education without objectifying the devices or technology itself. And the book fully grounds readers by offering theoretical and conceptual models, an analytical framework for understanding the issues, recommendations for specialized resources and practical examples of mobile learning in formal as well as informal educational settings, particularly with at-risk students. Among the topics covered: Core issues in mobile learning; Mobile devices as educational resources; Socioeconomic approaches to mobile learning; Creating situations that promote mobile learning; Ubiquitous mobility and its implications for pedagogy; Bridging the digital divide at the policy level. Mobile Learning is a groundbreaking volume sure to stimulate both discussion and innovation among educational professionals interested in technology in the context of teaching and learning. **Toys, Games, and Media** Jeffrey Goldstein, David Buckingham, Gilles Brougere, 2004-09-10 This book is a state-of-the-art look at where toys have come from and where they are likely to go in the years ahead. The focus is on the interplay between traditional toys and play and toys and play that are mediated by or combined with digital technology. As well as covering the technical aspects of computer-mediated play activities, the authors consider how technologically enhanced toys are currently used in traditional play and

how they are woven into children's lives The authors contrast their findings about technologically enhanced toys with knowledge of traditional toys and play They link their studies of toys to goals in education and to entertainment and information transfer This book will appeal to students researchers teachers child care workers and more broadly the entertainment industry It is appropriate for courses that deal with the specialized subject of toys and games media studies education and teacher training and child development

Key Scholarship in Media Literacy: David Buckingham

Allison T. Butler, 2020-11-30 We live in a time of unprecedented media use much of which can be accessed by devices that fit in our pockets Young people in particular make use of media on a near constant basis How can this media use be better understood This text focuses on the scholarship and research of David Buckingham a global leader in media literacy education and children's and young people's media cultures It is not an exaggeration to state that studies and applications of media literacy education around the globe are indebted to the scholarship of Buckingham and that more nuanced understandings of how children and young people make sense of their media choices are due in large part to Buckingham's work Key Scholarship in Media Literacy David Buckingham focuses on the key contributions of Buckingham's work over his prolific career illuminating the advances he made in the field of media literacy education and understandings of young people's media cultures Through a close look at Buckingham's theoretical advancements contributions to the larger field of media literacy education and the key strains of his research how children and young people learn what they already know about media and pop culture before they enter classrooms and media content about and for youth this text delineates Buckingham's vast bibliography and will be an invaluable resource for anyone curious to know more about children youth and media literacy education Analysis of Buckingham's work is drawn from his robust bibliography exploration of scholarship he has critiqued interpretation of contemporary social concerns through the lens of his research and formal and informal conversations with him over the course of several years

Informal Learning and Digital Media Kirsten Drotner, Hans

Siggaard Jensen, Kim Christian Schröder, 2009-12-14 The book provides an engaging overview of the ways in which digital media impact on current understandings of informal learning and it offers a range of grounded studies of the changing relations between digital media and informal learning processes with a particular focus on young people A variety of international scholars examine these processes across a number of sites and settings from Japan to Finland and the USA and they discuss their implications for education ICT and media The volume is an ideal resource for graduate students as well as for practitioners and policy makers
