Education In Religion And The Emotions:

Education in Religion and the Emotions John Wilson, 1971 **Routledge Library Editions: Education and Religion** Various, 2021-07-14 The 10 volumes in this set originally published between 1965 and 1994 draw together research by leading academics in the area of religious education and provides a rigorous examination of related key issues The volumes examine the teaching of world faiths in schools religious education in both primary and secondary schools and the teaching of morality This set will be of particular interest to students of Education and Religious Studies *There is a Crack in Everything—Education and Religion in a Secular Age* K. H. (Ina) ter Avest, 2019-11-22 There are two constants in academic and theological discourse throughout history they are the debate around secularization and the dialogue concerning the intersection of religion and education Each age has had its debate about modernizing forces that drive concerns of impending secularization In this publication this theme is approached from perspectives of teachers of students of policy makers and situated in a politico historical context Aware of the fact that in today's plural societies one sacred canopy is non-existent anymore cracks of the sacred canopy canopies are described as well as the light that gets in the possible and challenging ways out are roughly sketched **Education, Religion and Diversity** L. Philip Barnes, 2014-02-05 In this thoughtful and provocative book Philip Barnes challenges religious educators to re-think their field and proposes a new post-liberal model of religious education to help them do so His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored While *Education Religion and Diversity* is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion Walter Feinberg Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential what he calls a liberal and a postmodern model After a detailed review and criticism of both he outlines his own new post-liberal model of religious education one that is compatible with both confessional and non-confessional forms of religious education yet takes religious diversity and religious truth claims seriously Essential reading for all religious educators and those concerned with the role of religion in schools Bernd Schröder Professor of Practical Theology and Religious Education University of Göttingen What place if any does religious education have in the schools of an increasingly diverse society This lucid and authoritative book makes an incisive contribution to this crucial debate Roger Trigg is Emeritus Professor of Philosophy University of Warwick and Senior Research Fellow Ian Ramsey Centre Oxford The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of all curriculum subjects resolutions are most

likely to be found Education Religion and Diversity identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society It is argued that despite the rhetoric of success which religious education is obliged to rehearse in order to perpetuate its status in the curriculum and to ensure political support a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible respectful society Education Religion and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education

The ^AOxford Handbook of Religion and Emotion John Corrigan,2008-01-02 This volume collects essays under four categories religious traditions religious life emotional states and historical and theoretical perspectives These essays describe the ways in which emotions have played a role in various world religions and analyze the manner in which key components of religious life ritual music gender sexuality and material culture represent and shape emotional performance Taken together the writings included in this handbook serve as an ideal entry point for anyone wishing to familiarize themselves with the new academic study of religion and emotion *The Oxford Handbook of Religion and Education* Liam Francis Gearon,Arniika Kuusisto,2025-04-29 The Oxford Handbook of Religion and Education offers a multi disciplinary work of scholarship and research highlighting the global significance of a critical interface of cultural and social political and theological importance Drawing on historical perspective and contemporary reflection the collection provides a uniquely transformative analysis of why the interface of religion and education is of such critical significance With contributions from some of the leading thinkers in the field this Handbook presents a cumulatively powerful argument to reassess the complexities of the intersection of religion and education With ambitious and yet accessible intellectual engagements the Handbook here furthers a central thesis that the interface of religion and education is not merely a matter of arcane disputation about a domain of ancient origin or a rudimentary matter of formal educational process but a vibrant domain of critical contestation fundamental to knowing understanding and living in the modern world **Women, Religion, and Emotions in Modern Germany and Beyond** Lisa Fetheringill Zwicker,Martina Cucchiara,2025 Analyzes the role of emotions in the religious lives of women from across Germany and Europe from the nineteenth century to the 1970s Scholarship on women and religion has focused primarily on the intersection between women s religious engagement and their emancipation This volume goes beyond that to examine the vital role religion has played in the private and public lives of German and European women Because emotions are central to the expression of religiosity it draws on approaches from

the history of emotions to examine how women understood felt and practiced religion in their search for meaning Spanning from the nineteenth century to the 1970s the volume s essays show how religion helped women make sense of their lives It also illuminates the degree to which women used religion and its attendant emotional scripts to shape modern society and how religious discourses in turn shaped women s emotions and comportment in the public sphere The volume builds on recent research that shows that religion especially the religiosity of women remained a pressing public concern in modern Europe From anxieties over the religiosity of Bavarian servants to restrictive norms imposed on Jewish widows from the interfaith commitments of kindergarten teachers to the autobiographical narratives of aspiring Protestant deaconesses from the suffering of stigmatics in Germany and Belgium to Irish women s public narratives of their religiosity this book reveals how women s faith and attendant religious emotions have been central to their public and private lives **Religious**

Education John Sealey,2019-08-13 The majority of books on religious education are written by those who are themselves adherents of particular religious beliefs and such books almost invariably reflect their authors religious inclinations Therefore a critical look at certain key aspects in religious education from a secular point of view was long overview when this title was f **Education.
