Nature in the Middle Ages and the Early Modern Times

Albrecht Classen, 2024-07-01 The study of pre modern anthropology requires the close examination of the relationship between nature and human society which has been both precarious and threatening as well as productive soothing inviting and pleasurable Much depends on the specific circumstances as the works by philosophers theologians poets artists and medical practitioners have regularly demonstrated It would not be good enough as previous scholarship has commonly done to examine simply what the various writers or artists had to say about nature While modern scientists consider just the hard core data of the objective world cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures social and economic relationships medical and scientific concepts of human health and the messages about all existence as depicted in major art works In light of the current conditions threatening to bring upon us a global crisis it matters centrally to take into consideration pre modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through which we perceive nature Nature thus proves to be a force far beyond all human comprehensibility being both material and spiritual depending on our critical approaches

Communication, Translation, and Community in the Middle Ages and Early Modern Period Albrecht Classen, 2022-08-22 Literature serves many purposes and one of them certainly proves to be to convey messages wisdom and instruction and this across languages religions and cultures Beyond that as the contributors to this volume underscore people have always endeavored to reach out to their community members that is to build community to learn from each other and to teach Hence this volume explores the meaning of communication translation and community building based on the medium of language While all these aspects have already been discussed in many different venues the contributors endeavor to explore a host of heretofore less

considered historical religious literary political and linguistic sources While the dominant focus tends to rest on conflicts hostility and animosity in the pre modern age here the emphasis rests on communication with its myriad of challenges and potentials for establishing a community As the various studies illustrate a close reading of communicative issues opens profound perspectives regarding human relationships and hence the social context This understanding invites intensive collaboration between medical historians literary scholars translation experts and specialists on religious conflicts and discourses We also learn how much language carries tremendous cultural and social meaning and determines in a most sensitive manner the interactions among people in a communicative and community based fashion

Narrative(s) in Conflict Wolfgang Müller-Funk, Clemens Ruthner, 2017-11-07 Narrative s in Conflict presents the proceedings of an international workshop held at the Trinity Long Room Hub Dublin in 2013 to a wider audience This was a cross disciplinary cooperation between the comparative research network Broken Narratives University of Vienna the research strand Identities in Transformation Trinity College Dublin and the Graduate Center for the Study of Culture at the University of Giessen What has brought this informal network together is its credo that theories of narrative should be regarded as an integral part of cultural analysis Choosing exemplary case studies from early Habsburg days up to the the wars and genocides of the 20th century and the post 9 11 War on terror our volume tries to analyze the relation between representation and conflict i e between narrative constructions social historical processes and cultural agon Here it is crucial to state that narratives do not simply and passively mirror conflicts as the conventional realistic paradigm suggests they rather provide a symbolic sense making matrix and even a performative dimension It even can be said that in many cases narratives make conflicts

Portuguese Colonial Cities in the Early Modern World Liam Matthew Brockey, 2016-12-05 Portuguese Colonial Cities in the Early Modern World is a collection of essays on the cities of the Portuguese empire written by the leading scholars in the field The volume like the empire it analyzes has a global scope and a chronological span of three centuries The contributions focus on the social political and economic aspects of city life in settlements as far apart as Rio de Janeiro Mozambique Island and Nagasaki Despite the seeming and real disparities between the colonial cities located in South America Africa and Asia this volume demonstrates that they possessed a range of commonalities Beyond their shared language these cities had similar social religious and political institutions that shaped their identities In many cases the civic bodies analyzed in these essays such as the city councils or the Misericórdias charitable brotherhoods no less than the convents and houses of Catholic religious orders contributed more to making these cities Portuguese than their allegiance to the crown in Lisbon Rather than dividing the globe into Atlantic and Indian Ocean spheres Portuguese Colonial Cities in the Early Modern World takes the novel approach of bringing together analyses of the social history of these cities in order to stress their shared aspects as well as to suggest paths for fruitful comparisons By encouraging further scholarship in this rich yet understudied subject this collection will not only further comparisons between cities found within the

Conca Messina, 2019-04-24 Why was early modern Europe the starting point of the economic expansion which led to the Industrial Revolution What was the state s role in this momentous transformation A History of States and Economic Policies in Early Modern Europe takes a comparative approach to answer these questions demonstrating that wars public finance and state intervention in the economy were the key elements underlying European economic dynamics of the era Structured in two parts the book begins by examining the central issues of the state economy relationship including military revolution the fiscal state and public finance mercantilism the formation of commercial empires and the economic war between Britain and France in the 1700s The second part presents a detailed comparison between the different economic policies of the most important European states looking at their unique demographic economic military and institutional contexts Taken as a whole this work provides a valuable analysis of early

