Edge Of Destruction:

A Reactive Approach to Comprehensive Global Garbage Detection Sylvain R. Louboutin, 1999-02 Comprehensive global garbage detection GGD in object oriented distributed systems i e GGD intrinsically able to detect distributed cycles of garbage has mostly been addressed via graph tracing algorithms Graph tracing algorithms must account for every live object in the system before any resource can actually be reclaimed which compromises both their scalability and robustness in a distributed environment Alternative non comprehensive approaches trade off comprehensiveness for scalability and robustness under the assumptions that distributed cycles of garbage are rare and that all comprehensive algorithms are necessarily unscalable This thesis contends instead that distributed cycles of garbage are as likely to occur as local cycles and that a comprehensive alternative to graph tracing GGD is possible From the GGD perspective the combined effects of the application processes and local garbage collectors fulfill the role of a global mutator A subset of events of this global mutator s computation called log keeping events reflect either the creation or the destruction of inter site paths in the global object graph The causal history of a log keeping event corresponds to the set of events responsible for the creation of all the paths ever created that are incident to an object The path history of this event is defined as a subset of its causal history and contains only those events responsible for the creation of the extant paths to this object This dissertation presents a novel approach to comprehensive GGD that entails computing dependency vectors which characterize the path history of log keeping events that reflect the destruction of a path These dependency vectors can be computed by propagating increasingly accurate approximations of these vectors along the paths of the global object graph In effect this algorithm reacts to events that may result in the creation of garbage and identifies garbage without requiring a complete scan of the whole object graph In conjunction with a lazy log keeping mechanism it can therefore be shown to be both scalable and robust despite being comprehensive

The Edge of Life Christopher Kaczor, 2005-05-17 The Edge of Life Human Dignity and Contemporary Bioethics resituates bioethics in fundamental outlook by challenging both the dominant Kantian and utilitarian approaches to evaluating how new technologies apply to human life Drawing on an analysis of the dignity of the human person both as an agent and as the recipient of action The Edge of Life presents a theoretical approach to the problems of contemporary bioethics and applies this approach to various disputed questions Should conjoined twins be split if the division will end the life of the weaker twin Was Bush s stem cell research decision morally acceptable Are the quality of life and sanctity of life ethics irreconcilably incompatible Accessible to both scholars and students The Edge of Life focuses particularly on the controversial issues surrounding the beginning and ending of human life tackling some of the toughest practical questions of bioethics including new reproductive technologies artificial wombs stem cell research abortion and physician assisted suicide as well as many of its vexing theoretical disputes **Englische synonymik ...** Wilhelm Dreser, 1881 Polymer Aging at the Cutting Edge Gennadii Efremovich Zaikov, 2002 Twenty one papers collected here report on the latest work in polymer

ageing looking at aspects including the ageing of polyester resin under moisture action kinetic peculiarities of synthesis of Adamantan containing polyamidoacids and polyimides the influence of intensive mechanical treatment on decomposition of barium peroxide and ecological aspects of manufacture and application of highly pure liquid substances Biodegradable blends of starch and cellulose derivatives the quantum chemical calculation of components of biosynthesis of adrenaline low combustible poly vinyl chloride compositions with mixtures of plasticisers and inhibited oxidation of polypropylene melt are some other topics discussed

A Superior Edge Preserving Filter with a Systematic Analysis Kenneth W. Holladay, 1991

I Glanced Out the Window and Saw the Edge of the World Catherine Halsall, 2020-07-08 This book is about WAR not the causes and results not the planning and the campaigns not the artillery and the bombs It is about the heinous crimes committed by the combatants the horrifying experiences of civilians the devastation of cities and villages the killing and the dying the glory leading to revulsion and guilt and the assimilation of suffering that either ends in death or in the triumph of the soul It looks at the struggle of the church to remain faithful and the servants of the church who seek to bring sense and solace to the victims It discusses antisemitism racism and war itself from biblical perspectives It reveals the unjustifiable reasons for engaging in war and how this brings catastrophic results for all peoples the mental instability of the survivors and the loss and grief of those on the home front In war how can men and women carry out the actions that they do As Viktor Frankl writes After all man is that being who has invented the gas chambers of Auschwitz however he is also that being who has entered those gas chambers upright with the Lord's Prayer or the Shema Yisrael on his lips
