Educational Psychology of the Gifted Joe Khatena,1982 Psychology and Education of the Gifted Walter Burke Barbe,Joseph S. Renzulli,1981 *Handbook of Giftedness in Children* Steven I. Pfeiffer,2008-02-20 Mention special needs children and most people think of students struggling to overcome learning and physical disabilities as well as problem behaviors that interfere with achieving full academic potential But there is a hidden population of special needs children the gifted and talented and their teachers parents and other professionals are often not well equipped to respond to their unique academic and developmental needs In one comprehensive resource the Handbook of Giftedness in Children brings together leading experts from the fields of psychology and education combining theory and applied empirical research on such crucial topics as conceptualization types of intelligence developmental considerations and ethical and legal concerns Particular attention is given to social and family contexts and evidence based strategies and interventions offer solid guidelines on assessment curriculum design and encouraging and nurturing talent from preschool through adolescence Sample topics include Approaches to screening and assessment including IQ and other tests The gifted child s social world from peer relationships to gender issues Special issues of gifted but disadvantaged students Problems and interventions specific to families with a gifted child Career counseling planning and mentorship This volume is an essential resource for anyone working with gifted and talented children including clinical child and school psychologists educators and other allied professionals as well as child psychiatrists family therapists social workers and pediatricians and other healthcare professionals It also serves as an invaluable guide for graduate students in these and related fields International Perspectives on Science Education for the Gifted Keith Taber,Manabu Sumida,2016-04-28 In the spirit of encouraging international dialogue between researchers and practitioners often working within isolated traditions this book discusses perspectives on science education for the gifted informed by up to date research findings from a number of related fields The book reviews philosophy culture and programmes in science education for the gifted in diverse national contexts and includes scholarly reviews of significant perspectives and up to date research methods and findings The book is written in a straightforward style for students studying international perspective modules on undergraduate but especially masters and doctoral degrees in Science Education and Gifted Education Gifted education has come to be regarded as a key national programme in many countries and gifted education in science disciplines is now of major importance to economic and technological development Despite these national initiatives and developments there are very few discussions on gifted education in science from international perspectives This will be a valued addition to the scholarship in this emergent field

The Gifted and Talented Frances Degen Horowitz,Marion O'Brien,1985 The chapters that this book comprises represent what is known about the gifted and the talented from a developmental perspective As one author after the other stresses this volume is equally a testament to what is not known The chapters in this section Part I reflect the lack of agreement in past

research over the nature of giftedness but the authors raise similar questions for future investigations These five chapters set forth major issues facing investigators in the field of giftedness From the diverse points of view emerges one commonality the call for prospective developmental research guided by theory to aid our understanding of the complex of factors that contribute to gifted performance The authors of the chapters in this section Part II discuss giftedness in a social perspective and suggest areas in which research and innovative action might be most useful In this section Part III authors explore approaches to studying the development of the gifted from diverse and innovative points of view

Critical Issues and Practices in Gifted Education Jonathan A. Plucker, Carolyn M. Callahan, 2008 Critical Issues and Practices in Gifted Education What the Research Says is the definitive reference book for those searching for a summary and evaluation of the literature on giftedness and gifted education The book presents almost 50 summaries of important topics in the field providing relevant research and a guide to how the research applies to gifted

education Sample topics addressed include alternative assessment counseling early childhood highly gifted students homeschooling parenting and policy and advocacy Each chapter adopts a rigorous empirically grounded approach to inform the reader s understanding of the research in gifted education Despite a century of research on giftedness the enthusiasm and rhetoric surrounding various programs models and approaches often exceed the level of available support or even contradict the available evidence This book provides an objective assessment of the status of available knowledge in each area offers guidance in the application of the research and suggests areas of needed research From Giftedness to Gifted Education Matthew C. Makel, Anne N. Rinn, Jonathan A. Plucker, 2021-09-09 The fields of gifted education and talent development have numerous theories and conceptions for how to identify and serve students This book helps introduce and apply these ideas to help reflect theory in practice Each chapter introduces readers to a different theory by providing definitions of key concepts explaining the fundamental conceptual theoretical approach and concluding with advice on how the conception can be put into practice Suggestions for further reading are also provided Some chapters are based on theories that have been around for decades and some have been developed more recently But all chapters focus on helping empower readers to understand and take action without having to reinvent the wheel **Preventing Talent Loss** Eunsook Hong, Roberta M. Milgram, 2011-04-06 Preventing Talent Loss provides a comprehensive model of giftedness and talent for all educators including teachers counselors and administrators By presenting a summary of theory driven evidence based knowledge Hong and Milgram offer innovative and practical solutions for meeting the challenge of coping with talent loss This monumental book distinguishes the important difference between expert talent and creative talent While other books focus on how to improve the process of identifying the gifted and talented Preventing Talent Loss provides educators with the means to individualize their curriculum and instruction in regular classrooms Gifted Children Leta Stetter Hollingworth, 1926 The subject that is treated in this volume has engaged a large part of the attention not only of psychologists and educationists but also of laymen It is argued that if nature really endows some children intellectually much more generously than she does others and the data presented in this volume will convince any fair minded person that this is the case the fact is of importance to those who are interested in social advancement as well as to those teachers and parents who are striving to do the best they can for each individual committed to their care A large amount of scientific material is included in this book but it is presented in a straightforward clear interesting manner and it may be predicted that this volume will be read easily and with complete comprehension by parents teachers and laymen as well as by students of human development and of education PsycINFO Database Record c 2004 APA all rights reserved **The Gifted Child in Peer Group Perspective** Barry H. Schneider, 2012-12-06 An Applied Psychologist s Initiation to the Study of Gifted Children My interest in the subject matter of this book the peer relations of gifted children intensified enormously as result of my involvement with one gifted child during my days as a school psychologist At that time I served a number of schools in a

prosperous suburb I spent most of my time working with children with behavioral and learning disorders I received very few requests to assist gifted youngsters and their teachers perhaps because at that point I was not very sensitive to their needs One autumn I was involved in something from which I derived a great deal of satisfaction helping the teachers of a very advanced retarded boy with Down s syndrome maintain himself in a regular first grade class In retrospect the achievements of this student Jeff would have justified my calling him exceptionally bright given the limits of his endowment I was interrupted from my observation of Jeff s success in class by a phone call from another school one to which I had not previously been summoned I was asked to discuss the case of an intellectually gifted child who was bored moody difficult and disliked by those around him