modern economic history and a picture of Europe's global position on the eve of the Industrial Revolution This book will be useful to students and researchers of economic history early modern history and European history *Descorchados 2020 English* Patricio Tapia, 2020 Descorchados is today the most important reference for South American wines First published in 1999 for more than two decades it analyzes the wine scene on this side of the world an extensive and profound annual report on the best wines in South America but also on trends and names to be known New regions new types of grapes and new styles of wines a wide angle photo of what is happening today in the main producing regions of Latin America And more than 4 000 wines to drink Enjoy *History's Peru* Mark Thurner, 2011-02-13 Mark Thurner here offers a brilliant account of Peruvian historiography one that makes a pioneering contribution not only to Latin American studies but also to the history of historical thought at large He traces the contributions of key historians of Peru from the colonial period through the present and teases out the theoretical underpinnings of their approaches He demonstrates how Peruvian historical thought critiques both European history and Anglophone postcolonial theory And his deeply informed readings of Peru's most influential historians from Inca Garcilaso de la Vega to Jorge Basadre are among the most subtle and powerful available in English *Tracing the Trails in the Medieval World* Albrecht Classen, 2020-10-11 Every human being knows that we are walking through life following trails whether we are aware of them or not Medieval poets from the anonymous composer of Beowulf to Marie de France Hartmann von Aue Gottfried von Strassburg and Guillaume de Lorris to Petrarch and Heinrich Kaufringer predicated their works on the notion of the trail and elaborated on its epistemological function We can grasp here an essential concept that determines much of medieval and early modern European literature and philosophy addressing the direction which all protagonists pursue as powerfully illustrated also by the anonymous poets of Herzog Ernst and Sir Gawain and the Green Knight Dante's Divina Commedia in fact proves to be one of the most explicit poetic manifestations of the fundamental idea of the trail but we find strong parallels also in powerful contemporary works such as Guillaume de Deguileville's Plerinage de la vie humaine and in many mystical tracts *England and Spain in the Early Modern Era* Óscar Alfredo Ruiz Fernández, 2019-12-12 The early 17th century was a time of great literature the era of Cervantes and Shakespeare but also of international tension and heightened diplomacy This book looks at the relations between Spain under Philip III and Philip IV and England under James I in the period 1603-1625 It examines the essential issues that established the framework for diplomatic relations between the two states looking not only at questions of war and peace but also of trade and piracy Oscar Alfredo Ruiz Fernández expertly argues that the diplomatic relationship was vital to the strategic interests of both powers and also played a highly significant role in the domestic agendas of each country Based on Spanish and English archival sources *England and Spain in the Early Modern Era* provides for the first time a clear picture of diplomacy between England and Spain in the early modern era **Early Modern History and the Social Sciences** John A. Marino, 2002-07-01 This collection of eleven essays furthers the dialogue between early modern history and the social

sciences through an analysis of Fernand Braudel's *The Mediterranean and the Mediterranean World of Philip II*. The contributors review various historiographical traditions to arrive at conclusions on contemporary theory and practice in the exchange between history and the disciplines of geography, economics, sociology, anthropology, politics, diplomatic history, and the study of revolutions, psychology, law, religion, and area studies.

Italian Victualling Systems in the Early Modern Age, 16th to 18th Century Luca Clerici, 2021-03-17. This book illustrates the complexity and variety of victualling systems in early modern Italy. For a long time, the historiography of urban provisioning systems in late medieval and early modern times featured a conceptual opposition between victualling administration and the market. In this book, on the contrary, the term victualling system (*sistema annonario*) is employed according to its historical meaning, designating an organised set of public and private channels evolved typically in urban contexts for the procurement and distribution of the goods essential for the daily life of common people. According to this definition, specifically, a victualling system included also the market as one of the different channels for the procurement and distribution of goods. What characterises the Italian case in the European context are both the earliness of these institutions and the long-lasting political and economic fragmentation of the peninsula; these factors determined the great variety and complexity of the solutions adopted. In order to show these features, the analysis focuses on four central issues: the configuration of systems, institutional pragmatism, and variety, articulation of circuits, and plurality of actors. The seven relevant case studies included in this book, all based on direct archival research, cover a wide range of geographical contexts and institutional arrangements, from the North to the South of the peninsula, and include both large-sized cities (Milan and Rome) and medium-sized cities (Bergamo, Vicenza, and Ferrara) and entire regions (the March of Ancona and Sicily). This allows the reader to appreciate regional and local differences in detail, making this book of interest for academics and scholars in economic, social, and urban history.

Cultures of Conflict Resolution in Early Modern Europe Stephen Cummins, Laura Kounine, 2017-05-15. Disputes, discord, and reconciliation were fundamental parts of the fabric of communal living in early modern Europe. This edited volume presents essays on the cultural codes of conflict and its resolution in this period under three broad themes: peacemaking as practice, the nature of mediation and arbitration, and the role of criminal law in conflicts. Through an exploration of conflict and peacemaking, this volume provides innovative accounts of state formation, community, and religion in the early modern period.

The Cambridge Economic History of Modern Europe: Volume 1, 1700-1870 Stephen

Broadberry, Kevin H. O'Rourke, 2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country by country approach *The Cambridge Economic History of Modern Europe* rethinks Europe's economic history since 1700 as unified and pan-European with the material organised by topic rather than by country This first volume is centred on the transition to modern economic growth which first occurred in Britain before spreading to other parts of western Europe by 1870 Each chapter is written by an international team of authors who cover the three major regions of northern Europe southern Europe and central and eastern Europe The volume covers the major themes of modern economic history including trade urbanization aggregate economic growth the major sectors of agriculture industry and services and the development of living standards including the distribution of income The quantitative approach makes use of modern economic analysis in a way that is easy for students to understand
